BRECK'S BUREAU

LOCATED AT
53 FRANKLIN ST., BOSTON

Supplies through its MERCANTILE DEPARTMENT approved Bookkeepers, Cashiers, Stenographers, Salesmen, Clerks, Shippers, Entry Clerks, Boys, Porters, Janitors, Watchmen, Hotel Help, Engineers, Firemen, etc., Help for Institutions and Hospitals, and through its WOMEN'S MERCANTILE DEPARTMENT approved Women Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Women for Office Work, Matrons, Nurses, etc., Hotel Employees for all positions.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining. Rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

Through our large clientage we can serve both employer and employee more promptly and satisfactorily than cau any house not having our resources. The knowledge gained through experience is at the service of employers who desire our aid or advice in the selection of suitable persons for the places they wish to fill.

On application we will mail circulars descriptive of our Bureau, and blank forms whereon employers and employees can state particulars necessary to guide us in supplying their wants.

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we secured commodious quarters at 53 Franklin Street, which we fitted up in an appropriate and attractive manner. Here our Manager, Mr. Wm. E. McGerigle, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons desiring employees or employment in mercantile lines.

Bear in mind that no person is sent out from our Bureau whose previous record for character and habits has not been carefully investigated and approved.

Yours respectfully,

Telephone, Richmond 2360

Breck's Horticultural and Agricultural Registry

Employers and employees in these lines will be served at 51 and 52 North Market Street, as formerly, where competent assistants will use every endeavor to give satisfaction to all who favor us. Approved GARDENERS, FLORISTS, FARM MANAGERS, COACHMEN, SUPERINTENDENTS OF COUNTRY ESTATES, PUBLIC AND OTHER INSTITUTIONS, MEN FOR GENERAL WORK ON COUNTRY PLACES, etc., will here find prompt, efficient and courteous service, while employers of such help can rest assured that only persons who have been deemed worthy of entry in our register will be recommended to them.

As no charge is made to either employer or employee for the services of Breck's Horticultural and Agricultural Registry, our desire being to improve the service in the general interest of our business, we solicit your hearty co-operation, and it cannot be better expressed than through a liberal use of the facilities we offer.

"VICTORY"

HEN compiling this catalog during the late summer and early fall of last year, we little thought that the end of the War was so near at hand, although we were sure, as were our young men at the front, that a favorable result was certain, eventually.

That the American farmer and American gardener were largely responsible for the happy outcome of the struggle, we do not think anyone will dispute.

The mighty momentum, increasing as the United States developed its forces of men, money, and provisions, broke the backbone of the foe long before its full weight was felt.

Again, as ever, agriculture proved the very foundation of success, for man cannot work or fight to the best advantage unless he is well fed.

Now, we are going through a reconstruction period. From the nature of things, however, there cannot be much change this spring in conditions surrounding the seed, fertilizer, and implement business, the supplies for which have to be provided for from one to three years in advance. We believe that seeds, generally speaking, are in fair supply, excepting peas, cabbage, cauliflower, clovers and some varieties of flower seed. Although stocks are coming in slowly, it is thought there will not be the delay in execution of orders that caused so much trouble during the past two years. It will be well, however, to get orders in early, for the demand is bound to be great, the value of the home garden having been fully established.

"Breck's Seeds are Best"

is a common saying among Farmers and Gardeners. It is the natural result of the conscientious work of four generations (father, són, grandson and great-grandsons) assisted by men especially trained in the business. In no line are knowledge and experience more necessary.

All seeds are tested in our laboratory and greenhouses and many varieties are field tested in our trial grounds at Lexington so that we KNOW what we are selling.

We solicit your favors and pledge ourselves to serve you faithfully and well.

CHARLES HENRY BRECK JOSEPH FRANCIS BRECK (Grandsons of Joseph Breck) C. HENRY BRECK BRACKETT (Great-Grandsons of Joseph Breck)

JOSEPH BRECK & SONS, Corporation.

BLOEMGAARD

YOU are cordially invited to visit "Bloemgaard," Marguerite Breck's Dutch Garden. The garden was originally planned to display new and rare varieties of Dutch Bulbs to the best advantage. The idea of it occurred to Mrs. Breck during her residence in Holland.

On her return to this country the grounds were attractively laid out on the border of a pond in our grounds and a thatched Dutch cottage was erected; the whole effect being really charming, as the season advanced and the different varieties came into blossom.

Shortly after the garden was opened to the public, war broke out; it practically cut off the supply of bulbs. Notwithstanding this and the difficulty of getting suitable labor, the garden was kept up with other plants and bulbs, notably gladioli, and tea was served in the cottage and under the trees.

It is expected that the garden will be maintained during the coming season, with the hope that by next fall conditions will have become normal so that the original plan can be carried out and Bloemgaard seen at its best the following spring. The garden is a delightful and restful place in a beautiful setting and you are welcome.

"Bloemgaard" is located on the grounds of the Breck-Robinson Nurserles, Lexington (Munroe Station), Mass., where letters or inquiries may be addressed. Telephone Lexington 260. It may be reached by motor over the Paul Revere route via Massachusetts Avenue, from Boston, through Cambridge. Trains from the North Station for Munroe Station, or any electric car connecting at Harvard Square stop at our entrance.

NOVELTIES AND SPECIALTIES FLOWER SEEDS AND BULBS

BRECK'S GLADIOLI

The past season's growth has resulted in as fine a stock of Lexington-grown bulbs as could be desired. Careful selection from year to year has eliminated varieties that have not proved themselves satisfactory both as to form and color, so that the following lists may be taken as a safe guide in choosing for the home garden. A cordial invitation is extended to our friends to visit our grounds at Lexington during the blooming season (August and September); to those not familiar with these wonderful flowers the striking combinations of color will be a revelation.

Gladioli will succeed in any sunny location; the soil should be reasonably rich, though any soil which will grow potatoes is suitable. The best time for planting is May or June, after the ground becomes warm. Take them up in the Fall after the tops turn brown, and store in a dry place, cool but free from frost.

Additional varieties listed in special catalog.

America. A most charming, soft, delicate pink, tinted lavender. 50c per doz.; \$3.50 per 100.

Annie Wigman. Light yellow slightly suffused with pink; patch of greenish yellow with lines of carmine. 50c per doz.

Attraction. Deep rich crimson, with beautiful white throat. 60c per doz.; \$4.00 per 100.

Augusta. Pure white, blue anthers. 50c per doz.; \$3.50 per 100.

Badenia. One of the most beautiful varieties in exist-ence. Was awarded certificates at both Haarlem and London and won a mcdal at Chicago. The flowers are very large, finely expanded and many open at one time; color a bcautiful true lavender-blue. \$1.25 each; \$12.00 doz.

Baron Hulot. The best blue variety, very large violet bluc. 85c per doz.; \$6.00 per 100.

Blue Jay. Blue lavender, splashed with white. \$3.00 per doz.

Brenchleyensis. Vermilion scarlet. 50c per doz.; \$3.00 per 100; \$25.00 pcr M.

Chicago White. Snow white, with stripe of carmine on lower petals. 75c per doz.; \$5.00 per 100.

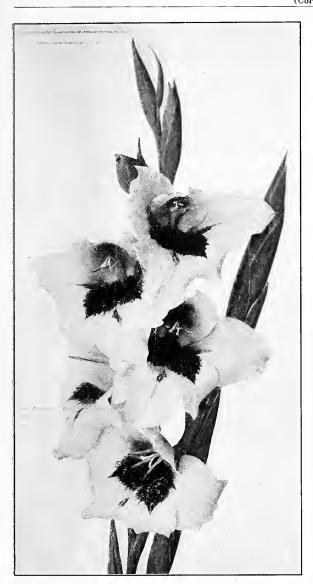

Comanche. Vivid scarlet, large spike, tall growing, early

flowering variety. \$1.00 per doz.; \$7.00 per 100. Cardinal King. Bright, cherry-red, of rich tone; large

flower. \$1.50 per doz; \$10.00 per 100. Clarice. Soft rose pink, flaked with a deeper tint; flowers large, four or five open at one time, spikes straight and strong. \$1.50 per doz.; \$10.00 per 100.

THE DOLLAR COLLECTION

This collection, which met with great favor last season, is not a mixture, but comprises two dozen blooming-size bulbs in four named varieties, sent prepaid to any address for twenty-five cents; choice mixed sent prepaid to any address in United States

Mrs. Frank Pendleton, Jr.

BRECK'S GLADIOLI—Continued

Daisy Rand. Soft rose pink, splashed with a darker tone, the lower petals have a blotch of buff. A most beautiful variety. 15c each; \$1.50 per doz.; \$10.00 per 100.

Dawn. A most beautiful shell pink, slightly pencilled in the throat, a great favorite as a cut flower. \$2.00 per doz.; \$15.00 per 100.

Dora Krais. Sulphur yellow; large blossom. \$2.00 per doz. Easter Bells. Sulphur yellow; lines of carmine. \$2.50 per doz.

Elizabeth Kurtz. Ivory white with pencillings of pink. \$1.50 per doz.

Empress of India. Dark maroon; white stripes on lower petals. Buds black. \$1.50 per doz.

Europa. Snowy white, the finest pure white variety yet offered. Awarded certificate of merit at London, Berlin and Paris. \$1.50 per doz.; \$10.00 per C.

Giant Lavender, or Mary Fennell. Deep lavender, shading to a paler tint, lower petals primrose yellow with penciling of lavender. \$2.00 per doz.; \$15.00 per 100. Glory of Holland. Glistening white. Blossoms large.

Stalk tall and strong. \$1.00 per doz.

Golden King. Golden yellow; patch of crimson. \$1.00 per doz.; \$7.00 per 100.

Gretchen Zang. Soft salmon pink shading to darker patch on lower petals. Blossoms large. Stalk tall. \$3.00 per doz.

Golden West. One of the best exhibition varieties on account of the variety of markings, the color being a clear orange scarlet, the lower petals striped and blotched with golden yellow faintly suffused with violet shadings. The individual flowers are of large size and seem to stand out boldly, making it very noticeable among any collection. 15c each; \$1.50 per doz.

Halley. Delicate salmon pink predominates with a slight rosy tint, the lower petals bear a creamy blotch with a stripe of red through the centre, the whole producing a delightful effect. 50c per doz.; \$3.00 per 100. Harvard. Rich velvety maroon of enormous size. \$1.50

per doz.; \$10.00 per 100.

Independence. Beautiful deep rosy pink, the petals are of a velvety texture and the vigor of the plant enables it to hold its color a long time. It is used extensively for design work. 50c per doz.; \$3.50 per 100.

Jessie Palmer. Pure snow white, relieved by a patch of glistening carmine, flowers of medium size and graceful form. 15c each; \$1.50 per doz.; \$10.00 per 100.

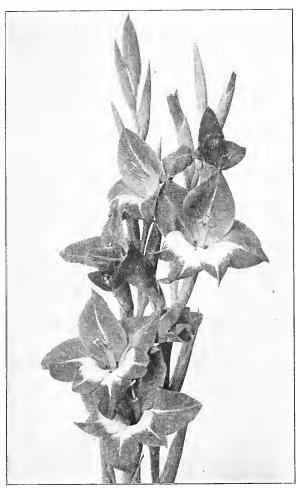

Lily Lehmann. Glistening white of graceful habit, free blooming. \$1.00 per doz.; \$12.00 per 100.

Loveliness. Rich creamy white suffused with soft rose pink; lower petals pale yellow, lines of carmine. One of the finest. \$2.00 per doz.

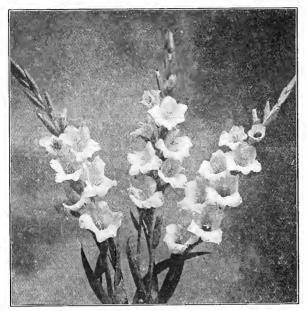

May. White, flaked crimson, a very useful variety. 60c

per doz.; \$4.00 per 100.

Mrs. Francis King (The Original). A most beautiful flame pink; immense flowers on a spike, growing 4 feet high, with from 18 to 20 flowers, 6 to 8 open at one time. One of the finest varieties in cultivation. 60c per doz.; \$3.50 per 100.

Princeps

Rose Bud

Mrs. G. W. Moulton. Rich crimson; faint tracings on lower petals. \$2.00 per doz.

Mrs. Dr. Norton. Soft rose pink; lower petal lemon yellow with stipplings of carmine. Exceptionally beautiful. \$18.00 per doz.

Mrs. Frank Pendleton, Jr. A most beautiful variety, producing large, well expanded flowers of an exquisite shade of salmon pink, heavily hlotched with red in the throat. This variety should be in the garden of all lovers of Gladiolus. 10c each; \$1.00 per doz.; \$7.50 per 100.

Mrs. Malcolm Mackay. Cherry red with a patch of white on the lower petals; very effective and excellent for cutting. 20c each; \$2.00 per doz.; \$12.00 per 100.

Mrs. Watt. Beautiful brilliant wine color. One shade; nice large spikes of well opened flowers; lasting a long time when cut; an excellent variety for decoration purposes. \$1.00 per doz.; \$7.50 per 100.

Myrtle. Exquisite soft tone of apple-blossom pink; throat white. Silver Medal by Massachusetts Horticultural Society. \$2.50 per doz.

Navajo. Magnificent bright rich red, hlossoms large, six or eight opening at one time, spikes straight and tall and of vigorous growth. \$1.50 per doz.; \$10.00 per 100.

Negerfurst Dark blood-red, slightly flaked black; an improved Cracker-Jack. A very odd, beautiful color, with long, graceful and robust spikes. One of the choicest dark varieties. \$2.00 per doz.; \$15.00 per 100.

Niagara. Color cream, blending at hase of petal to a canary yellow, stamens are purple and the stigma pale carmine. \$1.00 per doz.; \$7.50 per 100.

Panama (Seedling of America). Long spike, color deeper pink than America, admired by all who have seen it in flower. 75c per doz.; \$5.00 per 100.

Peace. Beautiful large pure white, tinted with lilac. \$1.00 per doz.; \$7.50 per 100.

Pink Beauty. Beautiful rose pink, very early bloomer. 50c per doz.; \$3.00 per 100.

Pink Perfection. Large blooms, fine form, long spikes. Color, apple blossom pink. A very lovely, soft shade. Altogether one of the most popular varieties. 85c per doz.; \$6.00 per 100.

Premiere. Creamy white suffused with soft crimson, the lower petals bear a crimson blotch, very early bloomer. 50c per doz.; \$3.00 per 100.

Primulinus Hybrids. Seedlings of delicate form and coloring, slender and graceful in growth. Their colors range from pale yellow to light scarlet. 60c per doz.; \$4.00 per 100.

Princeps. Immense wide open flowers of a bright scarlet, marked with white on lower portions which intensifies the brilliant color. 85c per doz.; \$6.00 per 100.

Schwaben. Canary yellow shading to sulphur; stripes of carmine on lower petals. Blossoms large. Stalk tall and straight. \$2.00 per doz.; \$15.00 per 100.

Shakespeare. White with pale rose, good forcing variety. \$1.50 per doz.; \$10.00 per 100.

Spring Song. Pale primrose yellow, suffused with soft pink. The lower petals with blotch of canary yellow. One of the most beautiful of the new varieties. 10c each; \$1.50 per doz.; \$10.00 per 100.

Sulphur King. The finest yellow variety, color clear sulphur yellow, long spike and flowers well arranged.

\$3.50 per doz.; \$25.00 per 100.

Summer Beauty. Soft salmon pink; patch of lemon yellow pencilled with carmine. A fine sort. \$2.00 per doz.

The King. Rich mauve lilac. Very showy. 60c per doz.

Wm. Falconer. Has a spike of great length and large

clear pink flowers. \$1.50 per doz.; \$10.00 per 100. Willy Wigman. (First-class certificate.) Creamy white, scarlet blotched, extra large bloom. 10c each; \$1.00 per

MIXTURES

Breck's Exhibition Mixture. A superb collection, giving a wide range of color of wide open flowers, beautifully marked and including many of the named varieties. Especially selected as to combination and blending of colors, so that they may be used for cut flowers as well as for massing. 50c per doz.; \$3.50 per 100.

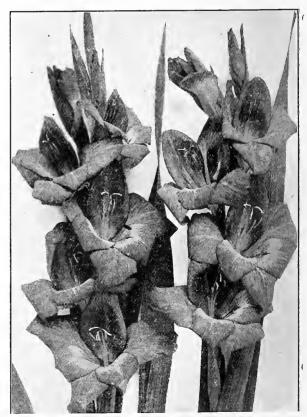

Breck's Garden Mixture. A good mixture containing almost every shade known in the Gladioli family. 30c

per doz.; \$2.00 per 100.

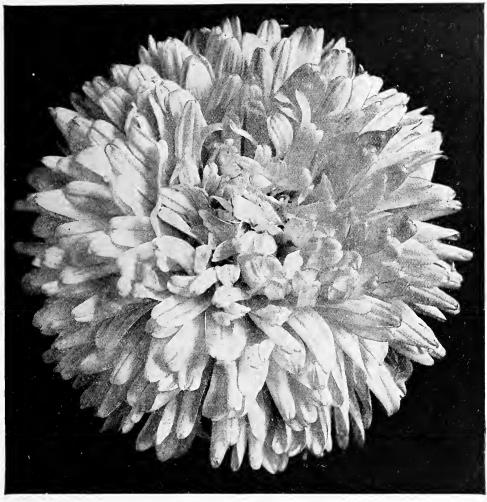

Groff's Hybrids. A splendid mixture, flowers of large size, and vigorous growth. 50c per doz.; \$3.50 per 100.

CUT FLOWERS

During the season at prevailing market prices.

Baron Jos. Hulot

Aster "New Rochester."

Aster "Vick's Perfection"

This is a great improvement on the mid-season varieties, flowers are exquisite in form and the plants are extremely vigorous with unusually broad dark green leaves and stout stems. They carry about twelve large double flowers on long stems free from side branches. When they are in full bloom the flower is strongly whorled with the outer row of petals straight; producing a charming effect.

340. Shell Pink. 341. Lavender. 342. Rose. 343. Crimson. 344. Purple. 345. White. Per pkt., 20c; 2 pkts. 35c.

Aster "Autumn Glory"

346. Color pure shell pink and similar to Semples pink, except that it has a better and more substantial flower. The plant itself is larger and stronger than the Semples variety. Autumn Glory will bloom after other late Asters and before the early Chrysanthemums are ready. 20 cts. pkt.; 2 pkts., 35 ets.

Aster "New Rochester"

The new varieties of this type are more double and more Chrysanthemum-like than those of the original Lavender Pink Rochester. The long narrow petals fall over one another in a charming cascade of color, forming a wonderful shaggy mass that cannot be equalled for richness of effect.

347. Lavender Rochester. A beautiful shade of clear light lavender. Pkt. 20 cts. 2 Pkts. 35 cts.

348. Purple Rochester. Rich shade of deep purple. Pkt. 20 cts. 2 Pkts. 35 cents.

349. Shell Pink Rochester. A beautiful shade. Pkt. 25 ets. 2 Pkts. 40 ets.

Aster, "Heart of France"

The finest pure red Aster yet introduced. Opens red and deepens with age and retains its beauty to the end. Beautiful in artificial or natural light. Large, full flowers of the branching type and robust habit. The plants bloom early and continue late. 25c per pkt.

Aster "New Triumph Comet"

A magnificent new class of mid-season Asters with extra long stems and large fluffy full double flowers of the finest type. The introducer considers this variety a very great improvement on the Astermum both in size and quality

364. Pure White. 365. Shell Pink. 366. Lavender Pink. 367. Lavender. 368. Rose. 369. Purple. Per Pkt. 15 cts., 2 Pkts. 25 ets.

Vick's King Asters

This magnificent class of Asters is distinct from all others in the character of the flowers. The long, narrow petals are folded lengthwise, appearing almost as though quilled. The flowers are of great size and substance, and last longer when cut than any other class; blooming with our Late Branching, they make a very desirable addition.

		Pkt.	1/4 oz.
430.	Crimson King, dark rich crimson	15c.	\$1.00
431.	Lavender King, deep lavender	15c.	1.00
432.	Pink King, beautiful lavender pink	15c.	1.00
433.	Rose King, brilliant deep rose	10c.	.50
434.	Violet King, rich violet purple	15c.	.75
435.	White King, pure white	15c.	1.00

Aquilegia Spurless or Anemone-Flowered

199. This is a novelty of great merit, especially in the perennial class; it is perfectly hardy and will blossom by Memorial Day. The color is a beautiful light blue. Per pkt. 50 cts.

Aquilegia, Erskine Park Hybrids

219. This strain of Aquilegia originated at Erskine Park, Lenox, Mass., U. S. A., being the result of hybridizing the finest European and American varieties. Seeds sown in greenhouse during February and March will flower the first season, but for best results sow during July and plant in permanent position in the fall. Colors are blue, lavender, mauve, white, yellow, scarlet and pink. Pkt. 15 ets., 4 pkts. 50 cts., ¼ oz. \$1.00.

Calendula, Breck's New Giant Orange

558. This is a very choice strain, grown specially for us. It is quite distinct from any other variety. The eolor is a very deep orange. The flowers are extra large and are borne on good stout stems. Per pkt, 25 cts.

Cosmos Giant Blush Queen

862. A very large flowered and early variety of quite a new type. The color is a beautiful blush, flaked with a rosy lilac tint, deepening towards the center. The height of the plant is 3 to 4 feet, and the large graceful flowers, borne on long stems, make it an excellent variety for cutting. It is very free flowering. Pkt. 25 cts.

Cyclamen Eileen Low

971. A lovely shade of pink (Rose du Barri), a tone of color which so appeals to those of most æsthetic taste; but the great attraction lies in the distinct blush-white margin and blush-white crest on each petal which, on account of the great contrast, gives an attractiveness found in no other Cyclamen. Price 50 cts. per pkg.

Cyclamen Cherry Ripe (New Bright Red)

972. The brighest red Cyclamen in cultivation, of the most free flowering habit. 50 cts. pkg.

Cyclamen Pink Pearl

973. A very free flowering variety. Lovely pale salmon flowers foliage hard and tesselated, a delightful color either by day or artificial light. One of the finest in eultivation. 50 cts. pkg.

> Cyclamen St. George The Silver Leaf Cyclamen

974. A variety with marbled foliage. The flowers are of a pale salmon pink, which contrast well with the foliage. 50 cts. per pkg.

> Delphinium, Erskine Park Hybrids

995. These beautiful hybrids originated at Erskine Park, Lenox, Mass., U. S. A., and are the result of erossing the finest varieties of Formosum and Nudicaule, saving seed only from the largest and finest flowers. They are a very early flowering variety and will produce some flowers during fall. In color, they are all the finest delicate shades of blue, in habit very strong and vigorous, and perfectly hardy. Will flower very satisfactorily the first year if sown in greenhouse in March, but will produce finest flowers second year. Seed may be sown in summer out of doors, planting in permanent position in fall. Pkt. 25 cts., 5 pkts. \$1.00, ¼ oz. \$1.50.

Gypsophila Paniculata Fl. Pl.

1390. Seeds offered of this variety produce about 70% double flowering plants, and if the same are sown in January or February, and the seedling transplanted about the middle of April a bright display of bloom can be expected in Autumn. Of course, the effect of an immense quantity of white will be obtained the next year. This is a rare addition to the hardy Perennial and is highly reeommended. Pkt. 25 cts.

Delphinium Azure Fairy

Delphinium "Azure Fairy"
998. This is a variety which is the result of several years of eareful selection; will be found a useful addition to the annual class of plants. The plants grow to a height of about 12 inches, and are covered with a profusion of Cambridge Blue flowers, which resemble the variety blue Butterfly in habit. Pkt. 25 cts.

Dimorphotheca Aurantiaca Hybrida Fl. Pl.

1109. This is a semi-double and double flowering variety. The colorings of this new variety are rich and varied, those of the single sorts ranging from white to light and dark yellow, and from rose to orange, producing about 60% double flowers. Pkt. 25 cts.

Gaillardia Breck's Exhibition Strain

1252. This is an exceedingly showy, effective strain of perennial Gaillardia, producing large handsome flowers of various colors, including clear golden yellow, brilliant crimson, edged gold, and others banded with gold. Pkt. 25 cts.

Hibiscus Grandiflorus Sunset

1482. A beautiful greenhouse plant; flower very large, pale yellow, black centre. Flowers 6 inches aeross. Pkt. 15 cts., oz. \$1.25.

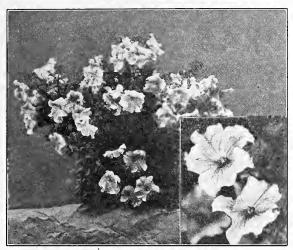

Hibiscus

New Giant Flowering Marshmallow

1483. A greatly improved form of marshmallow or rosemallow. The flowers are of enormous size, sometimes measuring 12 inches in diameter. The colors comprise rich dark red, soft mallow pink and pure white. The plants grow from 5 to 8 feet high and bloom from early July until late Autumn. They are perfectly hardy. If seed is sown early the plants will hlossom the first year. Pkt. 15 cts.

Lavatera "Splendens Sunset"

1614. For some years a well known firm of seed growers in England has been working to improve the Mallows and Lavatera. They have succeeded in introducing several very beautiful varieties. We consider Lavatera Sunset the best of the lot, the plant growing to a height of from 2 to 21/2 feet. An annual; flowers deep rosy crimson, making a most compact and effective bedding plant; also used by many as a cut flower, holding its color and form well for some time after cutting. A great favorite with all flower lovers. Pkt. 25 cts.

Petunia, Erskine Park Belle

Lychnis Arkwrightii

1709. A cross between Lychnis Chalcedonica and Haageana, resulting in something different and better than either parent. Has the upright habit of the former with the flower form of the latter, but greatly improved. Height, 2 to 3 feet, requires no staking; covered with bloom of rich effective colors. Will flower first season if sown early; second year attains perfection. As a summer bedding plant it is admirably adapted and will soon command a leading place. Pkt. 25 cts.

Mignonette Breck's Pride of the Market

1991. This year we have secured what we believe is the best strain of forcing Mignonette ever developed. The seed we offer is grown under glass, and will produce enormous spikes of reddish-green, deliciously fragrant flowers. Pkt. 50 cts.

New Morning Glory Double Snow Fairy

904. This is a magnificent and unique flower. It grows as vigorously as the other varieties. It begins to bloom early and continues freely until frost. The flowers appear like large snow white tassels. Upon examination, however, it will be seen that there is a well formed single white morning glory in the centre, which is completely surrounded by numerous white petals, the whole forming a most unique and beautiful tassel-like blossom. Pkt. 15 cts., \$1.00 oz.

Pansy—Breck's Giant Matchless

3241. An excellent exhibition strain. Flowers are very large, of great substance with a wide range of the richest colors. A variety unsurpassed for frame culture and does equally as well out doors. Pkt. \$1.00.

Pansy-New Early Giant Flowering

(World's Record)

These new Pansies we consider the finest strains yet offered. Sown at the same time as other Pansies they begin to flower five weeks earlier. They are extremely hardy. The blooms are of the finest form and attain a size and brilliancy of color such as we only see in the finest productions of Pansies.

3242. Ice King. Silver white, dark blue eye. Pkt. 25 cts.

3244. Celestial Queen. True heavenly blue. Pkt. 25 cts.

3246. March Beauty. Velvety blue. Pkt. 25 cts. 3248. Winter Sun. Golden yellow, dark eye. Pkt.

25 cts. 3249. World's Record. Choice mixture. Pkt. 25 cts.

Breck's Pentstemon Giant Hybrids

2304. Seeds saved from the largest flowers. Having a wide range of bright colors including rose, pink, lavender, crimson, purple, etc., seeds sown in heat in January or February will bloom the same year. 50 cts. per pkg.

Petunia, Erskine Park Belle

2326. This is a remarkably pretty Petunia. Color, deep rose pink. Large flowers, slightly frilled. An excellent variety for bedding or borders. It will blossom the whole summer if seed pods are removed. 25 cts. per pkg., 5 pks. for \$1.00.

Petunia Velvety Violet Blue (True)

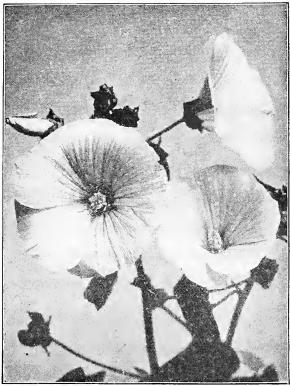

2327. This is a great acquisition to the Petunia family and should be grown by all lovers of flowers. It is extensively used in Europe for window boxes. This seed is especially grown for us and is true to name and color. It grows about 1 foot high. Pkt. 50 cts.

Primula Fimbriata Giant Mauve Queen

2483. Delicate Mauve, the edge of the petals slightly deeper, with rich green foliage and red stems. The eye of the flower is a greenish yellow, well defined. A strong grower and very free flowering. Pkt. 50 cts.

Primula Malacoides New Dwarf

2488. A great acquisition to the Malacoides family, making a very fine pot plant, densely flowered, the individual whorls of flowers in many plants being so close together as almost to resemble a spike of stock; yet not too compact. Color, purplish red, with deep orange eye which shows up distinctly. Awarded certificate of honorable mention by the Massachusetts Horticultural Society, spring of 1917. 50 cts. per pkg.

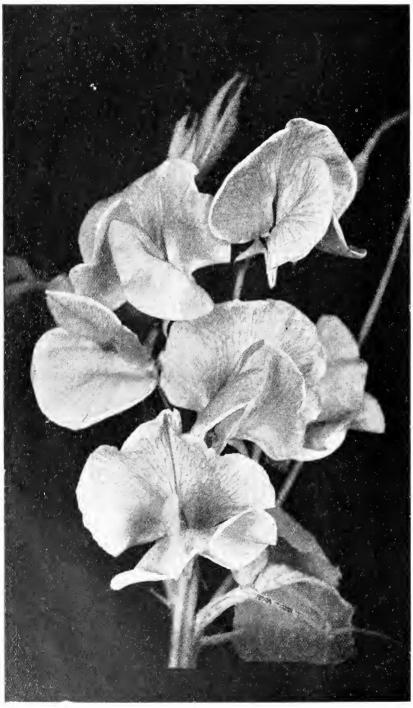

Lavatera "Splendeus Sunset"

SWEET PEAS

New Early Flowering Long Season Spencers

The following new varieties of Sweet Peas begin to blossom 106 days after planting the seed in the open ground; six weeks earlier than the late flowering varieties planted at the same time. They usually blossom for four full months.

Experimental de la company de la company

Morning Star

4070. Early Spring Maid. The color is a light pink on cream ground and the blossoms have the same splendid characteristics as "Mrs. Hugh Dickson" for a florist's flower. It is a most effective flower, and like the other Early Flowering Spencers now being offered it carries a great wealth of blossoms borne in fours on long stems......25c, per pkt.

4071. Early Melody. This is a deeper shade of pink than Early Song Bird, on white ground, closely resembling Countess Spencer. It is very free flowering and sure to be a favorite25c. per pkt.

4072. Early Morning Star. The color is a deep orange-scarlet or flame color in standard, with rich orange-pink wings. It does not burn badly out in the open and under glass is magnificent. The flowers are large and of the best Spencer form, and borne in threes and fours in wonderful pro-

Spencer. The placing of the flower is splendid for packing and they are borne on long stems in threes and fours. We think this will be the leading pale pink for florists. 25c. per pkt.

4074. Early Snow-Flake. This is the best Early Flowering white-seeded White Spencer we have seen. The blossoms are very large and of the best-waved Spencer form. The flowers are borne in wonderful profusion on long stems. As a market variety it

will be in great demand. 25c. per pkt. 4075. Early Heather Bell. This will be one of the most popular shades with all florists, as it will be so useful for making up for any occasion. The flowers are very large on long, stout stems. The color is a rich but pleasing mauve. After standing in water the color becomes a beautiful mauve lavender......25c. per pkt.

4076. Blanche Ferry Spencer. Extra early, pink and white, a select strain of this variety. 25c. pkt., or 5 pkts. for \$1.00.

4077. Mrs. A. A. Skach. A beautiful, clear light pink. 25c. pkt., or 5 pkts. for \$1.00.

4078. Mrs. M. M. Spanolin. Very large, pure white. 25c. pkt., or 5 pkts. for \$1.00.

4079. Yarrawa. Bright rose with light wings. (The new pink Australian variety which is a great favorite with all who grow it.) 25c. pkt., or 5 pkts.

Statice Suworowii Alba

2794. Pure white. New annual variety, dwarf and compact long, graceful sprays. 25c. pkt., 5 pkts. for \$1.00.

Statice Suworowii Rose

. 2795. Bright rose, very handsome, annual. 25c. pkt., 5 pkts. for \$1.00.

Zinnia, "Achievement"

ELEGANS ROBUSTA GRANDIFLORA

3595. The raising of this beautiful new Zinnia is undoubtedly an "achievement" in the field of horticultural endeavor. It is distinct from all other Zinnias hitherto raised by the shape of its petals, which are partially tubular at the base and expand in a cactus-like form towards the tip, thereby displaying a rich variety of color, mostly of the warmer shades, such as rose, salmon, and lilac, scarlet, and coppery golden yellow. On the reverse side the petals are of a lilac tint, varying from light to dark, and by their singular contour they produce in the flower a rare and beautiful combination of color never before seen amongst Zinnias. 25 cts. pkt., 5 pkts. for \$1.00.

Schizanthus Bridal Veil

2734. Grows about 16 inches high and very compactly formed; is entirely covered with glistening snowy white flowers, which present a striking contrast to the bright green laciniated foliage. As potted plants these cannot be over-estimated, and will surely please the growers with their handsome appearance. Pkt. 25 cts.

Stock, Lenox Giant Double

An extremely fine strain of Stock, greenhouse saved seed, grown in Lenox, Mass. Pink, 25 cts. pkt., \$1.00 % oz. Purple, 25 cts. pkt., \$1.00 % oz. White, 25 cts. pkt., \$1.00 % oz.

Stock, Queen Alexandra Pink

A beautiful shade of clear, bright pink, grown specially for us by a private gardener. 25 cts. pkt., \$1.00 \(\frac{1}{2} \) oz.

Stock, Empress Augusta Victoria Giant Pyramidal

Delicate silvery lilac flowers of great substance. Plants of true pyramidal growth, attaining a height of 24 inches. % oz. \$1.50; 25c pkt.

Streptocarpus Breck's New Giant Mixture

2929. This strain is specially saved for us in England. Without doubt one of the finest strains of this beautiful plant ever sent out, including the charming varieties raised and shown by Mr. Edwin Beckett, and a fine selection of some of the best hybrids raised from Messrs. Veitch's strain, embracing the newer and rarer shades of red and the clear throated varieties. Pkt. 50 cts.

Sunflower Miniature Golden Fleece

1425. The cactus shaped flowers are of a clear golden yellow, with a dark centre, long stems, excellent for cutting. The height of the plant is 3 to 3½ ft. Pkt. 25 cts.

Sweet William Breck's Choice Mixture

This is a choice selection of the finest doubles, singles and fringed seed saved from the very best plants. Some of the flowers are as large as a rambler rose. The colors are beautiful. Price 15c pkt.; \$1.00 oz.

Tithonia Speciosa Vermilion (Heliantha Speciosa)

2999. A fine plant for the border or massed effects, flowering continuously for a long period. Flowers Vermilion, about 5 inches in diameter, under petals bright yellow. Pkt., 25 cts.

Verbena Hybrida, Compacta Salmon Queen

3198. After careful experiments we have at last been successful in raising this strikingly beautiful novelty. The plant is dwarf and compact and literally smothered with salmon-colored flowers. For borders and low groups, this variety is unsurpassed. Pkt., 25 cts.

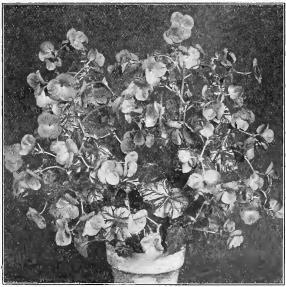

Verbena Grandiflora, Helen Willmott

3199. This variety of Verbena is without doubt the very finest under cultivation and is unequalled for bedding. The flowers are very large and the color is a beautiful bright salmon rose with white eye. Pkt. 25 cts.

Begonias, Winter Flowering

For the greenhouse or conservatory they are unsurpassed in brilliancy of color and effect. The demand for these beautiful plants is greater every year. All who have seen them cannot help but admire them. We have been successful this year in having our plants grown for us locally which we consider a great advantage to having to import them from England in a dormant state. We will have nice strong plants in 3 inch pots ready for delivery about May 1st. Price \$1.25 each.

NOVELTIES AND VEGETABLE SEEDS

OF SPECIAL MERIT

DE LUE'S GOLDEN GIANT SWEET CORN

(GROWN FOR JOSEPH BRECK & SONS BY ELLIOTT C. ROGERS.)

In sealed packages containing sufficient seed for 20 hills or 50 feet of drill. 50c pkg. Postpaid. GOLDEN GIANT, the most desirable sweet corn on the market today. Awarded a Silver Medal by the Massachusetts Horticultural Society. Golden Giant is the result of eleven years' selection by Dr. F. S. DeLue, Boston, Mass., from the product of Howling Mob crossed with Golden Bantam. Golden Giant, with its 12 to 16 rowed ears and deep golden yellow kernels, gives nearly four times the yield per acre that the Golden Bantam does with its smaller 8 rowed ears. The stalks of Golden Giant are short, sturdy, and frequently produce two ears. Repeated tests have demonstrated that from 48 to 54 ears fill a bushel box. Market gardeners have secured during the season of 1918 marketable corn in 65 days and a premium of 50c bushel box on the Boston Market over price secured for other yellow varieties. Corn offered this year has been carefully grown in eastern Massachusetts; given the most expert care throughout the season. The result has been a limited crop of excellent quality, high germination, now ready for immediate distribution in sealed packages at 50 CENTS EACH POSTPAID, containing sufficient corn for 20 HILLS or 50 FEET of drill. We believe the results obtained from Golden Giant will be most appreciated by reading the following reports sent us by farmers and gardeners who planted the corn during the seasons of 1917 and 1918.

SUNSET HILL FARM Annisquam, Massachusetts

Aug. 29, 1918.

JOSEPH BRECK & SONS, CORP., Boston, Mass.

Gentlemen:—You may be interested to know how the GOLDEN GIANT SWEET CORN that I purchased of you is coming on. The corn was planted June first in hills 3 x 3 feet apart. The best fertilization and cultivation has been given it and a perfect stand has resulted. The stalks are eared out well; a great many of them have two large marketable ears. You of course are familiar with the size of the ear, but I think it may be safely said that even the medium sized ears are at least twice the size of the Golden Bantam and the quality equally as good. The present crop is at this date ready for the first picking.

For the market gardeners this corn will be of great value inasmuch as four dozen of the good sized ears

will fill a bushel box.

The field was inspected this week by County Agricultural Agent Gaskill of Essex County and he pronounced it a beautiful stand of corn. He was especially interested in the size of the ears. We discussed fully the growing of this corn by market gardeners and both agreed that it would be a very valuable addition to their crops. Mr. Gaskill has very kindly agreed to assist me in the selection of seed for next year's crop.

Yours very truly,

ELLIOTT C. ROGERS,

Former Emergency District Administration Agent and Asst. Agent at large for Essex and Middlesex Counties for the U. S. Dept. of Agriculture and Mass. Agric. College.

DE LUE'S GOLDEN GIANT

Selecting the 1918 crop of GOLDEN GIANT SWEET CORN

Two ears to the stalk, showing large ears and small stalk

Equitable Bldg., Boston, Mass.

January 11, 1919.

Joseph Breck & Sons, Corp., Boston, Massachusetts.

Gentlemen: Since boyhood I have experimented with sweet corn, breeding, crossing and inbreeding; hence I recognized at once the superior merits of DE LUE'S GOLDEN GIANT. Starting with a small purchase from you I have for several years raised Golden Giant and will this year plant two acres. I find that it not only breeds true to type, but that it almost uniformly has two ears to the stalk that are triple the size and as sweet as Golden Bantam. It responds excellently to fertilization; does not run to excessive, soft, pulpy cobs with loose irregular kernels. I obtained the additional seed just purchased for two reasons; first, to prevent the too close inbreeding of my own seed, and second, and more important, the seed you have this year is even better and more promising than that which you at first offered.

BANCROFT ABBOT.

Dr. S. A. Saunderson Grand Forks, N. Dak.

Sept. 17, 1917.

Joseph Breck & Sons, Boston, Mass.

Gentlemen: We are highly pleased with the GOLDEN GIANT SWEET CORN. The summer was very unfayorable to corn production, cold and dry at the beginning of the season, frost every month but July; but even so there were some results and we've had several helpings from our one hundred kernels of GOLDEN GIANT; and there were some fine big ears, one, seven and one-half inches around and one nine and one-half inches long that we measured just at random. There is no discount on the quality either, we think it is great. Hope we will have some sced for next year.

MRS. S. A. SAUNDERSON.

Dr. Geo. A. Wyeth
59 West 54th Street, New York City, N. Y.
Aug. 29, 1917.

Joseph Breck & Sons, 51 North Market St., Boston, Mass. Gentlemen: It gives me great pleasure to tell you that the corn supplied by you has been a great success.

Sincerely yours,

DR. GEO. A. WYETH.

"GOLDEN GIANT is doing finely. Some of the stalks have three ears and most of them two ears. It seems to be as early as the Yellow Bantam and as sweet and tender."—Henderson, Colorado.

"The corn is fine. Never ate any better."—Pioneer, Ohio.

"The corn is more than satisfactory to me."—Danville, Ill.

"The corn has been a great success."-New York, N. Y.

"The best ever; much superior to Golden Bantam."
Muncie, Ind.

"Remarkably good quality—very sweet."—Canajoharie, N. Y.

"The GOLDEN GIANT proved very satisfactory."—Springfield, Ohio.

"What we did have was very fine and encourages us to make another try."—Sewanee, Tenn.

"Ears are well formed, quite large, and the variety very promising."—Rupert, Idaho.

"A genuine acquisition and it is a crackerjack."—Ulmer, Iowa.

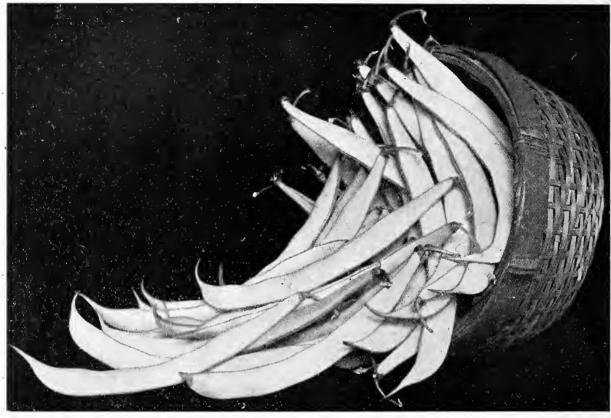

"We were very much pleased."-Buena Vista, Va.

"The results have been very satisfactory. Your corn produces larger ears, is a first-class product."—Taylors-ville, Ill.

BRECK'S FORCING WHITE SPINE CUCUMBER (BELLEVILLE STRAIN)

This Cucumber came originally from a cross of the English Forcing variety Telegraph and a good strain of hothouse White Spine resulting in a much better Cucumber for length and color than the common forcing stock. The Spine markings are very distinct. The vines are of strong, vigorous growth, bearing a quantity of Cucumbers of uniform size and of fine color. We have our seed grown for us by Messrs. Belleville & Waite, South Chelmsford, Mass., from selected cucumbers. Price, 50c pkg.; \$2.50 oz.; \$6.00 ½ 1b.

(Corporation)

Breck's Crackerjack Wax Bush Bean

BRECK'S CRACKERJACK WAX BUSH BEAN

An extra early, hardy and prolific variety. Very popular with the market gardener in southern New England, also in the middle West, where in some sections it has taken the place of Wardwell's Wax. It resembles Wardwell's Wax but the bean pods are rounder and more fleshy, color bright golden yellow. An excellent bean and highly recommended by all those who have given it a good trial. Pkt., 25 cts. postpaid. Per lb., 40 cts.; 2 lbs., 75 cts.; 8 lbs., \$2.50.

MASTERPIECE STRINGLESS BUSH BEAN

An extremely prolific, quick-growing variety. The plants are unusually strong and bear long, straight, fleshy pods which are tender and delicious as well as handsome. A fine variety for exhibition and for those who demand quality. Sold only in 4 oz. sealed packages at 50 cts. each, postpaid.

SUPERLATIVE BUSH BEAN

A truly remarkable dwarf stringless bean of French origin which is thoroughly acclimated in New England. It is a heavy cropper, fine for the open ground or for forcing. That the plants are robust and long standing is easily seen because their foliage remains green when ordinary varieties planted at the same time are all done. Second to none in quality or flavor, the pods are exceedingly large and long. Sold only in 4 oz. sealed packages at 50 cts. each, postpaid.

NEW ITALIAN POLE BEAN

Introduced by our Italian gardeners. A green podded, pole string bean, slightly streaked with purple. An enormous and continuous cropper. Beans of excellent flavor and quality, absolutely stringless, remaining in good condition on the poles ten days or more. We have selected a few of the most promising varieties from a large number. Price per packet, 50 cts. postpaid. Seed sufficient for twelve poles.

BRECK'S EASY BLANCHING CELERY

A variety very popular in the South and Southwest. Will bleach as quickly as White Plume or Golden Self Blanching. Almost blight proof, quality excellent, fairly good winter variety if stored quite green. Price, 10 cts. pkg.; 75 cts. oz.; 1/4 lb., \$2.50.

Breck's Market Garden Danver's Half-Long Carrot

Our market garden seed is the choicest stock from a most carefully developed strain of this popular variety. The rich, deep orange roots, averaging from six to eight inches in length, taper gradually to a blunt point and are exceptionally smooth and handsome; their crisp, tender flesh is of fine flavor. Being of medium length, the roots are easy to dig. This variety adapts itself readily to all types of soil and is enormously productive.

Pkt. 10 cts., oz. 40 cts., 1/4 lb. \$1.25, lb. \$4.00

Copenhagen Market Cabbage

The only large, round-headed Cabbage which is really early; it matures positively as soon as Charleston Wakefield. The short-stemmed, compact, yet vigorous plants, have few outer leaves and may be grown close together, insuring very large yields. Heads of this variety are unusually solid, often weighing ten pounds each; they mature all at the same time and are of excellent quality. Commercial and private growers alike agree that in its class Copenhagen Market Cabbage is supreme.

Pkt. 15 cts., ½ oz. 60 cts., 1 oz. \$1.00, ¼ lb. \$3.75

Honey Dew Musk Melon

A large, light-colored, smooth-skinned melon having a rather unusual shape and appearance. The fruits often weigh from 8 to 10 lbs. each and have a thick, light green flesh. Delicious honey-like flavor.

Pkt. 10 cts., oz. 50 cts., 1/4 lb. \$1.50

Breck's Balshire Tomato

This variety resulted from crossing Balch's Fillbasket and Lister's Prolific. It is far superior to the latter parent in that it is a heavier cropper, of better shape, and shows less tendency to crack. In a recent trial under glass some of the plants carried at least 40 lbs. of fruit. We recommend it strongly either for forcing or for out-door culture.

Pkt. 25 cts.

Lister's Prolific Tomato

A variety of recent introduction and now very popular about Boston especially where a medium size tomato is desired. The color is rich scarlet, tomato is medium size, solid, fruit borne in large clusters.

Pkt. 25 cts. Per oz. 60 cts.

Hubert's Marvel Tomato

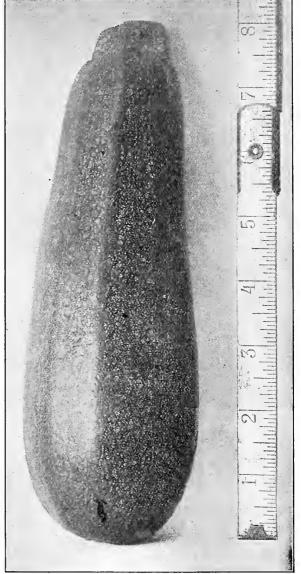

Fruit medium size, almost round, solid, borne in clusters, of English introduction, recommended for either forcing under glass or outdoor cultivation.

Pkt. 15 cts. Per oz. 60 cts.

John Baer Tomato

A most profitable variety for the market gardener. It has been grown in New England for several years with great success and profit. The fruit of the John Baer is nearly round, color, clear scarlet and of large size for an early tomato, flesh smooth and firm. Fruit stands shipping well. The vines are hardy, productive and continue to bear fruit for a long period.

Pkt. 15 cts., oz. 60 cts., 1/4 lb. \$1.50

Boston Greek Squash

Boston Greek Squash

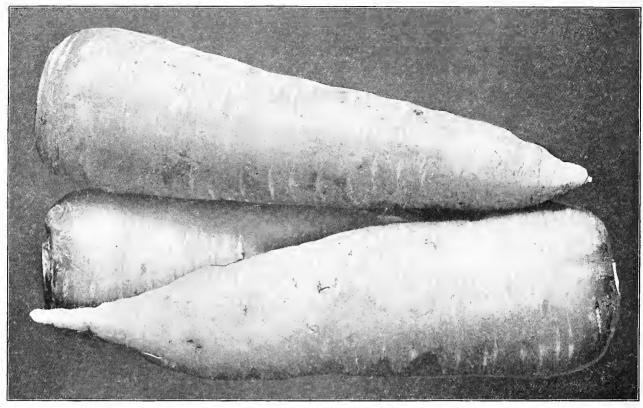

A very desirable summer Bush Squash introduced by our friends from Southern Europe. The fruits are oblong and average about 12 in. in length; color dark green, often striped or mottled with lighter green or yellow. They may be prepared for the table in the same way as any Summer Squash, but are most delicious and palatable when sliced and fried like Egg Plant. Picked when about 8 in. in length and cooked as described above, the Greeks and Italians esteem it a great delicacy. The best size for the Boston market is a squash 7 or 8 in. long.

Pkt. 10 cts. oz. 75 cts., 1/4 lb. \$2.50

Blue Hubbard Squash

A popular winter squash, hard shell, medium size, thick meat, dry, excellent quality. One of the best winter squashes. Our stock grown from selected squashes, in Eastern Massachusetts.

Pkt. 15 cts., oz. 40 cts., 1/4 lb. \$1.50

BRECK'S MARKET GARDEN DANVERS HALF LONG CARROT (For description see page 17)

BRECK'S MONDAMIN CORN

This is a variety particularly adapted to New England conditions, since it will ripen in an average season within 100 days after planting. Although we have offered Breck's Mondamin Corn for some ten years, the demand for seed far exceeds the supply.

Breck's Mondamin is an eight-rowed yellow flint Corn. The kernels are large, and the ears, many of which reach a length of 15 inches, are filled to the very tips. The stalks are firm and solid, averaging about nine feet in height. It has been definitely established that this Corn, which produces 18 to 20 tons of fodder per acre, yields greater food value than some of the mammoth dent varieties which produce 25 to 28 tons per acre. This greater concentration of nutriment is an important factor in maintaining the efficiency of the silo. Our stock has been grown from selected ears, in Massachusetts, about thirty miles north of Boston.

Qt., 25 cts.; pk., \$1.75; bu., \$6.00.

PILOT PEA

An extra early, round-seeded or smooth Pea. Can be planted as soon as ground can be worked. Pods as large as the Gradus, very prolific, highly recommended as an extra early market sort.

Pkt., 15 cts.; 1 lb., 35 cts.; 2 lbs., 65 cts.; 8 lbs., \$4.00.

PIONEER PEA

An improvement on the popular Laxtonian. Vines about 20 inches high, color light green. Vigorous growth. The pods pointed and a little darker in color than the vine. Considered fully four days earlier than Laxtonian.

Pkt., 15 cts.; 1 lb., 35 cts.; 2 lbs., 65 cts.; 8 lbs., \$4.00.

QUITE CONTENT PEA

Considered the latest maturing variety in cultivation. Quite Content was of English origin and known in England as the Giant Podded Main Crop Marrowfat. The pods are larger and longer than any other sort, but closely resembling Alderman in general appearance. Of good quality, prolific, rank growth of vine requiring plenty of room for best development. Pods are usually borne in pairs.

Pkt., 15 cts.; 1 lb., 35 cts.; 2 lbs., 65 cts.; 8 lbs., \$4.00.

"CORONA DRY"

Arsenate of Lead

The "Standard" for Convenience, Economy, Efficiency

For Applications with Water on Fruit Trees, Potatoes, etc.

Largest and Most Progressive Growers have Rendered the Verdict

The ease with which Corona mixes in water makes preparing for the spraying application a simple as well as accurate operation. It is unnecessary to make a paste of Corona and pass it through a strainer to know that the lumps are thoroughly broken up. Experience has shown that it is only necessary to shake the proportional amount of Corona into the spray tank and the agitator will quickly make an even and smooth mixture. For example—in spraying for codling moth, fill the spray tank with 50 gallons of water; weigh out one pound of "Corona Dry" and shake it into the tank; a short period of agitation will give a thorough mixture ready to apply on the trees. A measure sufficient to hold the proportional amount of Corona to the water in the tank will do away with the weighing each time.

It is distinctive for quick poisoning—even application and great adhesiveness.

Its purity and unusual chemical activeness give it highest poisoning power.

Its fineness of subdivision and great suspension properties not only make "Corona Dry" cover more thoroughly, but cause it to adhere to the foliage longer.

One pound of "Corona Dry" will do the work of three pounds of paste and do it better.

It can be kept indefinitely-will not freeze, dry out, cake or lose its strength.

"Corona Dry" contains no water, therefore there is no shrinkage, seepage or evaporation.

It is pure, containing nothing but Lead Oxide and Arsenic Oxide. Every package contains full net weight.

BEST FOR POTATO BUGS

Superior to Paris Green because it covers the plant much more thoroughly. You can do the work twice as fast. It gets under the leaves better and kills the hidden bugs. Rain does not wash it off easily. "Corona Dry" is applied in dry dust form with a Hand Duster. The work can be done at any time of day. Keep it on hand. Will not lose strength. Absolutely safe to use. "Corona Dry" kills Corn Ear Worms, Currant Worms and dozens of other pests.

Practical Hints on Spraying

Timeliness and thoroughness are the watchwords of success. Every leaf and every fruit should be covered all over. A tree or vine cannot be covered by spraying from one side only.

Use nozzles with small discs so that the spray will issue in a fine mist and float through the foliage. There is no evidence that a coarse driving spray applied at very high pressure is more effective than a mist spray.

Always clean out the spray tank, hose and nozzle after using. Drain the tank and wash out all parts with clean water.

Do not spray by the calendar. Insects and diseases vary with the season. Watch the development of the plants and make applications accordingly, always bearing in mind that new leaves have no spray material on them and may be destroyed at any time.

A little spraying is a dangerous thing—bugs work all summer and so must men.

CORONA BORDEAUX MIXTURE—DRY

Corona Bordeaux Mixture Dry is the result of extensive experiments to retain the values of the freshly prepared substance to the fullest extent. Although we do not claim for our product the full fungicidal and stimulating values of a freshly prepared mixture, you will note, in comparing our product with other proprietary bordeaux, that we have retained more of the intense greenish-blue color of the freshly prepared mixture, and its practical use in the field has proven that we have been very successful in preserving the fungicidal and stimulating values as well. In general, it will be found to be very satisfactory, much more so than any prepared dry bordeaux ever before manufactured and can be substituted in our regular schedule as noted above.

Dusting

The direct application of fungicide and insecticide in the powder form is becoming popular in some sections. "Corona Dry" is peculiarly adapted to this method of treatment on account of its extreme fineness. It is very significant that "Corona Dry" has been employed by experimentalists in practically all dusting experiments to date.

ENRICH YOUR SOIL AND KEEP IT RICH

To Insure a Stand, Enrich Your Soil, Increase the Yield, Always Treat Your CLOVERS, ALFALFA, PEAS, BEANS, VETCH, SOJA BEANS, COW PEAS, FIELD PEAS, SWEET PEAS AND ALL LEGUMES

Inoculation of Legume Seeds with Farmogerm

Is a simple process; no fuss, no bother. Just moisten the seed with FARMO-GERM, pure cultures, allow them to dry, and plant. Seeds for 20 acres can be treated in a few minutes and the results will surprise you. In order to obtain the maximum yield Legume (or pod bearing) crops, seeds must be supplied with Nitrogen-Gathering Bacteria. FARMOGERM supplies these Bacteria, guaranteed alive and efficient, and shipped in a form to be conveniently applied to the seeds. Their use will increase the yield of the crop and make it richer in protein or feeding value. Vour stock will relish FARMOGERMED Legume Fodder.

Cost of Farmogerm

Small Farm Size	5 acres,	\$7.50
Trial Farm Size	1 acre,	2.00
Garden Size	1/ acre.	.50

Always specify crop when ordering.

Insist on FARMOGERM. It insures live, active Bacteria. Cultures in sealed bottles are not to be depended on.

Ask Us for Interesting Literature

Atmospheric Nitrogen is free. The supply is unlimited. Why not make use of it and save the high cost of Nitrogen Fertilizer?

For those who are accustomed to using a culture of legume bacteria in a dry medium and who prefer that type of preparation we can now furnish "ALLCROP FARMOGERM." This contains all the various strains of legume bacteria in a single can and will inoculate any legume crop. In addition it also contains a large number of strains of bacteria which fix nitrogen in the soil independently which makes "ALLCROP FARMOGERM" of benefit to any crop—legume or non legume.

Garden Size, 75c.; 1 Acre Size Can, \$2.00; 5 Acre Size Can, \$7.50. Postpaid.

THE NEW CORONA HAND DUSTER

The new Corona Hand Duster is a mechanically perfect apparatus which emits powders in clouds of right consistency from any position and in any direction, downward, upward or horizontally. Entirely different principles of mechanics have

been brought into play than have been used heretofore on such outfits. This principle is a pulsating measurement of the dust co-incident with the piston of the pump producing the air jet. It is made of the best materials obtainable. It will last a lifetime, always giving perfect service. The pump mechanism operates directly within the dust reservoir. Its construction virtually eliminates mechanical friction, the packing being accomplished by the air movement. It is double acting and at each movement of the piston automatically measures and ejects a sufficient amount of dust for that one air pulsation. It is very light in weight and easily held in the hands in the most natural position. A handle is provided for each moving

member of the pump, so that the direction of the cloud of dust can be easily controlled.

The dust Mixture is placed very easily within the Duster by unscrewing the specially designed cylinder end and sliding it on the tube to a sufficient distance from the cylinder. This gives an unusually large opening for filling the cylinder hopper, into which a sufficient amount of dust can be placed. It is most convenient to fill the cylinder hopper by using a tablespoon or like utensil. Close the gun by screwing the cylinder end into place, making everything air tight.

In working the Duster use a very easy short stroke. The gun will give strong action and if worked too hard will throw too much material and be wasteful.

Price, \$2.50 each. Sent by Parcel Post to any Post Office in New England States on receipt of price.

BRECK'S —HIGH GRADE— VEGETABLE SEEDS

THIS IS OUR NINETY-SIXTH ANNUAL CATALOG. We believe our knowledge and reputation acquired during all these years is of value. Through integrity and experience we have built up a business which stands second to none in reliability, and which is exceeded in volume by that of only one or two concerns in this country. The Golden Roll of Honor attests our ability to serve the gardening and farming public satisfactorily, else we would not be privileged to retain these gentlemen as customers for so many decades. If you want any information regarding hortcultural or agricultural matters write us, or better still, call if possible and your inquiries will receive intelligent attention. Our policy is to do business in the good old-fashioned way, giving the best service and selling only goods of the highest quality at fair prices. If you have never dealt with us, surely some of your neighbors can tell you about our goods. If you desire "the best" send us a trial order; one small transaction will convince you.

NOTICE—We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any Nursery Stock, Seeds, Bulbs or plants we sell, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on these terms, he must return them at once, and all payments therefor will be refunded.

Artichoke

(Cynara Scolymus) German, "Artischoke."—French, "Artichaut." Spanish, "Alcachofa"

CULTURE. A rich sandy loam is desirable, but any soil made fine by deep culture and enriched with plenty of well-rotted manure will answer. Sow seed in hot-bed early in spring, in rows 6 inches apart; transplant when large enough into boxes or pots. After danger of frosts is past plant in the open ground, 2 feet between the plants and 3 feet between the rows.

This method of cultivation will produce heads for culinary purposes by September. Seed may, if desired, be sown in the open ground in May, but the little tender plants should be given protection until the cold weather of spring has passed.

Plants raised from seed sown outdoors will not give edible heads until the second summer. One ounce of seed will sow 30 feet of drill.

Jerusalem Artichoke (Helianthus tuberorus)

A species of sunflower. A tuber that thrives well upon light, dry soil and is cultivated for feeding sheep and swine. It is also used for pickles. The tops when cut and cured make an excellent dry fodder. It is propagated by tubers, which should be set in rows four to five feet apart and one foot apart in the rows. Three bushels are required to plant an aere. Qt., 40c; pk., \$2.50, net.

Asparagus

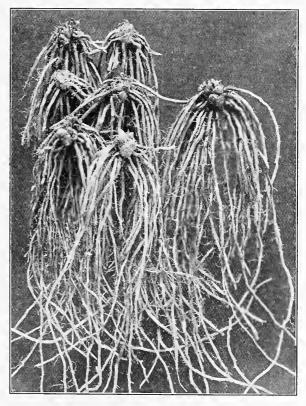

(Asparagus officinalis) German, "Sparget."—French, "Asperge." Spanish, "Esparragos"

(For prices on Asparagus Roots, see Vegetable Plants,

page 47.)
Although Asparagus is grown satisfactorily on various types of soil, it does best on sandy loams. Two or more years may be saved by planting a bed with roots instead of sowing seed. Roots may be set in the spring in trenches 8 or 10 inches deep and 3 or 4 feet apart, leaving 12 or 15 inches between plants in the row. The bed should be thoroughly worked over to a depth of at least 18 inches, forking in a liberal quantity of manure. It is well to spread the roots over a low mound of fine soil, rather than plant them directly in the hard bottom, of the trench. Cover the crowns with not more than 2 or 3 inches of moist soil, firming it well over the roots and as the young shoots appear and grow, fill in the trench gradually. Either in the spring or after cutting season, fork in a good dressing of stable manure between the rows. The bed may be cut two or three times the second season after planting, but only a small percentage of the shoots should be taken.

Seed may be sown in drills 2 feet apart and 1 inch deep, as early in spring as the ground can be worked. One ounce of seed will sow 60 feet of drill.

BEANS—DWARF OR BUSH

(Phaseolus)

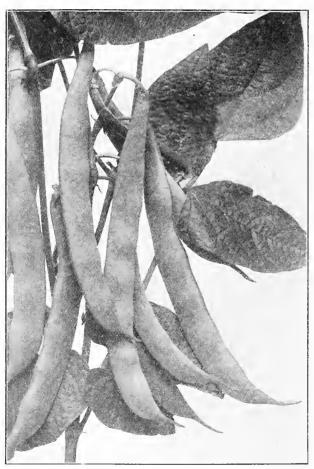

German, "Bohne."—French, "Haricot."—Spanish,
"Frijorenano"

To obtain a continuous supply of beans throughout the season, make plantings every two weeks from early May until about the middle of July. Beans are usually planted 2 inches deep in drills sixteen or eighteen inches apart. Many growers claim, however, that larger yields are obtained if three or four beans are planted in a hill, the hills being about eight inches apart in the row. Cultivate frequently, but not deeply, and only when the plants are dry, as earth scattered on the foliage or pods when moist will often cause the development of rust.

Two pounds of beans will sow 100 feet of drill.

Breck's Tewksbury Dwarf Horticultural

Due to the unusual beauty and size of its pods, this variety brings consistently higher prices than any other Horticultural Bean sold on the Boston Market. ready to pick, the yellowish surfaces of the pods are beautifully marbled and splashed with bright crimson. The vines bear great numbers of long pods, inclined to curve slightly, generally containing six beans each, although seven are not unusual. Until they have attained full size the pods are comparatively dull and inconspicuous, the color intensifying rapidly as maturity is reached. It is characteristic of the vines to throw out tendrils like those of polc beans, but the plants are distinctly dwarf and upright, displaying no tendency to climb or sprawl over the ground. Our seed stock, which is of the original strain and true to type, is grown for us by one of the most experienced bean specialists in this State. Pkt., 25c; 1 lb., 45c; 2 lb., 85c; 8 lb., \$3.00.

Beans—Pole or Running

German, "Stangen Bohne."—French, "Haricots a Rames." Spanish, "Jidas"

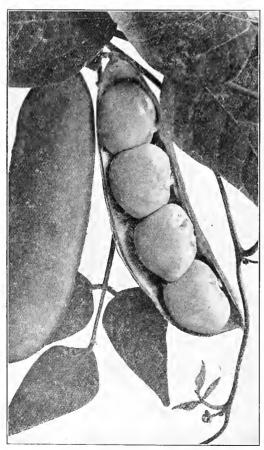

It is a good policy to plant Pole Beans at least a week later than the first planting of dwarf varieties because they are not as hardy. The poles are usually set at the time of planting. Plant four or five beans to a hill, in hills three or four feet apart, each way. Some growers raise the hills a little to insure good drainage. Hillapplications of well composted manure are of value. One quart of Limas will plant 100 hills; one quart of the smaller seeded sorts about 200 hills. All large seeded Limas should be planted eye down to insure quick growth.

Beans at Packet Prices sent post-paid.

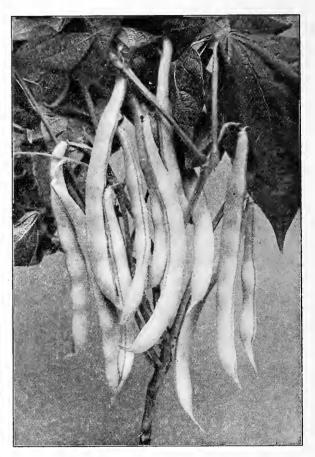

All Beans sold by weight. Two pounds equals about one quart.

Breck's Arlington Strain Crosby

BEET

(Beta vulgaris)

German, "Runkel Rube."—French, "Betterave."—Spanish, "Beteraga"

Any well-prepared, light garden soil will grow good beets. Successive plantings can be made from April until the middle of July. Sow in drills about one inch deep and 12 or 15 inches apart. The young plants are usually thinned to four inches apart in the row before they begin to crowd; many gardeners wait until the plants are six inches high so that those removed can be used for greens. One ounce of seed will sow 50 feet of drill.

Detroit Dark Red Beet

Sludstrup Barres

Mammoth Long Red

MANGEL-WURZEL AND SUGAR BEETS

Because of the constantly increasing cost of mill feeds which are as constantly decreasing in feeding value, due to the incorporation in them of mill sweepings, screenings, and hulls, and because of the prohibitive cost of the best concentrated grains, the American farmer would do well to take more notice and thought of the practice of European stock raisers and dairymen, in the use of root crops as a succulent winter feed for stock. In England, Scotland, Holland and Denmark where corn, either for silage or grain is unknown and only a limited amount of other grains for feed is available, the main reliance has always been Mangels and Sugar Beets. It must be admitted that these countries have produced the best of both heef and dairy animals. We too, could and should grow vast quantities of these crops, and we would gain; both in lessened cost of feed, and in the health and vigor of our animals.

The Poultry man also finds Sugar Beets and Mangels a valuable and much relished winter feed, and for maintaining the health and vitality of a flock of sheep through a long northern winter they are the best on earth barring none.

To obtain the best results in New England, the seed should be sown the latter part of May, in rich, moist, well drained soil, which has been prepared by very deep ploughing and thorough harrowing. Sow in drills 2½ feet apart to permit horse cultivation and thin to about 10 inches in the row. Six to eight pounds of seed are required per acre.

SLUDSTRUP BARRES

Giant Mangel-Wurzel. The seed we offer is Danish grown and Sludstrup has heen repeatedly awarded the highest honors in Danish Agricultural Exhibitions. While the roots do not grow to as great a length as Mammoth Long Red the growth is more above ground, thicker and heavier, frequently weighing 15 pounds and more; eolor reddish yellow. A most desirable stock feed. Pkt., 10e; Oz., 20c; ¼ lb., 65c; Lb., \$2.00.

BRECK'S MAMMOTH LONG RED

A selection of the common long red variety. The Mammoth is smooth skinned, fine grained, color deep red, roots straight and smooth, tops small. Under good cultivation immense crops can be secured with little labor. Ten to fifteen ton per acre are not unusual returns. Per pkg., 10c; oz., 20c; ¼ lb., 60e; Lb., \$1.65.

Klein's Wanzleben. One of the most popular of the Sugar Beets and has been grown in this section for many years. Per pkg., 10c; oz., 15c; ¼ lb., 50c; Lb., \$1.50.

Giant Half Sugar Mangel. Highly recommended for stock feeding. The skin is bright rose above the ground and white helow. Flesh white, sometimes tinged with rose. Under good cultivation roots grow half out of the ground. Per pkg., 10c; oz., 15c; ¼ lb., 50c; Lb., \$1.50.

	Pkt.	Oz.	¼ lb.	Lb.
Champion Yellow Globe. Grows in shallow soils	.05	.15	.50	1.65

Lane's Improved Sugar Beet. A well-known variety, valuable for feeding to eattle	.05	.15	.50	1.50

All the above sold in 5 lb. lots at \$1.40 per lb. and in 10 lb. lots at \$1.35 per lb.

For Top Dressing, lawns, golf eourses, flower beds, small shrubs, etc., use BRECK'S RAM'S HEAD BRAND SHEEP MANURE. \$3.00 per 100 lbs.; \$55.00 per ton.

For all root crops use MAPES POTATO MANURE. Ammonia, 4.50%; Ava. Phosp. Aeid, 8%; Actual Potash, 1%. \$4.50 per 100 lb. bag; \$8.50 per 200 lb. bag; \$82.00 per ton.

Borecole or Kale

(Brassiea oleracea, acephala)

German, "Blatterkohl."—French, "Chou Vert." Spanish, "Breton"

The Kales are very hardy, and make excellent greens for late fall and early spring use. Sow about May first in prepared beds, transplant in June, proceeding as with Cabbage plants. Siberian Kale may be sown late in August and handled like Spinach for spring greens. One ounce of seed will sow 150 feet of drill.

Dwarf Green Curled Scotch. Leaves bright green, closely curled, very tender. Quality is improved if the plants are touched by frost before being used. Pkt., 10c; oz.,

25c; ¼ lb., 60c; lb., \$2.00.

Dwarf Brown. Similar to the preceding but darker color, very hardy. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., \$1.50. Siberian or Winter. Pkt., 10c; oz., 25c; ¼ lb., 75c; lb., \$1.50.

Tall Green Curled Scotch. Similar to the dwarf, but more vigorous growth. Pkt., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.00.

Broccoli

(Brassica oleracea, betrytis)

German, "Spargelkohl."—French, "Chou Brocoli." Spanish, "Broculi"

Closely resembles the cauliflower, but is hardier. Like Cabbage and Cauliflower, it succeeds best in deep, rich, moist soil and in cool weather. Seed should be sown at the same time and plants receive the same general culture as cabbage. Completes its growth from seed in from 120 to 140 days. Five to ten degrees of frost will not injure the plants when they are approaching maturity. One ounce of seed will produce about 1500 plants.

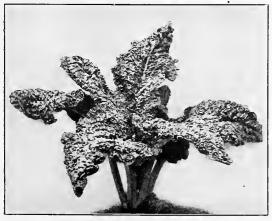

Swiss Chard or Sea Kale Beet

This variety is cultivated solely for its leaves. The midrib is stewed and served as asparagus, the other portion of the leaves being used as spinach. Especially desirable for the home garden, as it is a vegetable always ready for use.

Giant or Perpetual. Broad light green leaves.

Dark Green Curled. Leaves large crumpled, white midrib.

Blonde. Broad white midrib, yellowish green leaves. Lucullus. Very large crumpled leaves, general favorite. All 10c pkg.; 25c oz.; 85c ¼ lb.; \$2.50 lb.

Lucullus Swiss Chard

Amager Market Brussels Sprouts

Brussels Sprouts

(Brassica oleracea, gemmifera)

German, "Sprossenkohl."—French, "Chou de Braxelles." Spanish, "Berza de Brusela"

This interesting vegetable produces small heads resembling miniature eahbages all over its tall stem. The sprouts, either cooked or pickled in the same way as cauliflower, are esteemed a great delicacy. Seed may be sown in May in a seed bed, and the plants afterward set out and cultivated like cabbage. Being small and hardy the sprouts are not in the least injured by frost. One ounce of seed produces about 1500 plants.

Chervil

German, "Gartemkerbel."—French, "Corfeuil." Spanish, "Cerafolio de Cafe"

Chervil Curled. An aromatic sweet herb that resembles parsley. The young leaves are used in soups and salads. Sow evenly in May, in drills ½ inch deep, 1 foot apart. Per pkt., 10c; per oz., 30c; per ¼ lb., \$1.00.

Chervil, Tuberous Rooted. Sow in May or June, after treatment same as for carrots. Per pkt., 5c; per oz., 30c; per ¼ lb., \$1.00.

Chives

Allium Schoenoprasum. Resembles the Onion in growth and of the same family. Used largely as salad and for flavoring soups. Can be cut repeatedly during the growing season. Pkt., 20c; oz., 75c.

February 15, 1918.

Joseph Breck & Sons Co.,

Gentlemen :--

I have received your 1918 Catalogue for which I send thanks.

Permit me to say that I have planted your seeds for some time and I have always found them reliable.

Sincerely yours,

EVERETT A. NICHOLS, 88 Pond St., Natick, Mass.

(Corporation)

Copenhagen Market

Cabbage

(Brassica oleracea, capitate)

German, "Kopfkohl."-French, "Chou Pomme." Spanish, "Berza"

Cabbage will do well in any deep, rich, well-drained, and abundantly manured soil. Sow seed of the early varieties in hot beds about February 1st, and prick out into other hot beds as soon as the plants are strong enough, or set in cold frames in March. When danger of frost is past, transplant to the open ground. The late or winter crop seed can be sown in seed beds in May and plants set in the field in July. Late varieties are usually planted in rows 30 inches apart with 2 feet between plants; early sorts may be set 15 by 24 inches or even closer. One ounce of seed should produce about 2500 plants.

Breck's White Bouquet Cauliflower

BRECK'S WHITE BOUQUET CAULIFLOWER

Prices subject to change

Breck's White Bouquet Cauliflower. For early or for main crop, those who have grown it, private and market gardeners alike, agree that Breck's White Bouquet Cauliflower has no peer. It will head when other varieties fail; more over it is a strain well-adapted for forcing under glass during winter and spring. The plants are comparatively short-stemmed, have small leaves, and produce medium to large close-grained, snowy-white heads of the finest quality. We feel confident that no better strain has ever been developed, and that it is the earliest and most reliable variety for New England. Pkt., 25c; ½ oz., \$3.00; oz., \$5.00.

Cauliflower

Brassica oleracca, botrytis

German, "Blumenkohl."-French, "Chou-fleur."-Spanish, "Coliflor"

(Price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious member of the cabbage family. Although the ideal soils for this vegetable are well-drained, rich, moist, heavy loams, it will do well in any soil that grows good cabbage. Plants from seed sown in the hot-bed late in February will be ready for the open ground about the first of May. The seedlings should be transplanted as soon as they are strong enough; later, when the time for setting in the field is approaching the plants should be gradually hardened by exposure. For late plants sow the seed sparingly in a well-prepared seed-bed in May, selecting a cool place; treat the seedlings as if they were Cabbage, but exercise greater care. In the field make the rows 30 inches apart and set the plants 18 inches apart in the When the heads are forming tie the tops of the leaves together with roffea or soft twine in order to shut out the sun and rain; pure white attractive heads can not be grown without protection.

Brattleboro, Vermont.

Joseph Breck & Sons Corp., Boston, Mass.

Gentlemen:

At the Brattleboro Fair Sept. 18, 1918 we won 18 first prizes, one special prize, and 8 second prizes.

At Greenfield, Mass., Fair, Sept. 25, 1918 we won eight first prizes and two second prizes.

I thought you would be pleased to know of this since all of the Vegetables were grown from Breck's Seeds. I remain, gentlemen,

Yours very truly. PETER EDWARDS, Supt. Holbrook Estate.

1 acre.

Breck's Market Garden Danvers Half Long

Cardoon

(Cynara cardunculus) German, "Kardon."—French, "Cardon"

Cardoon is grown for the edible midrib of the leaf, which requires blanching in the same manner as celery. Sow sparingly, early in spring, in drills 1 inch deep and 4 or 5 feet apart; later, thin out the young plants to about 2 feet apart in the row. Oz. Lb.

Large smooth Spanish. Grows about Pkt. four feet high.... \$0.05 \$0.25 \$3.00

Chicory

(Cichorium intybus)
German, "Cichorie."—French, "Chicoree." Large Rooted. Sow and treat in the same Pkt. Oz. 1/4 lb. manner as carrots. This is the Chicory of commerce used to mix with coffee. The roots are taken up, washed, cut in

small pieces and earefully dried before being used . ., \$0.10 \$0.35 \$0.75 Witloof. Sow in May or June in drills,

thin out to six inches apart, treat as Endive until end of summer, when it should be banked up like Celery. The blanched stalks are used as a salad. It is also used as a boiled vegetable pre-

.40 1.25 pared in the same way as Cauliflower... .10

CARROTS

(Daucus carota)

German, "Mohre."-French, "Carotte." Spanish, "Zanahoria"

Carrots are grown extensively both for culinary purposes and for stock feeding: the "Horn" and medium varieties for the former; the long sorts for the latter use. Fine, mellow, sandy loams, which have been manured liberally for some previous crop, such as potatoes or onions, will produce smooth, well-shaped roots. Carrot seed may be sown towards the end of April, in May, or for late crops for table use, up to the middle of June, in drills 12 or 15 inches apart and not over 1 inch deep. For an early crop sow the "Horn" or medium varieties as early in spring as the ground can be prepared. If a horse cultivator is to be used the rows should be 28 or 30 inches apart. Thin out the plants from 3 to 5 inches apart, according to the variety. As Carrot seed is slow in germinating, cultivation may begin earlier if a little radish seed is sown with the carrot to mark the rows. One ounce of seed will sow 100 feet of drill; 4 pounds,

Collards, or Colewort

German. "Blatterkohl."-French, "Chou Cabu."

This vegetable is allied to the cabbage family.

Sow seed as for cabbage, at intervals of about three weeks during May, June and July. When a month old, set out the plants in the garden in rows 3 feet apart, The leaves are esleaving 2 feet between the plants. teemed as greens. One ounce of seed will produce about 3000 plants.

Georgia. Per pkt., 10c; oz., 25c.

Corn Salad, or Fetticus

(Valerianella olitoria)

German, "Lammersalat."—French, "Mache." Spanish, "Macka Valerianilla."

Sow very early in spring in shallow drills 1 foot apart. For an early spring crop, sow in September and winter over in cold frames, or cover with litter. One ounce of seed will sow 100 feet of drill.

Large-Leaved. Per pkt., 10c; oz., 30c; 1/4 lb., \$1.00.

SWEET CORN

(Zea mays)

German, "Mais."-French, "Mais."-Spanish, "Mais"

United States Food Administration License No. 014764

While sweet corn is often grown in hills, experienced gardeners prefer drills. Make the first planting the latter part of May in a rich, warm soil; successive sowings should be made at intervals of about ten days until July. Sow in drills from 2½ to 3½ feet apart, according to the height of the variety, and thin out the plants to 10 or 12 inches apart in the row. If grown in hills, 3 or 4 feet apart each way gives ample space; never allow more than four plants to remain in one hill.

One pound of seed will plant 100 feet of drill, or about 150 hills.

(All varieties on this page 15 cents Pkt. Postpaid.)

EARLY CROSBY

Pkt. 1 lb., 2 lb. 12 lb. The standard and favorite early variety; a little later than the Cory, but sweeter and with a larger ear. .50 3.00 BRECK'S EARLY HAMPSHIRE An extra early variety which may be relied upon to mature ahead of Early Crosby. Ears comparatively large, evenly filled with small white kernels of fine quality. The plants which average about five feet in height, always bear two and often three ears on each stalk. Our seed grown in New .30 Bearsfoot (Washington). A vigorous growing medium late variety of very good quality; popular among the market gardeners in the vicinity of Boston. Ears large, with somewhat irregular rows of deep .30 .50 3.00 Black Mexican. Said to be the sweetest corn in cultivation, medium early, ear of good size, kernels .30 .503.00 Country Gentleman. SELECTED EARS, 10c EACH. By mail, Selected Ears, 15c each.

SWEET CORN—Continued STOWELL'S EVERGREEN SWEET CORN

Stowell's Evergreen Sweet Corn

The standard main crop variety for market and for the home garden. Ears large, kernels deep, sugary and tender, remaining in green stage for an unusually long time. We are placing on the market this year the improved strain, known as Platt's, which is than the common stock (which has heen for so long the standard late sort), Stowell's Evergreen and

the yield most extraordinary, running as high as 175 bushels per acre, the majority of the stalks having two ears. Our grower reports that this year stock was ready for the market 10 days in advance of the original Stowell's Evergreen. It is not uncommon for the ears to have from 18 to 20 rows. Pkg., 15 cts.; lb., 30 cts.; 2 lb., 50 cts.; 12 lb., \$3.00.

YELLOW SWEET CORN

DE LUE'S GOLDEN GIANT

The most important Horticultural acquisition of recent years. Awarded the Silver Medal for novelty and excellence at Massachusetts Horticultural Show. Ears twice the size of Bantam and being from 14 to 16 rowed gives nearly four times the yield per acre; richer in color, more delicious, equally early. The husks are striped with red and very heavy. Golden Giant can be highly recommended to the market gardener because of the large ears and good shipping qualities of the corn. Last year the small quantity that was offered the Boston market brought a premium of 50 cts. bushel box over other vellow varieties.

Golden Giant is the result of eleven years selection by Dr. F. S. De Lue of Boston, Mass., from a product of "Howling Mob crossed with Golden Bantam."

Price in sealed packages 50 cts. postpaid. Seed sufficient for 20 hills or 50 ft. of drill.

JOSEPH BRECK & SONS, CORP., Mass., Nov. 10, 1918.

I want to tell you my opinion of your "Golden Giant Sweet Corn." I think it is a wonder. In the matter of productiveness the yield is enormous. As to the quality, I have never tasted a more delicious Corn. I have always considered "Golden Bantam" the best on earth but I can honestly say "Giant" is fully its equal. I can recommend it to any one who wants quality and quantity.

Respectfully yours, CHARLES W. GOVE.

KINGMAN & COMPANY, LTD.

JOSEPH BRECK & SONS, Ind., Aug. 31, 1917. Gentlemen:-The De Lue's Golden Giant Sweet Corn which

Gentlemen:—The De Lue's Golden Giant Sweet Corn which I purchased of you last spring has proven to be the best sweet corn I have even grown, the flavor being the finest I ever tasted. I do not hesitate to recommend this variety of Sweet Corn to anyone.

Hoping this will prove of benefit to you, I remain,

E. J. STICKELMAN,

4825 Arnell Ave.

BRECK'S SELECTED MASSACHUSETTS GROWN GOLDEN BANTAM

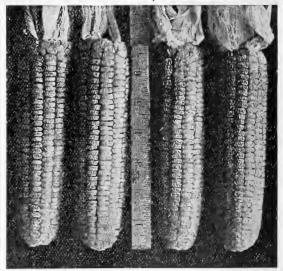

The most popular variety of yellow sweet corn ever offered; also one of the earliest and hardiest. It can be planted safely earlier than other varieties. The plants rarely grow over 3½ feet in height, and usually bear at least two ears, 5 or 6 inches long, on each stalk. Many people assert that Golden Bantam is the sweetest of all corns; its plump, rich, cream-yellow kernels are tender, milky, and delicious. All our Golden Bantam seed is Northern grown, making it especially valuable for growth in sections where the summers are cool and short. 1 lb., 20 cts.; 2 lbs., 50 cts.; 12 lbs., \$3.00. Selected ears, 10 cts. each; by mail, 15 cts.

GOLDEN DAWN

An extra early yellow variety, sweet and tender, ears slightly larger than Golden Bantam. Kernels large and deep set in even rows and filling the cob to the tip. Stocks about 6 ft. high. Our stock of Golden Dawn is grown in eastern Massachusetts and has been most carefully selected. Pkg., 15 cts.; lb., 30 cts.; 2 lbs., 50 cts.; 12 lbs., \$3.00.

GOLDEN ORANGE SWEET CORN

A popular sort among the farmers and market gardeners in southern New Hampshire, Maine and eastern Massachusetts. Can he classed as an extra early sort, from 7-8 inches in length, slender, with small cob, kernels large, deep; set in even rows and filling out the ears to the tip. Pkt., 15 cts.; 1 lb., 30 cts.; 2 lbs., 50 cts.; 12 lbs., \$3.00.

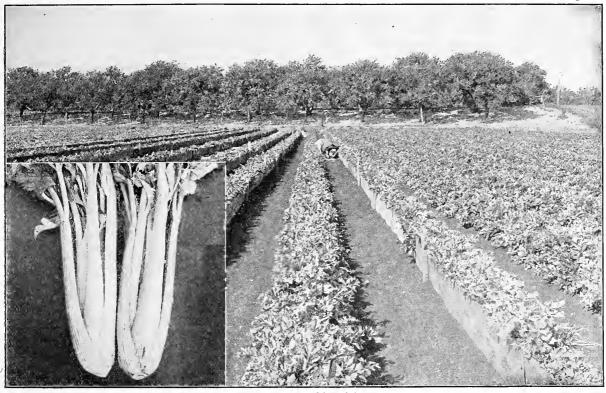

Golden Giant Sweet Corn

RED COB GOLDEN BANTAM CORN

A true descendant of the Golden Bantam. It was discovered several years ago by Mr. Briggs of Newton, Mass., and on account of its extreme sweetness and tenderness was given the opportunity of proving its worth. The dry seed is of crimson hue but when in the green state if placed side by side with the Golden Bantam, could not be told from it, except that the ears and kernels average somewhat larger. Aside from its sweetness and tenderness, another point in its favor is that the kernels have practically no hulls. The cob is of a decided crimson color and the foliage is streaked with red. Matures at the same time as its parent stock. Price, per sealed package, 25 cts. postpaid; per lb., 50 cts., postage extra.

WHITE RICE POPPING CORN FOR SEED

Choice selected, white rice corn. Per lb., 50 cts.; per 100 lbs., 18 cts. per lb.; postage extra.

Golden Self-Blanching Celery

Celery

(Apium graveolens)

German, "Sellerie."—French, "Celeri."—Spanish, "Apio" (For price on Celery Plants, see Vegetable Plants.)

Since celery seed is extremely small and rather slow in germinating, it is important that the seed-bed be of good, rich soil, thoroughly prepared. About the middle of April sow thinly in a hot-bed or cold frame, in rows 2 inches apart, taking care to cover the seed with not more than ½ of an inch of fine soil. Place pieces of burlap over the hed until the seeds have germinated, and water by sprinkling the burlap. When the seedlings are 2½ or 3 inches high transplant into a moist seed-bed, setting the plants 4 by 4 inches. To ensure stocky plants the tops may be cut back once or twice before setting in the field. Celery does well in any deep, richly-manured soil. Make the rows about 4 fect apart, and leave 5 or 6 inches between plants in the row. Cultivate frequently, but not

deeply, to keep down weeds and to conserve moisturc. With the advent of cool fall weather, begin to draw earth up about the plants, keeping the stalks well together; continue this process of ridging until late autumn when only the tops of the leaves should remain uncovered. The golden Self-Blanching variety is usually blanched by means of boards 12 or 15 inches wide set on edge on either side of the row. Celery should be stored where the air will remain cool and fairly moist. Simply set the plants close together in an upright position with several inches of soil about the roots. Cold frames, when dug to the proper depth, afford very satisfactory conditions for storing this crop. The frames should be covered with boards, lapped to shed the rain; if sash is used, under the boards, it can be blocked up slightly on mild days to give ventilation. The turnip-rooted variety, which docs not require blanching, may be planted in rows about 15 inches apart.

One ounce of seed should produce about 3000 plants.

Breck's Golden Self-Blanching. The variety most extensively grown in all sections of the country, for all purposes, by both market and private gardeners. The plants are compact with abundant foliage, short, thick stems, and large, solid hearts. The stalks, which are rich in flavor, tender, crisp and brittle, may be blanched readily to a beautiful creamy white. Our selected strain of this grand variety is a favorite among commercial growers in this locality. Pkt., 25c; oz., \$1.50; ½ lb., \$5.00.

Cress—Curled, or Peppergrass (Lepidium Sativum)

The popular sort. Sow thickly in drills, ¼ of an inch deep and a foot apart as early in spring as the ground can be prepared. One ounce will sow about 100 feet of drill. Pkt., 5c; oz., 20c; ¼ lb., 35c; 1 lh., \$1.25.

Upland Cress

(Barbarea vulgaris)

A perennial variety resembling Water Cress. Pkt., 10c; oz., 25c; ¼ lb., 75c.

Water Cress

(Nasturtium officinale)

This variety succeeds only in damp soils on the border of ponds or streams, or where its roots are partially submerged in water. Seed should he sown ahout a quarter of an inch deep. Pkt., 10c; oz., 75c.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

Improved White Spine Cucumber

Cucumber

(Cucumis sativis)

German, "Gurken."-French, "Concombre." Spanish, "Pepino"

Seed should be started under glass about May 1st, for an early crop in order to have plants ready to set out in the garden 3 or 4 weeks later when the ground has become thoroughly warm. Plant the seed in paper or earthen pots not less than 4 inches in diameter, in berry baskets, or other receptacles which can be handled easily and carried to the field without disturbing the young plants; leave only the 3 or 4 strongest seedlings in each container. Well-rotted manure or fertilizers may be dug into the hills a week or two before planting time. In every good soil the distance between hills should not be less than 4 by 5 feet; in less fertile soils 4 by 4 feet will answer. It is generally safe to plant seed in the garden until late in May; for pickles the middle of June is early enough. Cultivate often, and continue as late in the season as is possible without injuring the plants. Always pick cucumbers before they begin to turn white or yellow. One ounce of seed will plant about 50 hills.

One ounce of seed will plant about 50 mils.

Dandelion

(Taraxaeum officinale)

German, "Pardeblum."—French, "Pisse-en-lit." Spanish, "Amargon"

When growing in deep rich soil cultivated varieties produce large, tender leaves much superior to those of the wild dandelion, both in size and flavor. Sow seed early in May in shallow drills about a foot apart; later, thin the plants to 6 inches apart in the row, and cultivate to keep down the weeds. If blanched with soil the leaves make excellent salad. The plants may be held over winter by covering with litter, after the ground freezes, but before the advent of severe weather.

Egg-Plant

(Solanum melongena)

German, "Eierpflauze."-French, "Aubergine." Spanish, "Berengena"

(For price of Plants, see Vegetable Plants.)

Owing to their extreme tenderness egg-plants should not be set out in the garden much before the middle of June. This vegetable may well be planted in soil heavily manured for some earlier erop such as radishes. Sow in a hot-bed about April first, transplant into another bed, and later shift into 4 or 5 inch pots. In warm, settled weather transfer to the garden, setting the plants 2 by 3, or 3 by 3 feet. Conservation of moisture is important. One ounce of seed will produce about 1000 plants

Endive

(Cichorium Endiva)

German, "Endivien."--French, "Chicoree." Spanish, "Endiva"

Although endive is sown chiefly in the latter part of July for winter use, an early crop may be started in April. Sow in shallow drills a foot apart in rich, moist soil, and later thin the plants to one foot apart. Unless wanted for soups, the leaves should be blanched when 6 or 8 inches long by tying the tops together around the heart with coarse twine or raffia. This should be done only when the plants are dry or they will rot. Moreover, do not blanch the plants faster than they can be used. Blanching usually requires 15 or 20 days. Before freezing weather the plants may be lifted with some earth adhering to the roots, and reset in a cool cellar or shaded cold frame. Stored in this way endive may be preserved well into the winter. One ounce of seed will sow 150 feet of drill

Florence, or Sweet Fennel

(Foeniculum dulce)

Fenouil de Florance. Finnochio di Napoli

A delicious Italian vegetable which tastes quite like Celery, but is a little swecter and more delicate in flavor. The enlarged leaf-bases are usually boiled in preparation for the table.

Sow at intervals in the spring, in rows 18 inches apart. Thin the seedlings to 6 or 8 inches apart in the row, and cultivate frequently. Later, blanch the hottom and stalks by earthing-up like celery. Pkt., 10c; oz., 50c.

Kale-See Borecole

Breck's Boston Market Lettuce

Lettuce

(Lactuca Sativa)

German, "Lattich-Salat."-French, "Laitue." Spanish, "Lechuga"

(For price on Lettuce Plants, see page 43.) Lettuce is the most popular of all salad plants, and, at the same time, is one of the easiest to grow due to its comparative freedom from disease and insects. all types of lettuce thrive in properly enriched, loose, light loams, they will grow satisfactorily in any good garden soil; heading varieties, particularly, should never be planted in compact heavy soils. A satisfactory way of starting the early crop is to sow in hot bcds in March, and transplant to 2 by 2 inches preferably in flats, which may be transferred to cold frames when the plants are strong enough. Plants that have been properly hardened in cold frames may be set out of doors as carly as the ground can be prepared; the rows should he made 12 or 15 inches apart, with plants 1 foot apart in the rows. Seed may be sown in the open from the latter part of April until the middle of August.

Most of the Cos varieties will be of finer quality if blanched by tying the tops together with soft twine or roffea when the plants have nearly attained their growth.

Breck's Boston Market, Big Boston and Hittinger's Belmont are especially suitable for growing under glass. One ounce of seed will produce about 4000 plants.

Leek

(Allium porrum)

German, "Lauch."—French, "Poireau."—Spanish, "Puerro"
Sow the seed in moist soil as early in spring as the ground can be prepared. In July cut back the tops severely and transplant the seedlings forthwith, setting them at least 4 inches apart in trenches 5 inches deep and one foot apart. As the plants grow, gradually fill in the trenches.

One ounce of seed will sow 100 feet of drill.

Kohl-Rabi (Turnip Rooted Cabbage)

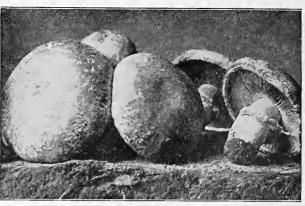

(Brassica oleracea eanlorapa) German, "Kohl Rabi."—French, "Chou-Rave." Spanish, "Col de nabo o Nabicol"

This vegetable, the enlarged stems of which are superior to the turnip in flavor, is closely related to cabhage, and no more difficult to grow. Early plants can be started in hot beds in the same manner as cabbage. Seed may be sown in the garden in May, June and July, in shallow drills 18 inches apart; later, thin the plants to 8 inches apart in the row. Kohl-Rabi should be eaten when about 3 inches in diameter, before the flesh becomes woody. One ounce of seed will sow 150 feet of drill.

Mushroom

(Agaricus campestus)

German, "Champignon."—French, "Champignon." Spanish, "Hongo"

Mushrooms may be grown in eellars, sheds, under greenhouse benches, or wherever the temperature will range between 50 and 65 degrees and is fairly uniform. Fresh stable manure, composed of about equal amounts of horsedroppings and straw or litter, is the best material of which to make the beds. Mix three parts of manure with one part of fresh loam. Before this mixture is used it should be piled in heaps about 3 feet high and moistened throughout, but not drenched. Every 4 or 5 days fork the heaps over carefully and tread them down. In from 2 to 3 weeks when the temperature in the heaps has dropped somewhat, the bed should be made. Spread a thin layer of the mixture and tramp or pound it firm; repeat this process until the bed is 10 or 12 inches deep; leave it thus for a few days until the temperature inclined to rise suddenly at first, has declined to about 70 or 75 degrees. Conditions will then be suitable for spawning, which is done by making boles about 3 inches deep and one foot apart each way; into each hole insert a piece of spawn about 11/2 inches square and fill in the hole with compost. In about ten days, when the spawn has had time to diffuse itself through the bed, spread a layer of fine loam over the surface to the depth of 1 or 1½ inches. A light mulch of straw will help to conserve moisture. Ordinarily, mushrooms should begin to appear in from six to ten weeks and continue to come for about two months. If the surface of the bed becomes dry, sprinkle it with water at a temperature of about 80 de-When the bed is apparently exhausted it may grees. often be stimulated to further production by spreading over it 1/2 an inch of fresh loam and watering thoroughly, using warm water to which sbeep manure has been added at the rate of 1/2 a pound to 3 gallons.

One brick of Spawn is sufficient for ten square feet of

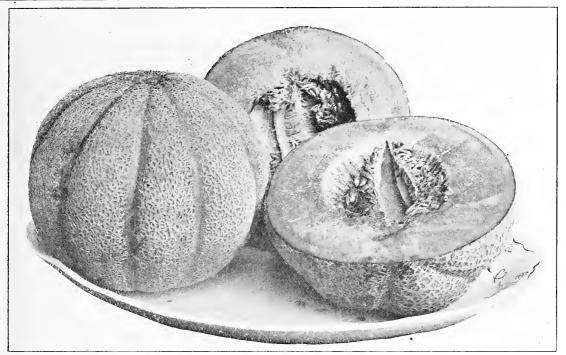

Pure Culture Spawn can be relied upon to produce mushrooms of a uniform type and color. Its use positively precludes all danger of growing poisonous varieties. The culture with which the bricks are innoculated are taken from carefully selected, prolific mushrooms of the most desirable cream white variety—the sort preferred by connoisseurs. There are two kinds of bricks, Direct and Standard; the former are innoculated directly from an original culture; the latter from a pure culture produced from an original.

All bricks are fresh, being received at frequent intervals from the laboratory.

Mushroom Spawn. Direct Bricks, Standard American. Pure culture. Prices, 35c per brick; 20 bricks, \$6.00; 100 bricks, \$25.00.

"Mushroom Growing," by Duggar, \$1.50.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

Muskmelon

(Cucumis melo)

German, "Melone."-French, "Melon."-Spanish, "Melon"

Good muskmelons may be grown in almost any soil if it is skillfully handled; a sandy loam that was heavily manured the previous year for some other crop such as onions, or carrots, is ideal. Begin to prepare the soil early in spring. Late in May, when the ground is warm, plant the seed 1 inch deep in hills 5 or 6 feet apart each way, putting in 8 or 10 seeds per hill. Frequent and shallow cultivation is essential to success. Much trouble with insects is often avoided by starting the plants under glass. Plant the seed in berry baskets, pots or other containers from which the seedlings can be removed easily, and without disturbing the soil about their roots.

Tobacco or plaster dust sprinkled on the plants makes them distasteful to insects. The striped cucumber beetle is perhaps the most destructive pest likely to attack melon vines. One ounce of seed will plant about 50 hills; 2 to 3 pounds 1 acre

Martynia

The seed pods are used for pickling, and should be gathered when green and tender. Although some gardeners prefer to start the plants in hot beds, sowing can be made out of doors late in May.

It is customary to plant several seeds together at 3-foot intervals in rows 3 feet apart. Later thin out so that the plants will stand 3 feet apart each way.

Martynia Proboscidia. Pkt., 10c; oz., 50c.

For free delivery offers and general instructions regarding orders and shipments, see third page of cover.

Part of our Massachusetts Grown Yellow Globe Danvers Onion. Picture taken a short time before the seed was harvested

Onion

(Allium cepa)

Ger., "Zweibel."-Fr., "Ognon."-Spanish, "Cebolla"

The onion requires a very fertile soil for the best development of its bulbs. While muck and peat soils are ideal, sandy loams properly enriched with well-rotted manure furnish excellent conditions. Onions should always be grown on practically level land, or considerable loss may be sustained from washing. As early in spring as the land can be worked, sow seed sparingly in drills 1 foot apart and about 1/2 inch deep. Unless the soil is quite moist it should be pressed firmly down on the seed to insure rapid and uniform germination. Weeding and thinning must be done by hand; at the first weeding, thin out to about 8 plants per linear foot of row. Cultivation should be shallow and frequent. When all the tops are yellow the onions are usually pulled and left on the ground, for 10 days or more if the weather is favorable, until the outer skin of the bulbs is dry; after the first three or four days, stir them occasionally with a wooden rake to hasten the process. One ounce of seed will sow 100 feet of drill; from 4 to 5 pounds, 1 acre.

Mustard

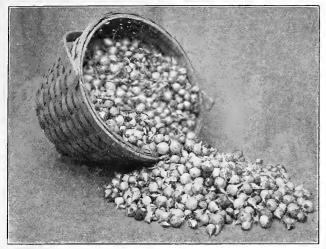

(Brassica)

Ger., "Senf."—Fr., "Moutarde."—Spanish, "Mostaza"

Mustard is usually cultivated for salad purposes, but
may also be used for greens. Seed may be sown from
April to August in shallow drills 12 or 15 inches apart.
The leaves should be cut for use when about 2 inches
long. One ounce of seed will sow 50 feet of drill.

Pkt. Oz. ¼ lb.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

Onion Sets

The sets should be planted out as early in spring as the ground is dry enough to work; plant them in rows 1 foot apart, with sets 3 or 4 inches apart. When raised from sets the onions can be used in the green state in June, or they will be ripened off by July.

Okra, or Gumbo

(Hibiscus esculentis) German, "Essbarer."—French, "Gumbo."
Spanish, "Quibombo"

This warm weather vegetable grows freely in any ordinary garden soil. Its tender young seed-pods are used in soups and stews. About the middle of May, sow seed sparingly in drills 3 feet apart and 2 inches deep; later, thin the plants to 12 or 15 inches apart in rows. One ounce of seed will sow 50 feet of drill.

Dwarf Green. Early and productive, ten-immense cropper, pods extra large and .25 White Velvet. Large, creamy-white pods, vcry tender

Parsley

(Carum petroselinum) German, "Petersilie."—French, "Persit." Spanish, "Perejil"

Parsley is the most beautiful vegetable grown for garnishing and flavoring purposes. It will thrive in any fertile garden soil; a single row forms an effective edging for beds and walks. Sow early in spring, or at intervals until June, in shallow drills about 1 foot apart; when the plants are 2 inches high, thin out to 6 or 8 inches apart in the row. The seed germinates very slowly, and some-times three weeks elapse before the seedlings appear. For winter use the plants may be set in protected cold frames. The Turnip-rooted variety should be treated in the same way as Carrots. One ounce of seed will sow about 150 feet of drill.

for flavoring soups.....

Parsnip

German, "Pastinake."—French, "Panais." Spanish, "Pastinaca"

Parsnips need a long growing season in order to reach maturity; consequently the seed should be sown early in spring. Any of the lighter types of soil, high in fertility, will grow smooth roots. Sow thickly in drills 15 or 18 inches apart and 1 inch deep; when the plants are well started, thin out to 5 or 6 inches apart in the row. Since parsnips are perfectly hardy, and freezing improves their quality, it is customary to dig in the fall only enough roots for winter use, leaving the balance of the crop in the ground until spring. One ounce of seed will sow about 100 feet of drill; 5 pounds, 1 acre.

Parsnip seeds of all kinds very scarce. Prices subject to change.

Joseph Breck & Sons, Boston, Mass. Gentlemen:—

Gentlemen:

I have received the copies of your 1917 Seed Catalog and wish to thank you for them. Your catalog is arranged in good shape and gives cultural directions of great value to our vegetable gardening students. Practically two hundred men will get an opportunity to look it over while planning home and student gardens.

Again thanking you, I am,

Very truly yours,

Instructor in Hortfeulture.

Instructor in Horticulture.

Gentlemen: I wish to thank you for your prompt action in sending all seeds and bulbs. They arrived all O. K. and are doing

Very truly yours,
MRS. JOHN SPARROWK Southville, Mass.

Ailsa Craig Onion (For description see page 38)

PEAS

(Pisum sativum)

German, "Erbse."-French, "Pois."-Spanish, "Chicaros"

1-Gradus

2-Breck's Imp. Telephone

3-Alderman

EXTRA EARLY 1 lb. 2 lb. 15 lb. Pilot. An extra early, round seeded or smooth Pea. Can be planted as soon as ground can be worked. Pods as large as the Gradus. Very prolific, highly recommended as an extra early Pioneer. An improvement on the popular Laxtonian. Vines about 20 inches high; color, light green. Vigorous growth. The pods pointed and a little darker in color than the vine. Considered fully four days earlier than .65 4.00 received Award of Merit from English Royal Horticultural Society. A very early, hardy, large podded, almost smooth seeded pea. Vigorous growth, very prolific; even growth of vinc; height ahout 20 inches......Pkt. 20 .65 4.00 Alaska, or Clipper. An extremely early, smooth, hlue pea. Vines about 2 feet high; dark green pods, well filled. .60 4.25American Wonder. Height 12 to 15 inches. Very early wrinkled pea of fine qualityPkt. .15
Breck's Excelsior. The earliest and best, .60 4.25 .35 tall-growing smooth pea.....Pkt. .15 .30 .503.25Breck's Old Glory. Superior to all other extra early varieties, size, quality, and productivity considered. A favorite market garden sort. Long, dark green pods packed with large slightly wrinkled peas; vines tall growing and .60 4.25 vigorousPkt. .15 Claudit. An early, tall-growing variety of excellent quality. Peas large, deep .60 4.25green, and slightly wrinkled...Pkt. .20 .35 Gradus, or Prosperity. Deservedly the most popular early variety among both private and market gardeners in this locality. Pods large, pointed and uniform in shape; peas of fine flavor.

Vines from 2½ to 3 feet in height.

Pkt. .20

.75 - 4.50

The pea is one of the few vegetables which almost invariably find a place in home gardens. Peas mature earliest in light, fertile loams, but will give good results in any well-prepared garden soil. Sow the smooth sorts as early in spring as the ground can be worked; after that, make successive plantings every ten days until about the middle of June, giving the wrinkled sorts the preference. From the middle to the end of July, when the driest and hottest weather of the season is usually over, plantings of the extra early varieties may again be made with reasonable hope of a crop. Plant in trenches, or wide furrows, 3 or 4 inches deep and from 18 inches to 4 feet apart, according to the height of the variety. Brush, or supports of some kind, should always be provided for the vines of tall growing sorts. All peas sold by weight, not by measure. One pound equals about 1 pint and 15 pounds about 1 peck, dry measure.

Two pounds of peas will plant about 100 feet of drill.

page 3 of cover. 1 lb. 2 lb. 15 lb. Laxtonian. One of the best dwarf wrinkled peas for the market gardener. Pods about 4 inches long, resembling those of Gradus, but ripening a little earlier. Vines productive and vigorous; average height less than 18 inches. .45 .85 4.50 Pkt. .15 Little Marvel. An extra early dwarf wrinkled pea, fast becoming popular in this locality. Vines bear a profusion of blunt-ended pods, well filled with large peas of fine quality.....Pkt. .15 .35 Nott's Excelsior. The standard of quality in home gardens. No other dwarf wrinkled pea is as widely planted. Vines of regular habit and about 14 inches highPkt. .15 .35 Premium Gem. A desirable, early, wrinkled pea. Vines about 15 inches highPkt. .15 .35 Sutton's Excelsior. An early, dwarf, wrinkled pea with exceptionally large pods. Matures as carly as Nott's Excelsior and is its equal in quality Pkt. .20 Thomas Laxton. This reliable pea is similar in type to Gradus, but has darker foliage and square-ended pods. Although a wrinkled sort of excellent quality, it may be planted about as early as smooth varieties.....Pkt. .20 The Record. A popular large-podded extra early, wrinkled pea which matures several days carlier than the well known Gradus. Its growth is quite similar to that of Gradus but somewhat dwarfer and stouter; pods uniformly large, measuring 41/2 to 5 inches, nearly round and packed with handsome wrinkled peas of the finest flavor. The Record is an especially valuable sort for market gardeners because the peas will remain in good condition a remarkably long time after pickingPkt. .20 -40

Carter's Daisy, or Dwarf Telephone

Peas by the packet, postpaid. SECOND EARLY

Abundance. Pods medium in size; peas 1 lb. 2 lb. 15 lb. wrinkled; quality very good. Height Alderman. One of the most satisfactory varieties for early main-crop. Pods long, filled with large wrinkled, deep green peas of superior quality. Height .70 4.25Everbearing. An excellent variety for private growers. Peas large, wrinkled, and of fine flavor. Height 3 feet. .60 4.25 Pkt. .15 Daisy, or Dwarf Telephone. A profuse bearer. Pods large; peas wrinkled, sweet and tender. Height 18 inches. Pkt. .20 .85 5.00Dwarf Champion. A wrinkled pea quite similar to the well-known Champion of England excepting that the vines are only 2 or 2½ feet in height...Pkt...15 .65 - 4.25Duke of Albany, or American Champion. One of the largest varieties; height from 4 to 5 feet. Prolific, each pod containing 6 to 10 extra large wrinkled peas of good quality. A little earlier .754.25lar in the vicinity of Boston. . Pkt. .15 .60 4.00 FRENCH PEAS
Petit Pois. "Clamart Hatif." These small, delicate peas are much esteemed in Europe. Slender pods are about 3 inches long, slightly curved, and usually contain from 7 to 9 each. In France the vincs grow to a height of .40 .75 4.50

BRECK'S SEED POTATOES

(Solanum Tuberosum)

(Prices subject to market changes.)

F. o. b. Boston.

A deep, mellow loam, rich in humus, furnishes ideal conditions for growing Potatoes, but good crops are raised on both heavier and lighter types of soil. Early varieties may be planted as soon as the ground can be prepared. Cut the tubers into pieces the size of hen's eggs; drop a piece of seed every 15 inches in furrows 3 feet apart, and cover to a depth of 3 or 4 inches. Cultivate at intervals of a week or ten days, gradually throwing earth up around the stalks after the plants are 4 inches high. For potatoes, fertilizers are unquestionably better than barnyard manure.

We furnish only Aroostook Grown Potatoes from hill selected seed stock, carefully inspected during growing

Bbl.

season, sorted and graded to size.

Sweet Potato Plants

Plant rooted slips or cuttings the last of May or 1st of June in hills about 5 feet apart and 6 inches above the garden level. Light, rich warm soil is required. Nansemond. Best sort for New England. Per 100, 75c; add 15c per 100 if wanted by parcel post.

When planting Breck's Seed Potatoes use Mapes Potato Manure and insure a profitable crop.

Pumpkin

(Cucurbita)

German, "Kurbis."—French, "Courge." Spanish, "Calabaza"

Plant 1 inch deep in hills 8 by 8 feet apart, late in May, in any highly enriched soil that is not clayey. When the plants are beginning to run, remove all but the two strongest from each hill. Farmers find field pumpkins a valuable addition to their stock feed, and commonly grow them in the cornfield, planting a few seeds in every third or fourth hill in alternate rows. One ounce of seed will plant about 30 hills; 4 pounds, 1 acre.

Pkt. Oz. 4 lb. Lb. Connecticut Field. Very productive; largely grown for feeding stock...\$0.05 \$0.15 \$0.50 \$1.50 Large Cheese, or Kentucky Field. POTATO SPRAYS

For all leaf-cating insects use Corona Dry Arsenate of Lead.

To prevent blight, Corona Bordeaux Mixture Dry. Against Plant Lice, Corona Tobacco Dust, Dry or Black Leaf 40 (Nicotine Sulphate 40%).

For prices and additional information see pages 127-130.

(Corporation)

Sweet Upright Pepper

Pepper

(Capsicum annum)

German, "Pfeffer."—French, "Piement." Spanish, "Pimiento"

Sow the seed in hot-beds about the middle of March, and transplant the seedlings to 2 by 2 inches apart as soon as they are strong enough. It is an advantage to shift the plants again, two or three weeks later, into pots of proper size. In the latter part of May, when the ground is warm, plant in the garden in rows 2 feet apart, leaving 12 or 14 inches between plants in the row. Peppers should be cultivated in the same way as egg-plants, and will thrive in any well-drained soil.

One ounce of seed will produce about 2000 plants.

Pkt. Oz. Cayenne, Long R2d. The pods of this variety are from 3 to 4 inches in length, cone shaped, and coral red when ripc.....\$0.10 \$0.75 Large Bell, or Bull Nose. Fruit large, an early .50 sweet variety Chinese Giant. Grows very large and uniform; as early as Ruby King and very mild 1.00 Neapolitan. Early, large; skin bright red, very mild flavor. Fruit 4 inches long and 4 to 5 .75 .10 around Pimiento. Desirable for salads or for stuffed Peppers. Medium size, thick flesh, mild flavor .10 .75 Red Cherry. Fruit round, very productive and ornamental75 .10 Red Chili. Used for pepper sauce; small narrow pods, about 5 inches long; fine flavor... .10 .65 Ruby King. Pods about 5 inches; fine flavor.. Squash, or Tomato-Shaped. The kind most 1.00 .10 generally grown for pickling; an excellent .10 .85 Sweet Mountain, or Mammoth. Similar in shape Pkt. Oz. to the Large Bell, but of much larger size.. .10 .85 Sweet Upright. A very desirable medium size sweet pepper. Fruits borne upright on plants,

which are small and compact.....

.85

Radish

(Raphanus Sativus)

German, "Rettig," "Radieschen."—French, "Radis;" "Rave,"
"Petit Rave."—Spanish, "Rabano"

Loose, fertile, light loams are to be preferred for radishes; in distinctly clayey soils, the crop not only matures slowly, but the roots are usually rough, ill-shaped and of inferior quality. For a constant supply, sow at intervals of two or three weeks from early April until September. An early crop may be grown in the hot-bed in February. For use during the winter, the roots may be stored in earth in a cool cellar, but should be placed in cold water, for an hour or so, before they appear on the table.

One ounce of seed will sow 100 feet of drill; 10 pounds, one acre.

Rhubarb

(Rheum Rhaponticum)

German, "Rhabarber."—French, "Rhubarbe."—Spanish, "Rhubarbo Bastardo"

(For price of Rhubarb Roots see Vegetable Plants.)

Seed may be sown early in spring in shallow drills one foot apart; when the plants are 3 or 4 inches high, thin to about a foot apart in the rows. In the fall, or preferably the following spring, transplant into deep, rich soil, setting the plants about 3 by 3 feet apart. If propagated by dividing the roots, the work may be done either in spring or fall.

One ounce of seed will sow 100 feet of drill.

Linnaeus. Early, large and tender. Pkt., 10c; oz., 50c; ¼ lb., \$1.00.

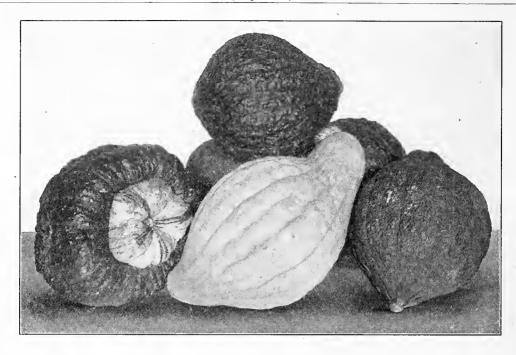

Victoria. Very large, later than Linnaeus. Pkt., 10c; oz., 60c; ¼ lb., \$1.25.

SELECTED ROOTS

25c each \$2.50 per doz.

SQUASH

(Cucurbita Pepo and C. maxima)

German, "Kurbiss."-French, "Courge."-Spanish, "Calabaza Tontanera"

Squash seed should not be planted until the ground has become thoroughly warm and the weather is settled. A rich, warm, mellow soil is conducive to high yields and early maturity, but squashes grow satisfactorily in almost any well-drained soil. If possible, enrich each hill with one or two forkfuls of rotted manure. For bush types, the hills should be at least 4 x 4 feet apart; for the running varieties, 10 x 10 feet. It is customary to plant 8 or 10 seeds in each hill, and thin out, later, to two or three strong plants. During the early stages of growth keep the plants well sprinkled with tobacco or plaster dust to make them distasteful to insects; the way to deal with the squash vine borer is to cover the joints with an inch or two of soil so that secondary roots may develop.

Salsify, or Oyster Plant

(Tragopogon porrifolius) German, "Boksbart."—French, "Salsifis." Spanish, "Ostra Vegetal"

The demand for this vegetable is increasing from year to year, but as yet its good qualities are not widely known. The roots are usually fried, boiled or stewed, but may be sliced raw for salad purposes.

The methods suggested for growing and keeping Parsnips apply equally well to this crop.

One ounce of seed will sow 50 feet of drill.

Breck's Belmont Tomato

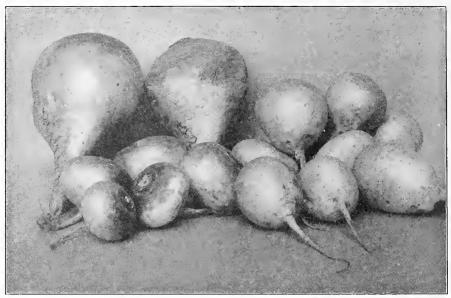

Tomato

(Lycopersicum esculentum) German, "Liebsapfel."—French, "Tomate."—Spanish, "Tomate" (For Tomato Plants, see Vegetable Plants.)

Sow the seed sparingly about the middle of March, in drills 1/4 of an inch deep and 2 inches apart, in a hotbed, or sunny window where the temperature will not fall below 65 degrees. When the seedlings are two inches high, they should be transplanted to 3 inches apart each way in other flats of soil 3 inches deep, in which they may remain until time for planting in the garden. If a very early crop is desired, transplant again three weeks later, preferably into 4-inch pots of very rich soil. About the first of June the plants may be set in the open ground. A heavy soil is conducive to high yields but the crop matures much earlier on fertile, sandy loams; in the former, set the plants four feet apart each way; in the latter, 3 by 3 feet will give ample space. One ounce of seed will produce about 2000 plants.

Yellow Ruta Baga

Purple Top Flat

White Egg

Turnip

(Brassica rapa) German, "Steckrube."-French, "Navet." Spanish, "Navo Comun."

Turnip seed may be sown at all seasons from April until the middle of August in our climate; but the roots will be of finer quality if seed is sown early in spring for the summer crop, and about August first for the fall and winter crop. A light soil, well-manured the previous year, furnishes ideal conditions; no manure should be applied at the time of sowing, unless it be well rotted compost, or the turnips are apt to be strong flavored, or bitter. The ground should be dug or plowed deep, and made mellow and fine. Sow the seed in drills ½ inch deep and from 12 to 18 inches apart, dropping one good seed to every inch of furrow. Plants of the early varieties should be thinned to about 3 inches apart, while those of the larger late varieties should not be left closer than 5 inches apart in the row. Cultivate often, and keep the crop free from weeds. The Ruta Baga sorts, which are generally grown for winter use, may be sown from the 20th of June to the middle of July. For stock feeding, the late crop is often sown broadcast on well-prepared soil and raked in lightly.

One ounce of seed will sow 150 feet of drill; two pounds, one acre in drills. From 1 to 1½ pounds will

sow one acre broadcast.

German, "Spinat."—French, "Epinard."—Spanish, "Espinaca"

(Onc ounce, 50 feet of drill; 12 pounds, one acre.) Spinach thrives in rich soil, and may be planted as soon as the ground can be prepared in spring. Sow the seed in drills one inch deep and 12 or 15 inches apart. The main crop, for spring consumption, is sown in late August or September, the plants being protected during the winter by a covering of straw or litter. A single sowing of New Zealand Spinach will supply greens of excellent quality throughout the summer; plant the seed 3 or 4 in a hill, in hills 3 feet apart each way. Seeds of this variety are enclosed in very hard shells and should be soaked in hot water before sowing.

AGRICULTURAL GRAINS

Prices subject to market changes. Bags extra. All Grain Sold f. o. b. Boston.

Our Golden Chaff Winter Wheat, 1918 Crop, Grown in Northern New York.

Breck's King Oats

A close or cluster headed variety. Our 1918 crop was grown in Northern Montana on irrigated land; thus insuring seed free from fungous diseases, bright colored, large size, strong germination, and weighing over forty pounds to the measured bushel, an exceptionally fine crop grown especially for seed purposes.

Breck's King Seed Oats have given satisfaction during the past twelve years and we can highly recommend seed stock just secured.

Plant King Oats and secure a good yield of heavy grain and a crop of stout, straight, clean straw.

Price, \$2.50 per bu. of 32 lbs.; 10 bu. lots and over at \$2.00 per bushel.

Silver Mane Oats

Known to many as Silver Maine. This variety an oldtime favorite, both east and west. 1918 crop will run 38-40 lb. to measured bushel, grain of good color, plump and clean. Recommended for planting with Field Peas for hay or green forage. Price per bushel, \$1.75; in quantities over 10 bushels, \$1.50 per bushel. 32 lb. to bushel, 3 bu. to bag.

White Montana Oats

A short seeded variety, grain bright colored, heavy, close headed, tall growing. Our seed stock grown on the irrigated farms of northern Montana, where on account of total lack of rain during harvesting season, can be obtained oats of strong germination, free from rust or smut. Our stock has been carefully recleaned to take out all foreign seeds except now and then a trace of wheat. Price per bushel of 32 lbs., \$2.00; 10 bushels and over \$1.75 a bushel, f. o. b. Boston. (This stock will weigh nearly 45 lbs. to the measured bushel and can be shipped 3 bushels to the bag.)

Samples of both the above sent on request

Wild Rice (Zizania aquatica). Price on application. Not kept in stock. Seed must be kept moist until sown.

Silver Hulled	\$4.00
Japanese. Enormously productive	

MARQUIS SPRING WHEAT

A variety produced by scientific cross breeding of the old Calcutta and the frost-resisting Red Fyfe variety. First introduced by the Central Experiment Station in Ottawa, Canada, and has since rapidly displaced many other varieties in the North West and in Canada. In appearance Marquis Wheat is similar to Red Fyfe, but the heads as a rule are heavier and the stalks shorter, making it less likely to lodge. The kernel is flinty, a little darker red and more plump that Fyfe. It is beardless having smooth yellow chaff, but its most valuable feature lies in its earliness as it matures a week or ten days earlier than Red Fyfe. Thrashing reports from the Northwest indicate yields of 40 to 50 bushels per acre. Weight 64 to 66 lbs. per measured bushel, and they report it to be of the highest milling quality. Not in many years has such a valuable variety been introduced. Our stock is strictly Canadian grown and of the highest purity and germination. Farmers who planted Marquis Wheat in New England last season had most satisfactory returns.

Fyfe. A red, beardless wheat, with long smooth heads well covered with chaff; straw stiff, bright colored. Grain very hard, of a dull, reddish color. Very suitable for New England.....

Price, qt., 25c; pk., \$1.50; bush., \$4.00.

Winter Wheat

Dawson's Golden Chaff. One of the hardiest wheats we know of; heads bald, color of grain white (inclined to light amber), straw of medium length.. 4.00

FIELD CORN

Prices subject to market changes and for seed f.o.b. Boston; bags extra at value. Special quotation made where large quantities are required.

Our seed corn grown for us under contract and especially for seed purposes. We wish to call particular attention to our fine stock of Improved Leaming and also Virginian grown Eureka Ensilage.

Breck's Mondamin. The earliest and best yellow flint variety; eight-rowed ears, well filled to the tips. For complete description see page 24. 25c qt.; \$1.75 pk.; \$6.00 bu.

Breck's Angel of Midnight. One of the earliest yellow flint varieties, of the early Canada type. Ears long, with comparatively deep kernels. 25c qt.; \$1.50 pk.; \$5.00 bu.

Brewer's Yellow Dent. This variety originated in New England and is unquestionably the best strain of dent corn to grow for grain in the latitude of Boston; it is also valuable for ensilage. The stalks average from ten to twelve feet in height; the ears have about twenty rows of closely-packed kernels. 25c qt.; \$1.75 pk.; \$6.00 bu.; selected ears, 10c each.

Early Yellow Canada. An extra early eight-rowed flint variety with large kernels and small cobs. Ears of medium size. A popular variety in Northern New England. 25c qt.; \$1.50 pk.; \$5.00 bu.

Early Sanford. A popular white flint variety, equally valuable for ensilage or grinding. The eight-rowed ears average from 9 to 10 inches in length and have broad creamwhite kernels. 25c qt.; \$1.50 pk.; \$5.00 bu.

Eureka Ensilage. One of the most popular white dent varieties among dairymen. It is enormously productive of both foliage and ears. Our Virginian grown seed has given great satisfaction throughout New England. 25c qt.; \$1.50 pk.; \$4.50 bu.

Improved Leaming. A yellow dent variety very valuable for ensilage. The plants are tall with a large amount of foliage. Each stalk usually produces two good long ears with small red cobs, well filled with large, deep, golden kernels. 25c qt.; \$1.50 pk.; \$5.00 bu.

Longfellow. The variety most widely grown in New England. An early eight-rowed flint corn with long ears and comparatively small cobs, filled to the tips with large, broad kernels, 25c qt.; \$1.50 pk.; \$5.00 bu.

Pride of the North. An exceptionally early dent variety. Stalks of medium height with broad leaves. The ears, which average 7 or 8 inches in length, have from 12 to 16 rows. Grains long and deep yellow, making meal of extra good quality. 25c qt.; \$1.50 pk.; \$5.00 bu.

Red Cob Ensilage. A red-cobbed, white dent corn with heavy foliage; popular among dairymen in northern New England. 25c qt.; \$1.50 pk.; \$5.00 bu.

White Southern. A tall growing dent variety with leafy stalks; valuable for ensilage and fodder. 20c qt.; \$1.25 pk.; \$4.50 bu.

Sweet Fodder. Unexcelled for cutting green and feeding to stock. It should be included in all soiling schedules. 20c qt.; \$1.75 pk.; \$6.00 bu.

Winter Vetch

(Vicia Villosa)

Growth and appearance like Spring Vetch.

Valuable as a cover crop or for early spring forage. In this latitude seed should be sown before Sept. 15th, so that the plants may become well established before cold weather. It is customary to sow from two to four pecks of Winter Vetch with six pecks of either Winter Wheat or Winter Rye. If sown alone, broadcast one bushel per acre. Weight, 60 lbs. per bushel. Price, 25c per lb.; per 100 lbs., \$22.00 net.

Prices subject to market changes.

Spring Vetch or Tares (Vicia Sativa)

Very much like common peas in growth and general appearance. An annual legume. Valuable as a summer forage when sown early in spring on well cultivated and enriched ground at the rate of ½ bushel Vetch and 2 bushels Grain, Barley or Oats per acre. Can also be sown alone at the rate of about 80 lbs. per acre as cover crop for orchard. Weight per bushel, 60 lbs. 15c per lb.; \$12.00 per 100 lbs.

Winter Vetch

Mondamin Corn

ALFALFA

Prices Alfalfa seed variable; we recommend that you write for special quotation stating quantity required when in the market.

Alfalfa Field on World's End Farm, Hingham, Mass. For eight consecutive years this field gave three heavy cuttings a year.

One of the most successful fields in Eastern Massachusetts.

ALFALFA, or LUCERNE

Alfalfa, the greatest known forage crop, is now grown successfully in all parts of the world and is steadily gaining favor with the intelligent New England farmer, for it is proving to be of the greatest value to him not only as a forage crop, but as a soil improver. It is a legume, taking free nitrogen from the air and storing it up in the deep growing roots. As green fodder or cured hay allolfa is religibled above all other forage crops by stock

taking free nitrogen from the air and storing it up in the deep growing roots. As green fodder or cured hay Alfalfa is relished above all other forage crops by stock. To grow a good field of Alfalfa, it is important to select deep, loamy, well-drained land with loose sub-soil, as standing water will soon kill out the young plants. Plow and harrow the land thoroughly, and with the first harrowing apply at least one ton of Agricultural Lime per acre, thereby correcting any acidity in the soil and, what is more important, making conditions favorable to the activity of nitrogen-gathering bacteria upon the presence of which success depends. Continue to harrow the land at short intervals for some weeks, thereby thoroughly pulverizing the top soil and at the same time working out and killing the old grass roots and weeds that would otherwise get a quick start and choke out the young Alfalfa. If possible, give the ground a fair dressing of barnyard manure, and a short time before sowing the seed harrow in 600 or 800 lbs. per acre of high grade commercial fertilizer. Either the seed should be inoculated with Farmogerm before sowing, or soil from an old Alfalfa field should be sown broadcast at the rate of 300 to 500 lbs. per acre.

300 to 500 lbs. per acre.

It has been found that in this latitude seed sown the last of July or early in August will escape being hindered by weed growth, and get a good stand before cold weather. Sow broadcast at the rate of 20 lbs. per acre.

Never cut Alfalfa before buds have appeared close to the ground at the crowns of the plants; always judge the time to cut by the presence of these basal shoots or buds and not by the period of bloom. Do not cut closely the first season; cut, allow the plants to wilt, put up in cocks and cure in the cock.

Yellow Sweet Clover (Melilotus officinalis). More suitable for turning under than the White variety. A good crop with which to prepare land for Alfalfa. Height about 2 feet. 60 lbs. to the bushel. Price per lb., 40c; per 100 lbs., \$35.00.

Bokhara (Melilotus alba). Will grow on very poor soils; excellent for plowing under as green manure. Valuable for bee keepers. 60 lbs. to the bushel. Price per lb., 40c; per 100 lbs., \$35.00.

Genuine Grimm Alfalfa

(Medicago Sativa)

As a result of extensive trials of numerous varieties of Alfalfa, at various Experiment Stations and on many farms, in the Northern States, the unanimous conclusion is that the Grimm strain is hardier and more productive than any other known variety. It originated in northern Minnesota from seed brought from the fatherland and sown by Ferdinand Grimm, a German farmer. During the many years he allowed his fields to remain in Alfalfa, the more tender plants winter-killed; from those which survived he saved seed, little thinking that by natural selection he was developing a strain of Alfalfa more valuable to the American farmer than any yet discovered. Professor Hayes, before being appointed Assistant Secretary of Agriculture, recognizing the superiority of Grimm Alfalfa for sections where ordinary varieties fail, took measures to have the Grimm strain kept pure and to have it tested in other parts of the country. In 1904 the Govmeasures to have the Grimm strain kept pure and to nave it tested in other parts of the country. In 1904 the Government contracted with Mr. F. E. Dawley of Dotshome Farm, Fayetteville, N. Y., to grow 18 varieties of Alfalfa, one of which was Grimm, devoting an acre to each strain. The original stand of Grimm is still in existence. In 1914 it yielded a total of over 6 tons of cured hay in four cuttings. During the first three years of the contract no seed was allowed to ripen on this plot, but since then a seed crop has been harvested every year until 1914. At the present time there are over 60 acres of Genuine Grimm Alfalfa on Dotshome Farm. Although Alfalfa occupies nine-tentbs of the meadows in the Fayetteville section, no diseases or insect enemies have appeared. The seed, which is true to name, clean, and absolutely free from Dodder, never leaves the farm until shipped to us. Notwithstanding its higher price, we feel confident that our Grimm seed is the most economical for all farmers who desire to grow Alfalfa. Price, per lb., 80c; 20-lb. lots and over, 75c per lb.

Northern Alfalfa

This stock secured from the northwest, of high germination, our purity test over 99%. Northwestern grown Alfalfa is preferred by many New England farmers, and the stock has done very well in New England. Price, 35c lb.; \$30.00 per 100 lbs.

Dwarf Essex Rape

Clovers

(Prices variable, subject to market changes.)

Clovers are the foundation of permanent agriculture in the North and East. They have the faculty of taking nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap-roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

Medium Red (Trifolium pratense). This is the common Red Clover and by far the most important variety for the practical purposes of agriculture. 60 lbs. to the bushel. Price per lb., 60c; per 100 lbs., \$55.00.

Mammoth Pea Vine (Trifolium pratense magnum). Of ranker growth than Medium Red and usually lasts longer; excellent for plowing under to improve exhausted soils. 60 lbs. to the bushel. Price per lb., 65c; per 100 lbs., \$60.00.

Alsike, or Swedish (Trifolium hybridum). The hardiest of all clovers; it resists cold and extreme drought, and for low, wet land is invaluable; excellent for bees. 60 lbs. to the bushel. Price per lb., 45c; per 100 lbs., \$40.00.

White Clover (Trifolium repens). This variety should be included in all mixtures for lawns and permanent pastures. It is adapted to all soils. 60 lbs. to the bushel. Price per lb., 75c; per 100 lbs., \$65.00.

Crimson Clover (Trifolium incarnatum). Also known as Scarlet, or Carnation Clover. A rapid-growing annual of great value where only one crop is desired; excellent as a cover crop in orchards, or for plowing under to improve poor soils. 60 lbs. to the bushel. Price per lb., 30c; per 100 lbs., \$25.00.

Southern Cow Peas

(Vigna Catjang)

Make Poor Land Rich

The plowing under of green crops is one of the best and cheapest ways of improving the soil. For this purpose the Cow Pea is most popular, especially for medium or light soils. Seed should be sown in May or June at the rate of 1½ bushels per acre and the plants plowed under as soon as they have attained their full growth. (Prices subject to market changes)

Clay, or Wonderful. Has matured in New England. Qt.,

25c; bu., \$6.00. New Era. Early and large yielder. Qt., 25c; bu., \$6.00. Southern Black Eye. Immense cropper. Qt., 25c; bu., \$6.00. Whippoorwill. One of the earliest. Qt., 25c; bu., \$6.00.

Soja Beans

(Prices subject to market changes.)

One of the most valuable and important forage and soil-improving crops.

The use of this crop is increasing everywhere. Soja Beans make a larger growth than Cow Peas and can be cut and cured to better advantage. They also furnish a richer and more fattening feed than the Peas, since they contain larger amounts of oil and protein. These properties make Soja Beans particularly valuable as a feed for milch cows and as a general forage crop. When cut together with Corn for the silo, they greatly improve the quality of the feed.

Yellow Soja. A large-growing, yellow-seeded variety, especially suitable for ensilage and plowing under. Sow at the rate of one bushel per acre. Qt., 20c; pk., \$1.50; bu., \$5.00.

Medium Green. An earlier maturing variety than Mam-moth yellow. Producing a larger yield of Shell Beans but not such a rank growth of forage. Recommended for planting in New England because of its earliness. Per qt., 35c; per pk., \$2.25; per bu., \$8.00.

Ito San. An early, small-leaved variety recommended for latitudes having short season, especially New England. Pricc, per qt., 35c; per pk., \$2.25; per bu., \$8.00.

Wilson. A rank growing variety, branching high, leaves large, both pods and leaves remaining on vines long after cutting. Price, per qt., 35c; per pk., \$2.25; per bu., \$8.00.

(Special prices quoted for large quantities.)

Rape—Dwarf Essex, English

Is easily grown, perfectly hardy and possesses remarkable fattening properties. Under ordinary field conditions the plants reach height of about 4 feet; the roots being strong growing, penetrate the soil to a considerable depth.

Rape is especially adapted to cool, moist conditions, such as prevail in New England, and for its best development requires a loamy soil, moist and rich; ground that has produced good crops of corn, turnips and cabbage will be found very suitable for Rape. Plant seed in New England from May 1 to middle or last of July in average seasons.

In preparing the land for the seed, take every care possible to have it free from noxious weeds. Have the ground well pulverized with a harrow, thereby giving a deep, mellow seed bed.

Dwarf Essex Rape will be found to resist summer drought if care is taken to get the plants well started before extreme summer heat may be expected. For sowing in drills, about 10 lbs. of seed per acre is required; broadcast 15 lbs. per acre. Per lb., 20c; per 100 lbs., \$18.

MISCELLANEOUS SEEDS

For Forage Crops, Plowing Under, Etc.

(Prices subject to market changes.)

Peas, Canada or White Field. Unsurpassed as a green feed for milch cows. Usually sown with oats. Per lb., 12c; per 100 lbs., \$10.00.

Broom Corn, Long Brush Evergreen. Succeeds best in good, deep, moderately moist soil. Sow 12 quarts per acre, after danger from frost is past. Lb., 15c; per 100 lbs., \$10.00.

Spurrey (Spergula arvensis). Annual. This plant will grow in land too dry and too thin to support clover. The crop may be fed either green or as hay. It grows very rapidly and is in condition to pasture sheep or cattle on about six weeks after sowing. Sow broadcast. 20 pounds per acre. Lb., 30c; per 100 lbs., \$25.00.

Sudan Grass

Very closely related to the sorghum family, is a native of Sudan, Egypt, where it has withstood hot winds and drought for years. The United States Department of Agriculture, in their search for a valuable hay or forage plant, discovered it and in 1909 secured a half pound of seed for experimental purposes. From this small beginning it has become one of the principal forage crops of the Southwest, and last season was grown successfully in many parts of the country, and experimentally in perhaps every state of the Union. Under these wide and varied climatic conditions the results were so satisfactory that it is not only destined to be one of our greatest hay and forage plants, but is already firmly established as such. Price 30c per lb.; \$25.00 per 100 lbs.

Description.—Sudan Grass is an annual of quick growth -the first crop being ready to cut in fifty to seventy days after planting, depending upon the length of seasons and moisture; the second and third crops about forty-five or fifty days later, respectively. It stools freely, sometimes as many as one hundred stems coming from one seed. It dies with killing frost, and has a short stalk root, which is easily eradicated. It is a strong drought resister.

It does well almost anywhere, and especially flattering results have been obtained under irrigation. seeded broadcast or in drills, it averages three to five feet in height, with stems about the size of a lead pencil. If grown in rows and cultivated, it reaches a height of six to nine feet, with somewhat larger stems. Like sorghum, it is easily injured by frost, and the number of cuttings depend upon the length of the growing season. In favorable years where growing period is long, as many as three and sometimes four cuttings can be obtained in one year. But in Northern sections where seasons are shorter, perhaps but two cuttings can be counted on.

Soil.—Sudan has been grown successfully on almost every class of soil from heavy clay to light sand, doing best on a rich loam, but, of course, on light sandy soil a light yield may be expected. In any case, it should be well drained.

Seeding.—The ground should be prepared as for corn and the seed not planted till soil becomes warm. It can be planted in this latitude from about May 1st to July 1st. Sown broadcast use sixteen to twenty-four pounds of seed per acre. If planted in drills 18 to 24 inches apart, from four to six pounds per acre will be sufficient.

The trial plot illustrated above was planted on the dryest, poorest piece of ground we could find in our trial ground; the growth and crop was most surprising. We found that all farm animals relished Sudan Grass whether as green forage or hay. Two good crops were obtained from this trial plot.

Part of a trial plot of Sudan Grass planted in our trial ground at Lexington, season of 1916

Millets

Hungarian Grass (Panicum Germanicum). This species of Millet is comparatively small and fine in its habit of growth. It is one of the most profitable hay and soiling crops, often yielding over three tons per acre. No other Millet adapts itself so readily to various conditions of soil and moisture. Broadcast at the rate of one bushel per acre. Weight 48 pounds per bushel. Per lb., 12c; \$10.00 per 100 lbs.

Japanese Millet, Japanese Barnyard Grass (Panicum Crus Galli). Distinct from other varietics. An enormous cropper growing over 6 feet in height; excellent either green or as cured hay. Broadcast at the rate of 25 pounds per acre, or in drills 18 inches apart, sow 15 pounds to the acre. Weight about 35 pounds per bushel. Per lb., 15c; \$12.00 per 100 lbs.

Liberty or Golden Millet (Panicum Miliaceum var.). improved, medium early variety, growing from 3 to 5 feet high. The heads are closely condensed though the spikes are numerous. During the past few years, the fact has been established beyond doubt that Golden Millet seed grown in Southern latitudes will produce much larger yields of hay than seed grown in Northern or Western sections of the country. All our seed is Southern grown. Weight 50 pounds per bushel. Per lb., 12c; \$10.00 per 100 lbs.

Pearl Millet. A valuable and productive fodder plant. Seed should not be sown until after danger from frosts is past. Sow about 10 pounds per acre in drills 18 inches apart. Per lb., 30c; \$25.00 per 100 lbs.

Sorghum

Twenty-five pounds per acre is sown in drills. For dry fodder, broadcast 100 pounds per acre.

Early Amber Sugar Cane. Will ripen where Indian corn matures. Per lb., 12c; 100 lbs., \$8.00.

Red Kaffir Corn, or Sorghum. Non-saccharine. The plants which are stocky and perfectly erect cure into excellent fodder, or may be fed green during all stages of growth. Per lb., 12c; per 100 lbs., \$8.00.

White Kaffir Corn. Per lb., 12c; per 100 lbs., \$8.00.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

Timothy, or Herd's Grass

Cover and Soiling Crops for Orchards

One of the most important points in successful orcharding is the intelligent use of proper cover crops, and the orchardists of New England are giving this particular subject more and more careful attention, as the proper use of such crops conserve the nitrates in the soil after the growth of fruit trees is stopped, which would otherwise be washed away by the heavy fall or winter rains. They also help to break up, during time of their growth, the old sod, and later in the season when plowed under, furnish humus for the soil.

We can recommend the following cereals and legumes as the best suited for cover crops under New England climatic conditions:

Winter Rye. Sow at the rate of 1½ to 2 bushels per acre; this can be sown from the middle of August up to the time the ground freezes late in the fall.

Japanese Buckwheat. Sow at the rate of 1 to 1½ bushels per acre. Especially valuable where it can be sown early in spring on newly plowed sod land, as it is very effective in rotting down the old sod and at the same time enriching the soil.

Yellow Soya Beans. 11/2 to 2 bushels per acre. These do best if sown in drills about the middle of June and cultivated several times to promote vigorous growth.

Winter Vetch (Vicia villosa). If sown alone, use 1 bushel to the acre broadcast. In this latitude it should be sown before September 15th, so that it may be well rooted and established before cold weather. One of the best to cover and protect the ground during the winter.

Crimson Clover. Sow at the rate of 15 to 20 lbs. per acre the last of June or first of July, and plow under early the following spring.

AGRICULTURAL GRASSES

(Prices quoted are subject to market changes, net

f. o. b. Boston, bags extra.)

The following list of Agricultural Grasses includes the varieties used most extensively in permanent pasture and other grass mixtures.

We make a specialty of mixtures for permanent pasture and mowing lands, to which we would call attention. Directly following these descriptions is a set of tables giving complete information about our special mixtures.

Awnless, or Smooth Brome Grass (Bromus inermis). An erect-growing perennial that attains a height of from three to five feet. It is especially recommended for dry and arid soils where the more delicate grasses will not Weight, 12 lbs. per bushel. 20c lb.; \$15.00 100

Creeping Bent or Firoin (Agrostis Stolonifera). The distinctive feature of this species is, as the name implies, its compact, creeping, rooting stems. It prefers low hottom-lands, especially if they are somewhat sandy. It is rapid of growth, and spreading habit, and the stoloniferous roots form a strong enduring turf, that is positively improved by constant tramping. Being of fine texture, it is one of the most valuable of our lawn Weight, 15 lbs. per bushel. 50c lb.; \$48.00 grasses. 100 lbs.

TIMOTHY

Timothy (Herd's Grass or Catstail) (Phleum Pratense). Perennial. Roots are fibrous in moist soils, but in dry soils often become bulbous; blooms in June and July. While this grass is commonly known as Timothy, it is frequently called Herd's Grass, as this is the name under which it was originally cultivated. It is the most valuable grass for hay, especially in the North, thriving best on moist, loamy soils of medium tenacity. Grows very readily and yields, on favorable soils, three or four tons of best quality hay per acre. Should be cut just when the blossom falls. Weight, 45 lbs. per bushel. 20c lb.; \$18.00 per 100 lbs., subject to market changes.

Bromns inermis

Red Top

Orchard Grass (Dactylis glomerata). Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, its luxuriant aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, it withstands droughts better than most species. Weight, 14 lbs. per bushei. 35c lb.; \$30.00 100 lbs.

Kentucky Blue Grass (Meadow Grass, June Grass, Spear Grass) (Poa pratensis). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, although some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North; in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. As Kentucky Blue Grass requires two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, it is not suited for alternate husbandry, where the land is to remain in grass two or three years and then to be plowed up. Weight, 14 lbs. per bushel. 40c lb.; \$35.00 100 lbs.

Red Top (Herd's Grass) (Agrostis Vulgaris). Root creeping; perennial; flowers in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a finc permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils, producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the clover soon disappears, followed by the Timothy, the Red Top usually taking their places, and with some wild indigenous grass forming a close sward. When sown alone, 4 bushels of unhulled, or 20 pounds of the clean seed per acre are required. Weight, unhulled, 10 lbs. per bushel; fancy or clean, 40 lbs. per bushel. Price, unhulled seed, 20c lb.: \$15.00 100 lbs. Fancy, or clean seed, 35c lb.; \$30.00 100 lbs.

Italian Rye (Lolium Italicum). Annual. In nutritive value, earliness and quickness of growth after it has been mown, it far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate busbandry, but as it does not last over two years it is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile and tenacious or of a medium consistency, and on such soils it is said to be one of the best grasses known to be cut green, affording repeated luxuriant crops. Weight, 18 lbs. per bushel. 22c lb.; \$20.00 100 lbs.

Meadow Foxtail (Alopecuris pratensis). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering. Weight, 8 lbs. per bushel. 40c lb.; \$35.00 100 lbs.

Crested Dog's-Tail (Cynosurus cristatus). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures for lawns. Weight, 28 lbs. per bushel. 45c lb.; \$40.00 100 lbs.

Meadow Fescue, or English Blue Grass (Festuca pratensis). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always mixed with other grasses. Weight, 15 lbs. per bushel. 25c lb.; \$20.00 100 lbs.

Sheep's Fescue (Festuca ovina). Somewhat creeping; perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suitable for lawn mixtures. Weight, 12 lbs. per bushel. 40c lb.; \$38.00 100 lbs.

Fine-Leaved Fescue (Festuca Tenuifolis). This is really a variety of Festuca ovina with much finer leaves. It will grow on very dry and inferior soils, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. It stands grazing well, is very hardy, and lasts long, and may therefore be recommended for permanent pasture on bigb and dry situations. Weight, 22 lbs. per bushel. 80c lb.; \$75.00 100 lbs.

Tall Fescue (Festuca elatior). Root fibrous, somewhat creeping; perennial; flowers June and July. In appearance this species resembles the Festuca pratensis, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils. Weight, 15 lbs. per bushel. 60c lb.; \$50.00 100 lbs.

Rough Stalked Meadow Grass (Poa trivialis). Root flbrous; perennial. This grass is valuable on account of its quick growth, productiveness and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the spring, and continues green until late in the fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Does not thrive well on dry soils. Weight, 14 lbs. per bushel. Not procurable at present.

Orchard Grass

Rhode Island Bent (Agrostis canina). Root creeping; pcrennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and lawns. Soil and treatment same as for Red Top (A. vulgaris). Weight, 10 lbs. per bushel. Price on application.

Perennial Rye (Lolium perenne). A very valuable grass; arrives early at maturity and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very early spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers. Weight, 24 lbs. per bushel. 25c lb.; \$20.00 100 lbs.

Pacey's Short Seeded Perennial Rye. For use in golf courses, lawns, etc. 25c lb.; \$20.00 100 lbs.

Hard Fescue (Festuca duriuscula). This is one of the best grasses of the Fescue family. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists summer drought, and develops remarkable verdure during winter. It should form a part of every mixture for lawn or pleasure grounds, as well as for permanent pasture and alternate husbandry. Weight, 14 lbs. per bushel. Not procurable at present.

Sweet Vernal (Anthoxanthum odoratum). Root fibrous; perennial; flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flower stalks till the end of autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, being largely used for this purpose. Weight, 11 lbs. per bushel. 65c lb.; \$60.00 100 lbs.

Red or Creeping Fescue (Festuca rubra). This grass grows on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated sheep pastures. Weight, 13 lbs. per bushel. Price, 40c lb.; \$38.00 100 lbs.

Yellow Oat Grass (Avena flavescens). This grass descrives to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils. Weight, 11 lbs. per bushel. 95c lb.; \$90.00 100 lbs.

Tall Meadow Oat Grass (Avena Elatior). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds bost on deep, sandy lands, and is suitable for sowing in orchards or other shady places. Weight, 15 lbs. pcr bushel. 30c lb.; \$28.00 100 lbs.

Wood Meadow Grass (Poa nemoralis). Root fibrous; flowers in June and July. This grass, as its name implies, is found naturally in woods and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees, on pleasure grounds. Weight, 14 lbs. per bushel. Not procurable at present.

Various Leaved Fescue (Festuca heterophylla). A very early hardy perennial, two to three feet high, thriving best in cool, moist soils. It yields heavily and is a valuable grass in mixtures for permanent meadows, either for mowing or grazing. Its great production of root-leaves makes it an excellent bottom grass. It grows well in the shade and is suitable to form part of a mixture for shaded lawns. Weight, 15 lbs. per bushel. 40c lb.; \$38.00 100 lbs.

Perennial Rye Grass

ALTERNATE HUSBANDRY

All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that are of slower growth.

If a mixture principally for mowing is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds, when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, in consequence, would be very much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it

has however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence, when we see an old field of grass that was originally sown with Timothy, Redtop and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixture practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equalled first crops of Timothy.

While it is true that the mixtures which we recommend are *seemingly* much more expensive than those commonly used, it should be borne in mind that a vastly increased value is given to the pasture not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the *ordinary* sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

Breck's Special Mixtures for Permanent Pastures

PERMANENT GRASS SEED MIXTURES FOR GOLF LINKS

In order to better serve our customers and give them Golf Mixtures that are best adapted to the soils and climate of New England, we have made careful study and comparison of the mixtures used on the finest Golf Links in Scotland and England. Our mixtures are the result of many years' experimenting and study in search of grasses that would make the finest and most permanent courses and greens.

Some of the largest and best golf clubs in this section of the country have used our mixtures and we have yet to hear of unsatisfactory results.

No. 1. For Putting Greens. This mixture should be sown at the rate of 80 pounds per acre. Per lb. 35 cts.; per 100 lbs. \$30.00.

No. 2. For Fair Greens upon light and dry soils. Per lb. 40c.; per 100 lbs. \$35.00.

No. 3. For Fair Greens upon low and damp soils. Per lb. 35c.; per 100 lbs. \$30.00.

Mixtures Nos. 2 and 3 should be sown at the rate of 50 pounds per acre.

Railroad Sta. and Express Office Eastview, N. H. Post Office Peterboro, N. H.

JOSEPH BRECK & SONS, INC., Boston, Mass.

Dear Sirs: —A year or two ago we bought of you some grass seed which was of a special kind to be used for golf greens. It was excellent for the purpose and we could ask for nothing more satisfactory. Have you any of these seed in stock at the present time, and if not, can you inform us where we can get it or something equally good? Please quote prices.

(Signed) SARGENT CAMP, INC.,

July 7, 1916.

By B.C. Willard, Treas.

Kentucky Blue Grass

Breck's Special Mixtures for Mowing and Grazing Lands

Note.—It will be noticed that the different tables are all based on the quantity required to sow one acre. When ordering, simply give number and kind of mixture selected and the number of acres for which seed is desired; for example: "Send me No. 2 Mixture for Permanent Pastures for three acres."

Breck's Lawn Grass Seed

Smooth, firm, ever-green lawns from Breck's Lawn Grass Mixtures

Breck's Standard Lawn Grass Seed

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the pro-

per blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country.

One quart will sow 300 sq. ft........Price per qt. \$0.35 Two quarts will sow 600 sq. ft......Price per 2 qts. .65 One half peck will sow 1,200 sq. ft...Price per ½ pk. 1.25 One peck will sow 2,400 sq. ft.....Price per pk. 2.00 One bush. will sow 10,000 sq. ft.....Price per bush. 7.00

Four bushels will sow one acre.

Boston Park Lawn Grass

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them.

Per pound\$0.45
Per peck, 8 pounds 3.25
Per bushel, 32 pounds

Two bushels will sow one acre.

Breck's "Shady Spot" Lawn Grass

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare

and unsightly spots will be prevented. Per qt., .35; per 2 qts., .65; per ½ pk., 1.25; per pk., 2.00; per bushel, 7.00.

Breck's Bank and Terrace Grass Mixture

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt., .35; per 2 qts., .65; per ½ pk., 1.25; per pk., 2.00; per bushel, 7.00.

Sterlingworth Lawn Compound

Kills the weeds but not the grass and makes the lawn green and velvety.

It seems incredible that a preparation can be made which will kill the weeds in lawns without injuring the grass. This is exactly what "STERLINGWORTH LAWN COMPOUND" will do and also it will help the grass to grow green and greatly improve the sward. It absolutely destroys Dandelions, Plantain, Chickweed and all weeds with hairy surfaces or broad leaves. It is a dry sandy powder to be applied by sprinkling over the grass.

Five pounds will dress 500 to 700 square feet. Full directions for use on each package. Prices: 5-lb cans, 60c; 10-lb. cans, \$1.00; 50-lb. kegs, \$4.00; 100-lb. kegs, \$7.50

Valuable Table for Planting

NAME OF	WHEN	TO PLANT	DEPTH to PLANT	DISTANCE APART	TIME OF
VEGETABLE	HOT BED	OPEN GROUND	Inches	Inches	MATURITY
Artichoke, Globe	March	May	1/2	Transplant 24 x 36	September to frost

Directions for Making and Caring for Hot-beds

Early in March obtain a good quantity of fresh horse manure, mix with it one-third to one-half its bulk in leaves, and by tramping down the mass in layers, make a large pile, so that the fermentation will continue even in very cold weather. When this fermentation shows, by the escape of steam from the pile, turn it over and allow it to remain so for a few days or until the second fermentation shows; then place the manure in a pit at least 2½ feet deep and tread it down firmly in layers to a depth of about 2 feet. Build your pit in a sheltered spot, facing the south or east if possible and line with heavy planks or concrete. The frame used to support the sashes covering the bed should be raised 6 inches higher at the back than the front, to give proper slope to the sash to catch the sunlight.

After the manure is firmly trodden down in the pit, scatter over the surface a good covering of air-slaked lime, to keep all slugs, worms, and other pests from infesting the surface soil. After this is done, fill in about 4 or 5 inches of good, rich, clean-sifted loam, level off and place a thermometer therein. Put on sashes and let the frame remain closed until the thermometer registers about 70 to 75 degrees and remains steady. Sow your seed, covering it lightly. Keep the surface moist by an occasional watering with a fine spray. As the seedlings appear it is advisable to allow them a little air each day to prevent them damping off; when the plants are large enough they can be thinned out, transplanted into boxes or small pots and placed back in the warm frame.

BRECK'S HIGH GRADE FLOWER SEEDS

Our carefully revised list of species and varieties of merit, contains chiefly those of comparatively easy culture. A small sum expended for seeds of any of these plants will bring full measure of enjoyment and satisfaction to the purchaser. In general, the finest garden effects are produced by mass-displays, especially where the plants are set in borders or where the flowers will have backgrounds of shrubbery. The best use of individual specimens is in pot-culture. The present tendency in this country to bring hardy perennials into more general cultivation is encouraging, for it attests an increasing love of flowers among the people, but this trend should in no way cause annuals to decline in popular favor. Both groups are indispensable; the perennials for permanent effects; the annuals for variety.

HALF-HARDY PERENNIALS AND BIENNIALS.—It is usually best to start seeds of these plants indoors, but they may be sown in the open like those of hardy varieties.

STARTING PLANTS INDOORS .-- Any fine, sandy loam will answer, but if possible make a mixture of equal parts of light soil, leaf-mould and sand. Boxes, two or three inches deep, shallow pots, and seed pans,-filled to onethird their depth with small pieces of broken pots or other coarse material, to insure good drainage-are satisfactory containers; fill them within about three-fourths of an inch of the tops, pressing the soil down firmly, and water thoroughly a day before sowing. Distribute the seeds evenly but not too thickly, cover not over an eighth of an inch deep, and press the soil down upon them with the hands or a piece of board; then water with fine spray. It is a good plan to cover each seed pan or flat with a sheet of newspaper, until after germination, to prevent the soil from drying out too rapidly, but see to it that plenty of air gains admittance. Keep in a sunny window near the glass in a temperature of from 60 to 70 degrees; water carefully when necessary, and before the seedlings begin to crowd transplant into two-inch pots or set them an inch or more apart each way in other shallow boxes or pans. It may be necessary to transplant a second time before the weather is suitable for setting out.

OUT-OF-DOOR CULTURE

PREPARATION OF THE SOIL.—Needless to say, thorough preparation of the soil is the first essential of successful flower-culture. Choosing a sunny situation, dig the ground deeply and mix plenty of manure or fertilizer with the soil, raking out all loose stones and tufts of roots or grass. When the surface is smooth and firm, the bed is ready for planting.

SEED SOWING.—Seeds should be sown in pulverized soil and covered lightly to a depth equal to about three times their diameter. Exceedingly small seeds often do not need covering; pressing them into the soil with a board is sufficient.

SUBSEQUENT CARE.—After the seed is sown little care is required beyond occasional watering and weeding, with enough loosening of the soil so that the plants may receive the full benefit of rains and dews.

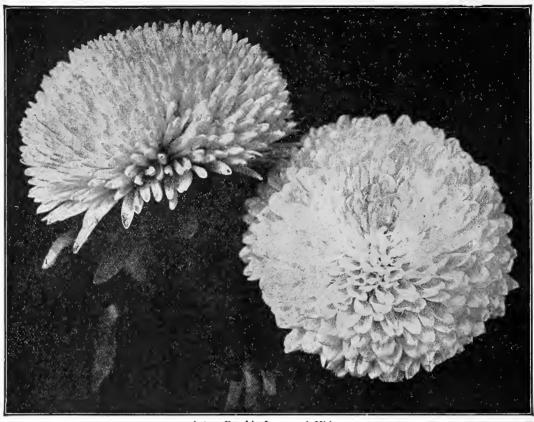

HARDY ANNUALS.—Plants of this class are of the simplest culture. Seeds should be sown out of doors as early in spring as the ground can be prepared properly. Frequently a second sowing is made a week or two later, to insure a longer flowering-season.

HALF-HARDY ANNUALS.—The seeds of these plants require a higher ground-temperature for germination than the preceding, hence they should be sown later,—usually during the latter part of May.

TENDER ANNUALS.—These seeds are sown indoors about March 1st, and the plants set out in the garden when the ground is thoroughly warm and the weather settled.

HARDY PERENNIALS AND BIENNIALS.—These may be treated like Hardy Annuals; or the seeds may be sown in July or August and the plants covered, after frost sets in, with a light litter of leaves or straw.

Breck's Choice	E List of Asters
Breck's Choice BRECK'S CHOICE LIST OF ASTERS The demand for Breck's Asters from the leading commercial and private growers all over the United States is a sufficient recommendation of their superiority. We welcome a comparison of the product of Breck's seeds with that of the most highly lauded. Cultivation.—Sow in fine soil, and cover lightly in shallow boxes, which should be set in the greenhouse or a sunny window. Keep moderately moist until the plants are well up, then transplant, three inches apart. 265. BRECK'S INTERNATIONAL PRIZE MIXTURE.—This comprises all the best varieties and finest colors of large-flowering Asters. Oz. \$3.50 \$1.00 \$0.10 ASTERMUM.—This is a beautiful new type of Aster. The flowers are of enormous size with very full centers. The plant is of sturdy growth with long, straight stems. This new departure in Asters should be welcomed by all Aster lovers.	right habit, their growth is very vigorous and they produce long graceful stems to support their enormous flowers
415. Lavender	260. BRECK'S DAWN OF DAY.—One of the earliest-flowering white Asters yet raised; it flowers about 10 days ahead of Queen of the market. Of perfect form, erect growth, and long stems with pure white flowers 261. HERCULES.—This is an Aster raised from the large white variety of Hercules first offered in 1905. The plants grow in a semi-dwarf compact form about 20 inches high and produce immense and beautiful flowers of a rosy lilac shade. One of the most refined of all Asters

		(COLD)
262. ECLIPSE.—The flowers of this beautiful and distinct variety are of immense size, often measuring 6 to 7 inches aeross. Pure white with thread-like florets and very double	½ oz.	Pkt.
SINGLE JAPANESE ASTER.—A new sort, reminding one of the single blooming Japanese Chrysanthemum; flowers in two colors, white and delicate rose, both having yellow central disks, encircled by long quilled petals, giving the bloom an unusually graceful and uncommon aspect. Plants make a large number of strong side stalks, right from the base of the main stem, making it a good sort for cut flowers, or for a late summer bedding variety. 263. White		.15
264. Delicate Rose		.15 .15
287. GIANT WHITE EMPRESS.—This excellent variety is of very strong and sturdy growth. The flowers are of the purest white and very double, measuring five to six inches across		.15
finest Asters having quilled petals; flowers large and quite double. 2 ft BRECK'S GIANT JAPANESE.—An improved type of the Giant Comet, with long wavy, twisted petals, flowers of good substance and well formed. 2½ ft.	.30	.10

323. Salmon 4.00	1.25	.10
324. Mixed Colors 4.00	1.25	.10
268. QUEEN OF ITALY.—This is an Italian introduction and has been named the Queen, as it will doubtless range foremost amongst all Asters. It grows about 28 inches high and bears giant flowers 5 inches in diameter, on long and graceful stems. The flowers are very double and of a distinct chamois color. BRECK'S IMPROVED MIDSUMMER.—These Asters comprise a collection of mid-season varieties, distinguished by their delicate shades of color. The plants are very vigorous, upright in growth, and produce stems of good length. The large flowers are so double as to be veritable balls of bloom. 2 ft.		.25
325. Giant Pink. Lovely light pink		.25
326. Lavender. A very delicate shade of blue		.15

Ageratum Blue Perfection

AGERATUMS

n many respects this Half Hardy Annual is

one of the most desirable summer flowering plants we have. It may be used alone for beds and borders, or planted in connection with geraniums, coleus, cannas, etc. The plants grow well almost anywhere. If the seed is started in a box in the house, or in a hot-bed in the beginning of April and transplanted to where they are intended to bloom about the end of May, an abundance of flowers will be produced until hard frost. Seed sown in August will produce plants for winter flowering. Oz. Pkt. 5. Ada Bowman. Light blue; fine for beds or edgings, 9 inches...... \$1.00 \$0.10 6. Blue Perfection. SWEET ALYSSUM

The Sweet Alyssum is a Hardy Annual so well known and such a general favorite that it is searcely necessary to call special attention to it here. It is of the easiest culture both indoors and out, and is suitable alike for beds and edging in summer or for growing in pots and boxes for winter blooming. It will stand considerable cold in the open ground and may be sown early; it blooms throughout the entire season until destroyed by hard frost. For winter flowering sow the seed in August or September.

114. Lilac Queen. Distinct new variety of the annual Sweet Alyssum with pure lilae flowers. The plants are of dwarf, compact, upright growth and resemble when in full bloom a tiny Candytuft. Equally as useful for earpet-bedding or ribboning as the other white flowering dwarf varieties......

Antirrhinum

ANTIRRHINUM

(Snapdragon)

These showy perennials can be treated as annuals by sowing the seed under glass during January or February. The tall sorts are fine in borders. The dwarf make splendid bcds. They prefer a light, warm, but a well enriched soil. Seed sown outdoors in May will produce shout the same temperature and treatment as require about the same temperature and treatment as carnations. Most of the varieties are fairly hardy and will live through winter if well covered. Three good Greenhouse varieties which we consider the

best for use under glass:

Nelrose. A beautiful shade of silvery pink.

Phelps White. Very free-flowering pure white.

Silver Pink. True silver pink.

AQUILEGIA

This family is one of the most beautiful and

(Columbine)

popular among hardy perennials. The dif- ferent varieties present an unusual wealth of color and form. For growing in borders or filling up bays in shrubbery they are unsur- passed. Seed sown in the house, in March		
will frequently produce bloom the same year. It is best, however, to sow seed out of doors when ground warms up. Any ordinary garden soil is suitable for their growth. The flowers are fragrant.	¼ oz.	Pkt.

CALCEOLARIA		
Sow in pans or shallow boxes filled with light soil in the greenhouse in a temperature of 56 to 60 degrees. Cover seed about 1/32 inch with fine sifted soil and press firmly with a board. Water with a fine spray when necessary, never allowing the soil to become dry. When large enough transplant to small pots.		
550. Breck's Scotch Prize. Mixed. Grown for us by a specialist, and is a great improvement in these gorgeous plants. Flowers are beautifully blotched and striped in exceedingly rich colors of yellow, maroon, crimson, white, etc.		.50

Calendula (Pot Marigold)

CALENDULA

(Pot Marigold)

"The Marigold of Shakespeare's time." One of		
the most popular and easily grown hardy		
annuals. The plants are free-flowering and		
do well in almost any situation, although		
they prefer a warm, loose soil. They bloom		
the whole season. It is usual to sow the		
seeds where the plants are intended to stand,		
but they will bear transplanting. Calendula		
make good pot plants and flower freely dur-		
ing the winter.	Oz.	Pkt.

Campanula Calycanthema

CAMPANULA

Very well-known, useful and attractive annuals, biennials and perennials. The annual varieties should be sown in April or May, the biennials in May or June, and the perennials in June and July.

Biennial Varieties

CALYCANTHEMA (the popular cup and saucer Canterberry Bell).—It is without doubt the finest type of this old-fashioned and beautiful garden plant. The calix, which is extra large and of the same color as the trumpet, enhances the beauty of the flower and gives it the appearance of a cup and saucer. When grown in pots for conscrvatory decoration the plants are very effective; they transplant well. 2½ ft. Oz.

Celosia Cristata Nana

CELOSIA

(Cockscomb)

The Cristata sorts have become very popular for bedding; their beautifully formed, highly colored flowers are very attractive and effective. The Plumosa class is splendid in both foliage and flower, very suitable for vases, borders, etc. The "Ostrich Feather" produces large plumes, beautifully curved and curled. Seeds should be sown in a hotbed in March or April and transplanted to pots when large enough to secure early flowers.

Centaurea

CENTAUREA

C. Cyanus is the favorite Bachelor's Button, or Ragged Sailor. This class is of the easiest culture and produces an abundance of bright colored and beautifully formed flowers throughout a very long season. The strain of seed we offer embraces everything desired in color and form. Sow seed early outdoors and thin out the plants to 6 or 8 inches apart, or in boxes in the house, and transplant when large enough.

Calliopsis, Fire King

Coreopsis (Calliopsis)

COSMOS

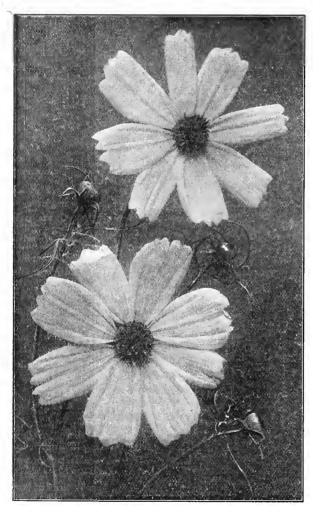

(Cosmea)

We especially recommend Breck's Massachusetts grown Cosmos as the most desirable and most satisfactory for growing in New England. Under ordinary cultivation they will begin to bloom in July and continue up to frost. The flowers are of good size and delicate shades. Sow seeds of Breck's Early Flowering varieties in open ground, in light warm soil, early in May and cover not more than half an inch deep. The seed germinates in about ten days. The Cosmos must have the full sunshine for successful growing. High-grade fertilizer, rich in potash, such as Breck's Lawn and Garden Dressing, gives best results. Seeds of the later varieties should be sown early in March in a hotbed or box in the house. When plants are 2 inches high transplant into 2-inch pots, when well established repot into 4-inch pots. Transplant to open ground in June.

BRECK'S NEW EARLY GIANT.—This wonderful New Cosmos makes a bushy plant and grows 4 to 5 feet high. It begins to bloom about the middle of July and bears large flowers 4 inches or more in diameter. The foliage is the same as the Late Flowering. Seeds should be sown in house or hotbed but can also be sown outdoors early in May. ¼ oz. Pkt.

.10

MESSRS, JOS. BRECK & SONS,

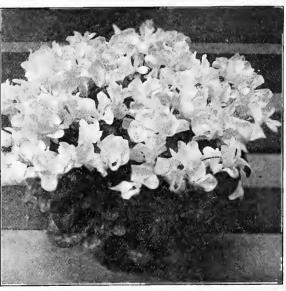

MESSRS, JOS. BREUK & Sound,

Dear Sirs:—

The seeds you supplied me have produced a most wonderful display of flowers and have been the admiration of all who have seen them, and I have received many compliments which I feel is part due to the "House of Breeks" for supplying really reliable seeds.

Yours truly,

(Signed) FRANK HILL.

Cyclamen. Breck's Imperial Strain

CONVOLVULUS

(Morning Glory)		
Convolvulus Major is the old favorite, and grows rapidly to a height of 10 feet. The		
other two sorts are new and fine, especially the Japanese Morning Glory. They bear		
large and wonderfully colored flowers. The		
dwarf Morning Glory is suitable for growing in clumps or beds, and fine for hanging		
baskets, window boxes, etc.	0-	DI-4
915. Major (Morning Glory), hA, mixed colors	Oz. .15	Pkt
916. Imperial Japanese, 20 ft., hA, mixed		
colors. A specially selected strain with a wonderful range of colors; the flow-		
ers are of enormous size, many of them		
being spotted, marbled, striped, flaked and splashed	.50	.10
917. Purpurea, Fl. Pl. (Double Morning	•••	•= (
Glory), hA, white and red	.50	.10
1 ft., hA, varied colors	.80	.03
906. Rose Queen, 1 ft., hA, rose 907. Splendens, 1 ft., hA, violet	.50	.10
908. White, 1 ft., hA, white	.50 .80	.10
909. Mixed Colors. 1 ft	.20	.0:
910. Mauritanicus, 1 ft., hhP, blue	1.00	.16
growth, with large bell-shaped flowers. Seeds		
started in heat, setting them on edge and		
covering with half an inch of soil, will flower the first season. Half-hardy perennial.		
832. Scandens. Purple	1.00	.10
833. Scandens Alba. Pure white	1.50	.13
840. COIX LACHRYMA (Job's Tears). Hardy annual. 1½ ft. An annual grass extensively		
grown for its pearly seeds which are used		
to make strings of beads for children	.20	.0
coleus.—Bedding plants with beautifully colored foliage. Easily grown from seed. The		
dwarf, large-leaved strain is especially de-		
sirable. The colors range from light to dark red; leaves beautifully marbled and		
spotted. Tender perennial.		
845. Choicest mixed, 2 ft		.2

1101. Monstrosa Superba. Mixed, 3 ft	1.50	.10
1102. Mixed. 3 ft	.50	.05
DICTAMNUS (Dittany, or Gas Plant).—An old garden favorite with fragrant, glossy foliage that gives forth an odor like lemon when rubbed in the hands; a great favorite with bees.		
1090. Fraxinella. Purple	.50	.10
1091. Fraxinella Alba. White	1.00	.10

Dimorphotheca Aurantiaca Hybrids

DIMORPHOTHECA

(South African Daisy)		
	1/4 oz.	Pkt.
103. Aurantiaca. A rare and exceedingly		
rich flowering annual of easy culture. The		
plants, which are of neat branching habit,		
grow from 12 to 15 inches high and produce		
Marguerite-like blossoms 3 inches in diam-		
eter. The color, a beautiful deep golden-		
orange, is rendered more conspicuous by the		
dark disc in the center	.60	.15
1104. Aurantiaca Hybrids. These new, se-		
lected hybrids are like the parent, Dimor-		
photheca Aurantiaca, in habit and growth.		
The colors range from white to bluish and		
pinkish white, sulphur to golden yellow,		
salmon to rose and other delicate tints.		
These hybrids are a valuable addition to the		
class of plants which may be easily grown		
from seed		.15
1109. Dimorphotheca, Aurantiaca Hybrida		
Flora Plena. (For description, see Novelty		.25
page number)		.40
DAHLIA.—We offer seed from the finest col-		
lection in Europe. If the seed is started early in a hot-bed an abundance of flowers		
will be produced the same season. Dahlias		
like a rich, deep soil. The roots should be	Oz.	Pkt.
housed during winter.		
975. Cactus. Mixed		.25
976. Double Grandiflora. Mixed		.25
977. Pompon. Mixed, 2 ft		.25
979. Double Glory. Flowers vary in size from		10
1 to 3 inches and resemble Scabiosa		.10
981. Breck's Single Perfection. Mixed		.10
982. Collarette. Single, mixed		.20
983. Paeony Flowered. Mixed		.20

DATURA (Trumpet Flower).—Handsome ornamental annuals with large trumpet-shaped flowers. 2 to 3 ft. In large clumps or borders of shrubbery these produce an excel-		
lent effect. They do well on light sandy soil.	Oz.	Pkt.
990. Cornucopia. White, mottled with royal		
purple	1.00 1.00	.10 .10
992. Humilis. Double, yellow	.60	.10
994. Annual Mixed	.50	.10
1105. DODECATHEON MEADIA (Cow-slip).— An old-fashioned perennial with drooping, purple flowers, 1 ft		.10
DOLICHOS (Hyacinth Bean).—A rapid-growing, hardy annual climber with white or purple flowers which are followed by ornamental seed pods.		
1110. Lablab. Purple, 10 ft	.25	.05
1111. Alba. White, 10 ft	$.25 \\ .25$.05 .05
DRACAENA.—Beautiful ornamental foliage plants, useful for greenhouse and sub-trop- ical decoration; their graceful habit also makes them splendid bedding plants for lawns. Indivisa has narrow, green leaves. The under side of the midrib of Veitchii is		
a deep red. 1120. Australis. Green		.10
1121. Indivisa. Green	1.50	.10 .10
1125. ECHINACEA PURPUREA.—A free-flow-		.10
ering perennial with large reddish-purple flowers, 3 ft		.10
1130. ECHINOCYSTIS LOBATA (Wild Cucum-		.10
ber).—Rapid growing vine with bright green foliage and clusters of white flowers. One		
of the best annual climbers for covering old		
fences, trellises, etc. Soak the seed in water for 20 hours before sowing	.25	.05
1135. ECHINOPS RITRO (Globe Thistle).—	.20	.00
Magnificent perennial with large thistle-like heads of light blue flowers, 3 ft		.10
1145. EDELWEISS ALPINUM (Leontopodium Alpinum).—A hardy perennial plant from		.10
the Swiss Alps; star-shaped white flowers,		.25
6 inches		.23
plant with long spikes of soft flesh pink		0.5
flowers, 8 ft		.25
Pampas grass; graceful plumes, and varie-		
gated foliage	.40	.05
lent hardy perennial, producing orange flow-		
ers on stocky stems		.10
some ornamental hardy perennials, with		
beautiful thistle-like heads of azure blue, very finely cut foliage; excellent for winter		
bouquets		.10
1176. ERYNGIUM Giganteum (Sea Holly).— Handsome species with small round flower		
heads of pale blue		.10
1205. EUCALYPTUS GLOBULUS (Gum Tree). A graceful greenhouse plant of very rapid		
growth; bluish foliage		.10
EULALIA.—Beautiful ornamental grasses having long graceful leaves and plume-like spikes of red-brown flowers; excellent for		
growing in clumps. Hardy perennials, 6 ft.		1.0
1216. Zebrina		.10 .10
1220. EUPATORIUM FRASERI.—A graceful		
perennial bearing clusters of white flowers, 2 ft	1.00	.10

Eschscholtzia

ESCHSCHOLTZIA

(California Poppy)		
Large showy flowers in shades of yellow,		
orange, rose and white. The foliage is blu-		
ish green and very attractive. For a display		
in beds and borders as well as for cutting,		
these flowers are very satisfactory. The		
plants are fairly hardy and seed may be		
sown quite early where wanted to bloom.		
Hardy annual.	Oz.	Pkt

2½ inches across. 1470. Niger. White, 1 ft		.10 .20

Hollyhock, Breck's Silver Medal

HOLLYHOCK

(Althaea Rosea) All selected English Grown

Breek's Silver Medal strain of seed is superior to any in vigor of growth, texture, quantity and range of color.

Although Hollyhocks are perennials, young plants produce larger flowers and fresher colors than old ones, therefore we recommend the sowing of seed every year. Plants will flower the same year from seed sown in the greenhouse in January and grown on in pots until time for setting outdoors. Sowings can also be made from May to August for the following year's flowering; when the plants are large enough, transplant to a rich, eool soil, giving each at least a foot of space for growth. The permanent border or location in which they are set should be dug deep and well manured. Abundance of water should be supplied throughout the entire season of growth.

water should be supplied throughout the		
entire season of growth.

Kochia Trichophylla (Mexican Firebush)

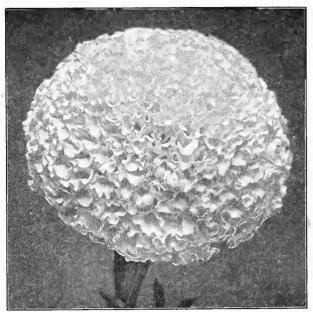

IPOMAEA

Popular rapid-growing climbers, remarkable for their showy flowers of pink, white, blue

and scarlet colors. They are excellent vines for covering arbors, trellis, etc., their luxuriant foliage combined with their fragrant flowers forming a beautiful dense screen. Oz. Pkt. 1570. Bona Nox (Evening Glory). White.... 1571. Coccinea (Star Ipomaea). Scarlet..... 1572. Heavenly Blue. Blue..... 1573. Hederacea Superba (Ivy Leaved). Blue 1574. Limbata Elegantissima. Blue and white. 1575. Mexicana Grandiflora Alba (Moon Flower). Large white flowers, 5 to 6 inches in diameter 1.00 1576. Noctiflora. White 1577. Setosa (Brazilian Morning Glory). Rose colored flowers 1581. Hybrida (Cardinal Climber). Scarlet. Considered the most beautiful and distinct type of annual climber introduced in many years. Strong and rapid grower, attaining the height of 30 feet or more with attractive foliage covered with a blaze of bright cardinal red flowers from July till frost, which are 11/2 inches in diameter, borne in clusters of 7 or 8. It delights in a warm sunny location and good soil. Sow seed indoors in April and transplant outdoors when danger from frost is past, or sow seed outdoors about May 15th where plants are wanted to bloom.....

IMPATIENS.—A fine, bushy, greenhouse plant bearing many brilliant single flowers throughout the season. Blooms almost con-		
tinuously. Perennial 1555. Sultani (Perennial Balsam). Scarlet,	Oz.	Pkt.

Breck's Sunburst Marigold

MARIGOLD

(Tagetes)

For adding shades of yellow to the garden effect in late summer and autumn the African and French Marigolds are unsurpassed. They make nice beds when grown together, the Dwarf French sorts being used for edging; both sorts are also very desirable for borders or for brightening up any bare or colorless spots. Sowings should not be made outdoors until danger from frost is passed.

MIGNONETTE

(Reseda Odorata)

Well known, fragrant favorites, delightful for working into bouquets. For winter flowering seed should be sown in July or August. All, the sorts we offer are very fine, but especial attention is called to Breek's Pride of the Market and Breck's Colossal as being particularly good and the most desirable for pot culture. A succession of bloom during both summer and winter may be had by repeated sowings.

Oz. Pkt. 1991. Breck's Pride of the Market.—This year we have secured what we believe is the best strain of forcing mignonette ever developed. The seed we offer is grown under glass, and will produce enormous spikes of reddishgreen, deliciously fragrant flowers...... .50 1990. Breck's Colossal. NASTURTIUM

(Tropaeolum)

BRECK'S RAINBOW NASTURTIUMS.—A great variety of soft and pleasing colors. The seed we offer is a selected strain and mixed in proper proportions so that our customers may be assured of having all the effective shades of pink, rose, searlet, crimson, briek, claret, chocolate, brown, garnet, orange, primrose, yellow and white. Seed may be planted, one inch deep, early in April, in any convenient place, and the plants when large enough transplanted to their permanent places.

Single Petunia

PETUNIA

Free-flowering, sweet-scented and casily cultivated. They are well-known favorites, effeetive and beautiful in borders, beds, vases, etc. They thrive in almost any soil and produce a brilliant array of color throughout a long scason. Breck's Prize is an exceedingly fine strain of large fringed flowers that produces a large percentage of doubles. We call special attention to the eollections offered. The seed is all saved from selected pot-grown plants, and we believe will prove perfectly satisfactory.

Single Large-Flowering Petunias

Shirley Poppy

POPPY

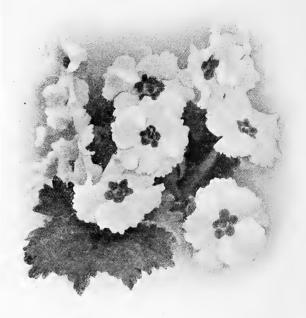

(Papaver)

Quite a number of the perennial varieties bloom the first year from seed if sown early. Our new strain of Shirley produces softer and more pleasing shades than we have offered hitherto. Sowings in May, and again several times during spring, produce a continuous bloom from early summer until frost. The seed should be sown where the plants are to bloom, as Poppics do not take kindly to transplanting. Cover seed very lightly, and firm the soil with a flat board. When large enough thin out the plants. A sandy loam and early spring sowings produce the best flowers.

carry oping comings produce the best hower		
Single Annual Varieties 2258. Shirley, Breck's Selected Mixed. An extra choice strain of these charming pop- pies. We pay special attention to the selec- tion of colors which contain pure white, pink, terra cotta, salmon, chamois, rosy carmine to deepest crimson, and rosy red. CHINENSIS (Chinese Primrose).—The most suitable periods for sowing Primula Chinensis are April and May for autumn, and June and July for spring blooming. Shallow pans, well drained, are the best. The soil should consist of leaf mould and sandy loam, worked through a fine sieve. The pans, when thus prepared should be well watered before the seed is sown. Tender biennial, ¾ ft.
2490. Breck's Superb Giant Mixed. Including the following Giant Varieties and many others not catalogued
2491. Giant Alba ("Pure White"). A grand variety of enormous size and great substance
2492. Giant Crimson. A gorgeous shade of crimson
2493. Giant Queen Mary. A lovely shade of rose pink
2494. Giant Pink. One of the best for indoor decoration, the color being a delicate carmine-pink
2496. Giant Queen Alexandra. Giant white flowers, 2½ inches across; petals are very solid and erect
2497. Giant Rubra. Immense red flowers of great substance
2498. Giant Salmon. An exquisite color
2500. Alba Magnifica. Pure white with yellow eye, densely fringed
2502. Brilliant King. Flowers are large and erect, forming a pyramid of beautiful rich crimson flowers
2504. Chiswick Red. An improved strain
2505. Coerulea Magnifica. Blue
2506. Delicate Rose. A charming shade of

SALVIA

(Flowering Sage)

Salvias are extremely popular and satisfactory bedding plants. The extreme brilliancy and abundance of their flowers combined with their graceful branching habit makes them one of the most gorgeous and effective late summer and autumn-flowering plants. Seed should be sown in the greenhouse or hotbed during February or March in a tempera-ture of from 60 to 70 degrees. Cover the seed to a depth of only four times their size and press firmly with a board. Water with a fine spray as needed, never allowing them to dry out. Transplant to small pots when 2 or 3 leaves have formed. Set out in the open horder when all danger from frost is passed. Oz. Pkt. 2658. Splendens, Bonfire (Scarlet Sage). Extremely handsome and effective variety producing large spikes of bright scarlet flowers. hhP, 2 ft..... 2670. Splendens. Verbena

VERBENA

Verbenas are the most popular and satisfaetory bedding plants in cultivation. Their heads of brilliantly colored flowers are borne in constant succession from June until frost. The flowers are large and splendid for cutting.

To secure early plants the seed should be sown in the greenhouse or hot-bed in February or March and the seedlings transplanted to the open border in May.

Zinnia

ZINNIA

One of the most popular and most extensively used of all our hardy annuals for beds, mixed borders and for cutting purposes. They require very little attention; will grow in any good garden soil. Seed sown early in heat will begin to bloom in June and continue until frost, or seed may be sown where they are intended to bloom as soon as frost has gone.

BRECK'S NEW GIANT (Grandiflora Plenis-

sima).-The flowers of this variety measure

BRECK'S COLLECTIONS OF FLOWER SEEDS

Collection "A," price 25c, contains one packet each of Mignonette; Alyssum, white; Sweet Peas, fine mixed; Phlox Drummondii, fine mixed; Portulaca, fine mixed; Chinese Pink, fine mixed.

Collection "B," price 50c, contains the varieties in Collection "A," with the following additions: Nasturtium, Tom Thumb, fine mixed; Candytuft, finest mixed; Aster, fine mixed; Pansy, finest mixed; Eschscholtzia, fine mixed; Morning Glory, fine mixed.

Collection "C," price 75c, contains the varieties in Collections "A" and "B," with the following additions: Coreopsis, fine mixed; Balsam, fine mixed; Zinnia, fine mixed; Mourning Bride, fine mixed; Petunia, finest mixed; Calendula, "Meteor," yellow.

Collection "D," price \$1.00, contains the varieties in Collections "A," "B" and "C," with the following additions: Tall Nasturtium, fine mixed; Marigold, French, striped; Larkspur, dwarf Rocket; Poppy, double mixed; Convolvulus, dwarf mixed; Chrysanthemum, fine mixed; Antirrhinum, finest mixed.

Collection "E." This assortment produces a fine effect in the garden and all the sorts are suitable for bouquets. Price 50c. Abronia, Ageratum, Amaranthus Bicolor, Aquilegia, Aster, Chrysanthemum-flowered, Calliopsis, Collinsia, Dianthus Chinensis, Godetia, Mignonette, Phlox Drummondii, Zinnia.

Collection "F." The following kinds are specially suitable for growing in vases or hanging baskets. Price 25c. Alyssum Maritimum, Convolvulus Mauritanicus, Dwarf Nasturtiums, Lobb's Nasturtiums, Lobelia Gracilis, Mimulus Moschatus.

BRECK'S WILD GARDEN MIXTURE

Any one who has cultivated flowers in neatly laid out beds or carefully planted ribbon borders is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different seasons of bloom insuring something new almost every day. Pkt., 15c; oz., 2~c; ¼ lb., 75c; lb., \$2.50.

SUMMER FLOWERING BULBS AND ROOTS

Amaryllis

Amaryllis. Lovely lily-like plants that produce flowers in almost every shade of color.

A. Belladonna Major. Rosy pink, fragrant. 25c each. A. Formosissima (Jacobean Lily). Blooms freely out of doors, flowers velvety crimson. 20c each; \$1.75

A. Johnsonni. Large crimson and white flowers. 75c each: \$4.00 per doz.

Begonias. (Tuberous Rooted)

Varicolored flowers of great beauty, two inches or more across, are borne freely during the whole summer. Roots potted in early spring are ready for setting out in May. Will thrive in partial shade.

Single Flowered. Red, crimson, scarlet, rose, pink, white, yellow and striped. 20c cach; \$2.00 doz.

Single Flowered Mixed. 20c cach; \$2.00 doz.

Double Flowered Sorts. Same colors as the single. 25c each; \$2.50 doz.

Double Flowered Mixed. 25c each; \$2.50 doz.

New Single Frilled. The flowers of this variety are very large, borne on stout stems and beautifully frilled. In six separate colors. 25c each; \$2.50 doz.

Count Zeppelin. Intense scarlet, 8 to 10 inches in height with full double flowers 1½ inches across. Blossoms from July until frost. 30c each; \$3.00 per doz.

LaFayette. Brilliant scarlet with size and habit same as Count Zeppelin. 30c each; \$3.00 per doz.

Marmorata. Striped and flaked. Good form and free

flowering. Single flowered, 10c each; \$1.00 per doz. Double flowered, 25c each; \$2.50 per doz.

Crispa Fimbriata. Beautifully formed and fimbriated flowers in many shades. 25c each; \$2.50 per doz.

Water Lilies (Hardy Nymphaeas)

These are all equally as hardy as our native Pond Lily and may be planted as soon as vegetation commences in spring and any time during the season until the end of August.

Alba. The hardy white English pond lily. 50c each. Odorata. Our native white pond lily. 50c each. Odorata Sulphurea. Large yellow fragrant flowers. 50c each.

Odorata Rosea. Cape Cod pink pond lily. 50c each.

Gloxinias

Large tubular flowers of gorgeous coloring. Bulbs potted in light, sandy loam in February or March will bloom in June or July. Strong flowcring bulbs in six separate colors. 25c each; \$2.50 doz.

Montbretia

These hardy summer-flowering bulbs produce graceful flowers like those of Gladioli but the plants are of branching habit and attain to a height of about two feet. The color varies from yellow to rich scarlet. Plant the bulbs about five inches deep, protecting them with a liberal mulching during winter. The flowers are fine for cutting. These bulbs offered subject to arrival.

Aurea (Crocosmia Aurea). Bright orange Doz. 100 yellow. The bulbs of this sort should be taken up after flowering and kept

in damp soil or moss until spring25 1.50 10.00 Crocosmiaeflora. Orange scarlet, yellow center .20 1.25 10.00 Etoile de Feu. Bright vermilion, yellow center .35 2.25 20.00 Germania. Tuberoses

Double Pearl Excelsior. These are universal favorites and very easily grown. Before potting remove the small offsets, use rich loam and start in hot bed or in house; do not set out until all danger from frost is past. 5c each; 50c per doz.; \$3.50 per 100.

Single, Variegated Leaved. An early single white variety with the green leaves finely edged and marked with

gold stripes. 10c each; 50c per doz.; \$3.00 per 100.

Tuberous Vines

Cinnamon Vine. Hardy climber, shining green foliage,

fragrant white flowers. 5c each; 50c doz.

Madeira Vines. A beautiful rapid-growing climber, bearing in profusion very fragrant white flowers. 5c each; 50c doz.

HARDY LILIES

A desirable class of hardy perennials which may be planted amongst shrubbery or other earlier-blooming perennials. Some of the late varieties do not arrive from Japan before the ground freezes, but we carry these in cold storage until spring when they may be planted out with good success. Deep planting is advisable, 9 to 12 inches according to size of bulb.

Auratum (Golden Banded Lily of Japan). Immense white flowers, each petal marked with a wide gold band, and spotted with maroon.

-Mammoth Bulbs. 40c each; \$4.00 doz.; \$30.00 per 100.

-Extra Large. 30c each; \$3.00 per doz.; \$20.00 per 100. -First Size Bulbs. 20c each; \$2.00 doz.; \$15.00 per 100.

—Hard Size Builds. 20c cach; \$2.00 doz.; \$30.00 per 100.

—Mammoth Bulbs. 40c each; \$4.00 doz.; \$30.00 per 100.

—Extra Large. 30c each; \$3.00 per doz.; \$20.00 per 100.

Speciosum Magnificum. Rich crimson. The finest colored

of all Speciosums.

-Mammoth Bulbs. 40c each; \$4.00 doz.; \$30.00 per 100.
-Extra Large. 30c each; \$3.00 per doz.; \$20.00 per 100.

Breck's Dahlias

From the myriad varieties of this justly popular annual, we limit our stock to a selected few of those which have proved themselves of particular excellence. Our special eatalogue lists them more comprehensively.

Planting of dormant roots may be made sometimes as early as the middle of April, in the vicinity of Boston, thus making possible a long season of bloom. Any well-tilled garden soil is suitable. Bulbs should be lifted in the fall after the tops have been killed by frost, and stored in a dry cellar protected from freezing.

Mrs. Charles H, Breck

DECORATIVE

Beloit. Very large, full and double, splendid form, rich purplish garnet, deepening towards the centre, stems extra long and strong. 50c each.

Delice. Soft glowing rose pink, perfect form and stem. 35c each.

Easton. Brilliant turkey-red; flowers medium size, in great profusion. 25c each.

Fireburst. Extra large flower; intense scarlet, shaded orange. 50c each.

Golden West. A fine large primrose yellow, free and good. 35c each.

Hortulanus Fiet. Mammoth blooms of delicate shrimppink and gold shadings, which make it a most valuable acquisition. 75c each.

Hortulanus Witte. A pure white with large flowers; a splendid cut flower and exhibition variety. 35c each.

Immense. An enormous Dahlia with petals watered white, streaked and bordered with rose cerise. 35c each.

Jack Rose. Brilliant crimson, perfectly-formed flowers. A well-liked variety. 25c cach.

King of Autumn. Large, long-stemmed, perfectly formed flowers. Color is pinkish amber, shading to sulphur. A new variety which is attracting much attention. \$1.00 each.

Le Grand Manitou. White ground, heavily striped and blotched with violet red, fine and large with high full centre. 50c each.

Mina Burgle. A rich dark scarlet variety, very free-flowering; one of the best for cutting. 50c each.

Oregon Beauty. Very large, well formed flower; vivid red. 50c each.

Mrs. Charles H. Breck. Rich, creamy yellow, tipped with rose pink, veined and streaked with intermediate shades. 75c each.

Yellow Colosse. An extremely good yellow. 35c each.
1 dozen our selection, \$3.00.

SHOW

A. D. Livoni. A beautiful pink, full early, best for cutting. 20e each.

Black Diamond. Purple-garnet, shading to black. 15c each.

Cuban Giant.' Dark, glowing crimson, shaded purple. 20c each.

Dreer's White. Pure, glistening white; very free-flowering. 50c each.

Dreer's Yellow. A perfect ball in shape, elear yellow; stems long and stiff. Considered by many the best yellow dahlia. 50c each.

Gen. Miles. Most immense and massive lavender pink striped purplish magenta, unique color, one of the best. 50c each.

Gov. Guild. Best large white, long stem, good form. 35c each.

Mrs. G. Abbott. Bright golden yellow speckled and striped, intense scarlet, large, full and free. 50c each.

Purple Duke. Large purple, quilled, like G. D. Alexis. 25c each.

W. W. Rawson. White over-laid amethyst, extra good. 25c each.

Yellow Duke. A fine primrose yellow for cutting. 25c each.

Breck's Hardy Plants

Orders for hardy plants and trees are filled and shipped from our 100-acre nurseries at Lexington. Customers are invited to visit these grounds and inspect our immense stock of growing things, which is intended to cover all requirements for garden and landscape planting.

BRECK-ROBINSON NURSERY CO., Munroe Station, LEXINGTON, MASS.

An effective Mass-Planting of Frau Karl Druschki

ROSES

Roses are probably the most popular and satisfying of the out-of-door flowers. Given plenty of sunshine and water, they more than repay their cost in wealth of bloom the first season.

After May first, only potted roses are recommended. Dormant plants can scarcely he relied upon for vigorous

growth if set out later than that date. In early spring, dormant roses will be furnished at prices noted.

Hybrid Perpetual Roses

Dormant Plants (before May 1st), 60c each; \$6.00 per doz.; \$40.00 per 100.

Potted Plants, 75c each; \$7.50 per doz.

(Unless otherwise priced.)

Alfred Colomb. Large, free-blooming; brilliant carminecrimson. (Dormant only.)

Anne de Diesbach. Very large and fragrant; carmine.

Baron de Bonstettin. Rich velvet maroon.

Captain Haywood. Bright scarlet.

Vigorous and extra fine; flesh, shaded with rosy pink. (Dormant only.)

Earl of Dufferin. Vigorous; velvety crimson, shaded maroon. (Dormant only.)

Frau Karl Druschki (Snow Queen). The best white rose. Harrison's Yellow. Semi-double; clear, golden yellow. His Majesty. Often called the "Crimson Frau Karl Druschki." Blooms large and full; deep, dark crimson,

highly perfumed.

George Arends (Pink Frau Karl Druschki). Like the

foregoing, this retains the size and fullness of the famous white Druschki, but is a delicate pink in color. General Jacqueminot. Fragrant; good forcer; scarletcrimson.

Hugh Dickson. Large and full; crimson and scarlet. John Hopper. Profusc bloomer; brilliant rosy crimson. Madam Gabriel Luizet. Large, cup-shaped; pink.

Magna Charta. Fragrant; pink, suffused with carmine. Margaret Dickson. Large petals; white, pale flesh center. Marshall P. Wilder. Fragrant; blooms late; cherry-carminc.

Mrs. John Laing. Large, fine form; soft pink.

Mrs. R. G. S. Crawford. Light flesh pink. Paul Neyron. Extra large, free blooming; deep rose. Persian Yellow. Large, free-blooming; deep golden yel-(Dormant only.)

Soleil d'Or. Shades of golden yellow and orange. Dormant, 75c each; potted 90c each.

Ulrich Brunner. One of the best; cherry, lighted with red.

Hybrid Tea Roses

EVERBLOOMING

Dormant Plants, 75c each; \$7.50 per doz. Potted Plants, 90c each; \$9.00 per doz. (Unless otherwise priced.) Bessie Brown. White, flushed with pink.

Betty. Coppery yellow.

Colleen. Brilliant rose-pink and crimson shadings over creamy-yellow; fragrant. Dormant.

Duchess of Wellington. Saffron yellow, stained crimson. Edith Part. Rich red, suffused salmon.

Edward Mawley. One of the most beautiful of the everblooming rich crimson, shaded with velvety maroon.

Etoile de France. Cup-shaped, fragrant; velvety crimson. Francis Scott Key. A heavy double rose of great sub-

stance; finely formed, free-blooming, rich crimson red. (Potted only.)

General MacArthur. Very fine; crimson-scarlet.

Gen. Sup. A. Janssen. Dcep carminc red.

Gloire de Dijon. Hardy; combined salmon, rose, yellow. Gruss an Teplitz. Hardy; free-flowering; crimson.

Hadley. Deep, velvety crimson, brilliant and fragrant; long stemmed. Potted, 90c each.

Harry Kirk. Deep sulphur yellow.

Jonkheer J. L. Mock. Carmine, changing to pink. Kaiserin Augusta Victoria. Large; creamy white. Killarney Brilliant. Bright, true pink.

Killarney. Queen of the Irish roses; carmine-pink. La France. Constant bloomer; rose, changing to a pink.

Laurent Carle. Velvety carmine.

Los Angeles. A remarkable new rose of American origin. Long-stemmed, luminous flame-pink flowers, shaded with coral and gold. Large, perfectly formed, fragrant. \$1.50 each; \$18 per doz. (in pots).

Mad. Caroline Testout. Brilliant, satiny rose.

Mad. Edouard Herriot. Semi-double; coral red, shaded with yellow and bright rosy scarlet passing to shrimp red; buds slender and pointed. Dormant, 60c; potted, 75c.

H. T. ROSES (Continued)

Maman Cochet. Vigorous and free-blooming; pink. Mrs. Aaron Ward. Free-flowering; Indian-yellow. Dormant, 60c; potted, 75c.

Ophelia. Brilliant salmon flesh, shaded rose.

Radiance. Carmine pink to coppery yellow.

Sunburst. Coppery-orange and golden yellow. This rose has gained great favor since its introduction in 1912. Dormant, 60c; potted, 75c.

Viscountess Folkstone. Cream-white, with salmon-pink center. A favorite.

White Killarney. Pure white.

White Maman Cochet. Like Maman Cochet, but white. William R. Smith. Creamy white, shaded with rose. Willowmere. Rich carmine pink, shading yellow.

Climbing Roses

Dormant, 50c; potted, 60c; unless otherwise noted. Climbing American Beauty. The best-known of the climb-T. roses. Combines the attractiveness of the parent "Beauty" with vigorous climbing habit.

Climbing Gruss an Teplitz. Free-flowering as the bedding variety. Potted, 60c.

Climbing K. A. Victoria. Creamy white; vigorous habit. Potted, 60c.

Crimson Rambler. Well-known and popular. Dorothy Perkins. Vigorous; good foliage; shell-pink.

Dr. W. Van Fleet. Delicate flesh-pink; pointed buds, large full flowers. Bronze foliage. Dormant, 60c.
Evangeline. A strong climber of the Wichuraiana type. White flowers, tipped with pink. Dormant, 50c. Excelsa. A new Crimson Rambler; deep crimson.

Flower of Fairfield (Everblooming Crimson Rambler). Crimson, with white at base of petals. Dormant, 50c. Gardenia. Rich golden yellow flowers, suffused with

creamy white. A Wichuraiana hybrid. Hiawatha. Ruby carmine, with clear white eye.

Lady Gay. Beautiful rose pink.

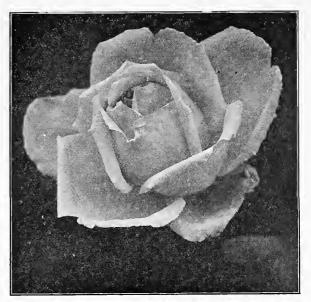

Silver Moon. A new, free-blooming climber, with rich, bronzy foliage. Flowers white, large, single, very fragrant. Dormant, 60c; potted, 75c.

Tausendschon. One of the best; white and delicate pink. Dormant, 60c; potted, 75c.

White Dorothy. Vigorous and fine. Dormant only. White Rambler. Many small flowers. Dormant only. Wichuraiana (Memorial Rose). Trailing; white flowers. Dormant only.

Yellow in bud, fading as the flowers Yellow Rambler. open. Dormant only.

Dwarf Polyantha Roses (Baby Ramblers)

Dormant, 50c; Potted, 60c.

Anny Muller. Profuse bloomer; brilliant rose.

Baby Tausendschon. Vigorous; white and pink.

Clothilde Soupert. White, with rosy centers. Dormant only.

Jessie. Constant bloomer; cherry-crimson.

Madame Norbert Levavasseur. Crimson Baby Rambler. Maman Levavasseur. Pink Baby Rambler.

Orleans. Vigorous and free-blooming; geranium rose.

Moss Roses

Crested Moss. Pink buds with mossy fringe. 50c each. Salet Moss. Vigorous; large flowers; light rosc. 50c cach.

Rugosa or Japanese Roses

Rosa rugosa. Fine foliage, flowers, and bright rcd fruit. 35c each; \$3.50 doz. Dormant only.

var. alba. Same as above, with white flowers. \$3.50 doz. Dormant only.

var. Conradi Ferdinand Meyer. Double: clear rose. 35c; dormant only.

var. Mme. George Bruant. Semi-double; white. 35c and 50c.

var. Roseraie de l'Hay. Double; carmine cherry-red. 35c; dormant only.

Miscellaneous Roses

(Dormant only.)

Rosa rubiginosa (Sweet Briar). Fragrant foliage. 2.50 doz.

R. rubrifolia. Red leaves; red flowers. 30c; \$3.00 doz. Madam Plantier. Good for massing; white. 25c; \$2.50 doz.

LANDSCAPE SERVICE

Making a specialty of Rose and Flower gardens, as well as general landscape work, we are in a position to render valuable aid in the planning of such features for the home grounds. Our representative will call upon request.

Telephone, Lexington 260.

Peony Jeanne d'Arc

THE PAEONIES

Paeonies should be planted in good, rich, deep moist soil, after which they will require less attention than any other class of flowering plants. They are perfectly hardy and their remarkable freedom from disease and insects makes them most desirable. Paeonies thrive in all locations whether in the broad sunlight or partial shade.

Albatre. Milk-white, tinged lilac, edged with carmine. Fragrant. Tall, mid-season. 50c each; \$5.00 doz.

Charlemagne. Lilac-white with blush center. Fragrant, medium-tall; late. 50c each.

Couronne D'Or. Pure white, with yellow stamens, tipped carmine. Medium tall; late. 75c each; \$7.50 per doz. Duchesse de Nemours. Pure white crown, sulphur-white

collar. Fragrant. Medium height; early. 50c each; \$5 doz.

Felix Crousse. Late. Deep crimson, marked with cardinal. 75c each; \$7.50 doz.

Festiva Maxima. Pure white, prominently flecked crimson; outer petals sometimes faint lilac-white. Tall; early. 50c each; \$5 doz.

Jeanne d'Arc. Large, bomb type; center pale lilac, collar cream white touched with sulphur; mid-season. 50c each.

Madam Crousse. Pure white; center flecked crimson; mid-season. 50c each.

Madam de Verneville. Pure white, center blush fading to pure white, carmine flecks. Medium height; early. 50c each.

Marie Lemoine. Pure white with cream-white center, occasional carmine tip. Medium height; very late. 50c each.

Meissonier. Brilliant purple red. Very tall; mid-season. 50c each.

Monsieur Dupont. Milk-white center, splashed crimson. Tall; mid-season. 75c each.

Mont Blanc. Pure white with cream white center. 75c each; \$7.50 doz.

Officinalis Rosea. Crimson, changing to rose. 35c each. Officinalis rubra. The old-fashioned red paeony. 35c each. Choice Mixed. Unnamed varieties. 25c each; \$2.50 doz.

Japanese Single Paeonies

Few plants can vie with the Single Paeony for beauty, and an established bed in full bloom is gorgeous. Price 50c each; \$5 per doz.

Diana. White, creamy white center. Dragon. Very large dark crimson.

Mikado. Deep lilac rose, silvery markings.

HARDY PHLOX

Old-fashioned flowers, improved in form and coloring, the hardy Phloxes are invaluable for massing in the flower-garden or horder. Price, 15c cach; \$1.50 per doz., except as noted.

Africa. Carmine purple, blood-red eye. 25c each; \$2.50 doz.

Annie Cook. Flesh pink. Vcry fragrant.

Baron Van Dedem. Glistening scarlet, blood-red. 20c each.

B. Comte. Brilliant, rich French purple. 20c each; \$2.00 doz.

Bridesmaid. Pure white, crimson-carmine eyc. 20c each; \$2.00 doz.

Elisabeth Campbell. Light salmon, pink centre. The best pink Phlox for bedding. 25c each; \$2.50 doz.

Europa. White with crimson-carmine cye. The individual flowers and trusses are very large. 25c each; \$2.50 doz.

Frau Ant. Buchner. The finest pure white Phlox. 25c each.

General Chanzy. Scarlet-pink, with salmon tint. Brilliant.

General Van Heutsz. Brilliant salmon-red; with white centre. 20c each; \$2.00 doz.
Geo. A. Strohlen. Bright scarlet, with crimson red eye.

Geo. A. Strohlen. Bright scarlet, with crimson red eye. Large flower. 20c each; \$2.00 doz.

Goliath. Rich crimson carmine; very tall. 20c each; \$2.00 doz.

Gruppenkonigin. Flesh colored rose, carmine eye. 20c each; \$2.00 doz.

Independence. Large pure white flowers. Dwarf habit. Jeanne d'Arc. Pure white. Flowers extra large. Late. Le Soleil. Bright china rosc, rose centre. Early.

Miss Lingard. White. June to August. Foliage glossy.
Mad. Paul Dutrie. Soft pink color. 20c each; \$2.00 doz.
Rynstrom. Uniform color, not unlike that of Paul Neyron
Rose. 20c each; \$2.00 doz.

R. P. Struthers. Bright pinkish salmon, with crimson eye. New and most excellent.

Rosenberg. Bright reddish-violet with blood red eye. Stella's Choice. Tall; pure white, very late. Von Lassburg. Pure white flowers.

DWARF SPECIES

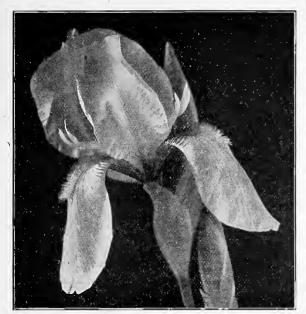

Phlox subulata (Moss Pink). Pink, 4 to 6 inches, April and May. Foliage, moss-like and deep green; creeping habit. 10c each; \$1.00 per doz.

P. var. alba. White form of the above. Very effective in masses. 10c each; \$1.00 per doz.

Phlox Europa

For additional varieties and descriptions see Nursery Catalogue.

Iris Germanica (German Iris)

German Iris

The German Iris is among the most desirable and easiest grown of our spring-flowering hardy plants, producing in May showy flowers of exquisite coloring, combining the richest and most delicate tints. For best results plant in a well-drained, sunny position, barely covering the roots.

In the following description "S" signifies the standards, or erect petals; "F" the falls, or drooping petals.

Prices, except where noted, 15c each; \$1.50 per doz.; \$10.00 per 100.

Asiatica. S. Purple plume. F. Darker purple.

Aurea. S. and F. Clear rich yellow. Canary Bird. S. Canary-yellow. F. Crimson-purple.

Celeste. Pure celestial blue, changing to porcelain.

Darius. S. Lemon. F. Yellow, veined and corded with purple.

Donna Maria. S. Azure. F. Purple. Duchesse de Nemours. S. Pale lilac. F. Purple-violet, veined white.

Flavescens. Light primrose-yellow, large flowers.

Florentina alba. S. and F. Light porcelain-blue, changing to white.

Florentina Blue. S. and F. Pale-blue. Fragrant.

Gracchus. S. Creamy yellow. F. Velvet purple, yellow striped.

Hector. Yellow and brownish red.

Honorabilis. S. Indian-yellow. F. Chestnut-red. La Tendrer. S. Lavender-blue. F. Blue, veined violet.

Madame Chereau. Pure white, penciled violet.

Mrs. H. Darwin. White, veined purple.

Pallida Dalmatica. 3 to 4 ft. Lavender, stately spikes.

New and very fine. 25c each; 2.50 per doz.

Pallida speciosa. .S. Violet-blue. F. Purple.

Princess of Wales. Combination violet-purple, violet and

yellow.

Purple Queen. S. and F. Rich violet-purple. Queen of May. S. and F. Bright rosy lavender. Silver King. S. and F. Pure white, large. Fragrant.

Japanese Iris

The flowers of the Japanese Iris are often 8 inches across, and of remarkably varied and beautiful colors. They thrive best in a rich and somewhat moist soil. The blooming scason is from the middle of June to about August 1.

Large Plants, 30c each; \$3.00 per doz.

Mixed Colors, unnamed, 15c each; \$1.50 per doz.

(Order by number or name.)

No. 4 Kumo-no-obi. Double violet-purple, white centre.

No. 7 Sofu-no-koi. Double light blue, with pink marking. No. 8 Mana-dowru. Double white, penciled blue, purple centre.

No. 10 Yomo-no-umi. Double, maltese lavender, purple centre, penciled.

No. 11 Mei-ran. Single carmine rose.

No. 12 Kuma-funjin. Double, dark purple, blue centre.

No. 14 Hana-aoi. Double, bright violet-blue, shaded white.

No. 15 Uchin. Double bluish purple, veined white.

No. 16 Oshkun. Double navy-blue, purple centre.

No. 19 Kimi-no-megumi. Single, light blue, penciled, red centre.

No. 20 Kumo-no-uys. Double, vcry dark bluish purple.

No. 23 Oniga-shima. Double, violet purple-sapphire centre.

No. 26 Senjo-no-hora. Double, dark red, splashed white. No. 28 Shira-taki. Double, white with yellow marking.

No. 29 Shiga-no-wia-nami. Double, sapphire and blue, penciled white.

No. 30 Kagaribi. Double, rose red, penciled white.

No. 31 Kosui-no-iro. Double, very light blue, white cen-

No. 32 Komochi-guma. Single, very dark blush purple. No. 33 Kaku-jaku-ro. Single, light pink and blue, penciled white.

No. 34 Momiji-no-taki. Double, pink ground, blue and yellow veined.

Hardy Garden Chrysanthemums

These old-fashioned plants are eagerly sought for by garden lovers, and we are able to offer a large number of new varieties which are of great value.

Price 15c each; \$1.50 per doz.; \$10.00 per 100.

Aberdeen. Bronze (Button). Arabella. Pink.

Boston. Golden bronze.

Bridesmaid, Blush.

Canary. Pale yellow.

Davidiana. Pink. Golden Pheasant. Rich golden-yellow.

Julia Lagravere. Dark red.

President. Deep yellow; large.

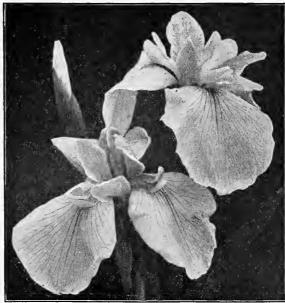

Seven Oaks. Pale yellow, free-flowering.

Syracuse. Large dark red.

Soleil d'Or. Orange.

Trojan. Maroon, with yellow centre.

Victor. Rosy crimson.

Iris Kaempferi (Japanese Iris)

Canterbury Bells and Foxgloves

HARDY HERBACEOUS PERENNIALS

The Perennials supply us with some of the most beautiful and interesting plants available for out-of-door culture. By judicious selection a succession of bloom from spring until frost, with wonderful range of color, may be obtained. Time of flowering and approximate height of each is indicated.

Achillea "The Pearl." Pure white double. June. 2 ft. 15c each; \$1.50 per doz.

Alyssum saxatile compactum. Beautiful yellow flowers in spring. 6 in. 15c each; \$1.50 per doz.

Anemone japonica. Dark pink flowers in August and Sept. 2 ft. 15c each; \$1.50 per doz.

A. japonica, Whirlwind. Beautiful white. 2 ft. 15c each; \$1.50 per doz.

Anthemis tinctoria (Yellow Marguerite). Flowers June to October. 2 to 3 ft. 15c each; \$1.50 per doz.

Aquilegia canadensis. Scarlet and yellow. July. 1½ ft. 15c each; \$1.50 per doz.

A. chrysantha. Rich yellow. July. 3 ft. 15c each; \$1.50 per doz.

A. coerulea hybrida. Shades of blue, white, pink, yellow, etc. 1½ ft. 15c each; \$1.50 per doz.

Arabis alpina plena (Alpine Rock Cress). (Perennial, White Alyssum). White. May. 6 to 9 in. 15c each; \$1.50 per doz.

Armeria maritima (Sea Pink). Bright Rose. May to frost. 9 in. 15c each; \$1.50 per doz.

A. var. Laucheana. Dwarf, similar to above; hright pink. 15c each; \$1.50 per doz.

Aster, Beauty of Colwall. Lavender, double. September. 4 ft. 25c each; \$2.50 per doz.

A. nova angliae. Bluish-purple. September., 4 ft. 15c each; \$1.50 per doz.

A. nova angliae preziosa. Deep blue. September. 4 ft. 15c each; \$1.50 per doz.

Baptisia australis (False Indigo). Dark blue. July. 3 ft. 15c each; \$1.50 per doz.

Boltonia latisquama. Clear lilac. September. 4 ft. 15c each; \$1.50 per doz.

Campanula carpatica. Clear blue. Summer. 3 to 4 ft. 15c each; \$1.50 per doz.

C. persicæfolia (Peach-leaved Bell Flower). Porcelain blue. June to August. 2 to 3 ft. 15c each; \$1.50 per doz.

C. media (Canterbury Bell). June and July. 3 to 4 ft. Blue, white. 15c each; \$1.50 per doz.

Centaurea montana. Colors red, white, blue and pink. Summer. 1½ ft. 20c each; \$2.00 per doz.

Coreopsis grandiflora. Golden-yellow. Summer. 2 ft. 15c each; \$1.50 per doz.

Delphinium chinense. Intense blue. Summer. 2 ft. 15e each; \$1.50 per doz.

D. formosum. Blue, white centre. Summer. 3 ft. 15c each; \$1.50 per doz.

D. Belladonna. A very popular light blue variety. 3 ft. 25c each; \$2.50 per doz.

Dianthus barbatus (Sweet William). Mixed colors. June and July. 20 in. 15c each; \$1.50 per doz.

D. plumarius (Scotch Pink). Fragrant pink flowers. June. 9 in. 15c each; \$1.50 per doz.

Dicentra spectabilis (Bleeding Heart). Pink. Spring. 2 ft. 15c each; \$1.50 per doz.

Digitalis purpurea (Foxglove). Purple and white. June. 3 to 4 ft. 15c each; \$1.50 per doz.

Eulalia zebrina. A stately grass with green and yellow leaves. 6 ft. 20c each; \$2.00 per doz.

Funkia variegata (Plaintain Lily). Blue with variegated foliage. July. 1 to 2 ft. 15c each; \$1.50 per doz.

F. subcordata grandiflora (White Day Lily). Pure white. July to Sept. 2 ft. 15c each; \$1.50 per doz.

Gaillardia grandifiora (Blanket Flower). Red and yellow. July. 2 to 3 ft. 15c each; \$1.50 per doz.

Gypsophila paniculata. Small white flowers in great profusion. Summer. 2 ft. 15c each; \$1.50 per doz.

Helenium autumnale superbum. Bright yellow. August. 5 ft. 15c cach; \$1.50 per doz.

H. hoopesi. Orange yellow. June and July. 2 to 3 ft. 15c each; \$1.50 per doz.

Helianthus decapetalus. Bright yellow. Summer. 5 ft. 15c each; \$1.50 per doz.

H. mollis. Yellow flowers, downy, silvery foliage. 3 ft. 15c each; \$1.50 per doz.

H. multiflorus fl. pl. (So-called Hardy Dahlia). Double yellow. Aug. to Sept. 4 ft. 15c each; \$1.50 per doz.

Consult our LANDSCAPE DEPARTMENT for advice as to selection and arrangement.

HARDY HERBACEOUS PERENNIALS-Continued

- Heliopsis Pitcherii. Golden-yellow. July to Sept. 6 ft. 15c each; \$1.50 per doz.
- Helleborus niger (Christmas Rose). Large white. December. Frame culture. 35c each; \$3.50 per doz.
- Hemerocallis flava. Golden yellow flowers. Summer. 3 ft. 15c each; \$1.50 per doz.
 - H. Thunbergii. Lemon yellow. Summer. 3 ft. 15c each; \$1.50 per doz.
- Heuchera sanguinea. Bright red flowers. Handsome foliage. Summer. 1½ ft. 15c each; \$1.50 per doz.
- Hibiscus moscheutos, Crimson Eye. White, with crimson eye. Aug. to Sept. 3 to 4 ft. 15c each; \$1.50 per doz.
- Iberis sempervirens (Perennial Candytuft). Flowers white, foliage evergreen. May to June. 8 to 12 inches. 15c each; \$1.50 per doz.
- Lathyrus latifolius (Perennial Pea). Bright red. Summer. 5 ft. 20c each; \$2.00 per doz.
- L. var. Albus. White, otherwise like above. 20c each; \$2.00 per doz.
- Lavandula vera (English Lavender). July, 1 to 2 ft. 15c each; \$1.50 per doz.
- Liatris pycnostachya. Lavender-purple. Summer. 5 ft. 15c each; \$1.50 per doz.
- Lobelia cardinalis (Cardinal Flower). 3 ft. August. Scarlet. Very showy border plant. 15c each; \$1.50 per doz.
- Lupinus polyphyllus. Blue, pea-like flowers. 4 ft. 15c each; \$1.50 per doz.
- L. albus. White, form of preceding. 20c each; \$2.00 per doz.
- Lychnis chalcedonica. Brilliant scarlet. Summer. 2 to 3
 ft. 15c each; \$1.50 per doz.
- L. plenissima. Pink. Summer. 2 to 3 ft. 15c each; \$1.50 per doz.
- Lythrum roseum superbum. Rosy-red. Summer. 2 to 3 ft. 15c each; \$1.50 per doz.
- Monarda didyma. Brilliant scarlet. Foliage sweet-scented. Summer. 2 to 3 ft. 15c each; \$1.50 per doz.
- Myosotis palustris semperflorens (Forget-me-not). Light
- blue. Summer. 15c each; \$1.50 per doz.

 Cenothera Youngii. Clear yellow. 2 inches in diameter.

 June to Aug. 2 ft. 15c each; \$1.50 per doz.

- Papaver orientale (Oriental Poppy).
 - P. Royal Scarlet. Scarlet. Small blotches, 2 ft. 25c each; \$2.00 per dozen.
 - P. nudicaule (Iceland Poppy). Yellow. 1 ft. 15c each; \$1.50 per doz.
- Pentstemon barbatus Torreyii (Beard-tongue). Bright red. July. 4 to 5 ft. 15c each; \$1.50 per doz.
- Physostegia virginica. Spikes of tubular-shaped, pink flowers. August. 3 to 4 ft. 15c each; \$1.50 per doz.
- Platycodon grandiflora. Very dark blue. July to October. 2 to 3 ft. 15c each; \$1.50 per doz.
- Primula officinalis hybrida (English Primrose). Shades of white, yellow and red. Spring. 1 ft. 20c each; \$2.00 per doz.
 - P. veris superba. Large yellow. 1½ ft. 20c each; \$2.00 per doz.
- Pyrethrum roseum hybridum. Single and double mixed. Colors range white to dark crimson. Summer. 2 ft. 15c each; \$1.50 per doz.
- Scabiosa caucasica. Lilac-blue. Summer. 18 inches. 15c each; \$1.50 per doz.
- Sedum spectabilis (Showy Stonecrop). Rosy purple. September. 18 inches. 15c each; \$1.50 per doz.
- Shasta Daisy. Large snowy-white flowers, in bloom continuously throughout the entire summer and fall. 15c each; \$1.50 per doz.
- Spiraea Gladstonei. White flower. Palm-like foliage. Summer. 2 ft. 25c each; \$2.50 per doz.
- S. filipendula plena. Fern-like foliage, creamy white flowers. 2 ft. 15c each; \$1.50 per doz.
- Stokesia cyanea (Cornflower Aster). Lavender blue. Aug. to Oct. 18 to 24 inches. 15c each; \$1.50 per doz.
- Tritoma uvaria grandiflora. Red and yellow. Aug. to Oct. 3 ft. 15c each; \$1.50 per doz.
 - T. Pfitzerii. Orange-scarlet. Aug. to Oct. 4 ft. 15c each; \$1.50 per doz.
- T. nobilis (Red Hot Poker). Aug. to Nov. 6 ft. 35c each; \$3.50 per doz.
- Trollius Europaeus. May. Yellow. 18 inches. 15c each: \$1.50 per doz.
- Veronica longifolia subsessilis. Blue Flowers. Aug. to Sept. 2 ft. 20c each; \$2.00 per doz.
- Yucca filamentosa (Adam's Needle). Early growth, drooping white flowers. 6 ft. Clumps, 50c each.

VINES AND CREEPERS

- Actinidia polygama, or arguta. Glossy foliage with red stems. Strong grower. 3 yr., 50c each, \$5.00 doz.
- Akebia quinata. Clover-like leaves. 30c each, \$3.00 doz.
- Ampelopsis quinquefolia. Common woodbine, or Virginia creeper. 3 yr., 30c cach, \$3.00 per doz., \$15.00 per 100.
 - A. var. Englemanni. Like the above, but clings closely to any surface. Hardy and rapid-growing. 30c each; \$3.00 per doz.
 - A. Veitchii (or tricuspidata). "Boston Ivy." Commonly used for covering buildings. 3 yr., 50c, \$5.00 per doz.
- Aristolochia sipho (Dutchman's Pipe). Large heartshaped leaves. 75c each.
- Celastrus Scandens (Roxbury Waxwork; Bitter sweet). Shrubby climber. Orange and crimson, capsuled fruit. 3 yr., 35c each, \$3.00 per doz.
- Clematis paniculata. Rapid grower. White fragrant flowers in September. 3 yr., 35c each; \$3.50 per doz.

 C. Virginiana (Virgin's Bower). Good climber, white
- C. Virginiana (Virgin's Bower). Good climber, white flowers and tufted seeds. 3 yr., 30c, \$3.00 per doz. Clematis, Large Flowered. 60c; \$6.00 per doz.
- C. Henryi. Large creamy white flower. C. Jackmani. Violet purple, free flowering.
- C. Madamè Andre. Large crimson flower.

- Euonymus radicans. Evergreen, creeping or climbing Clings to wall-surfaces like Ivy when once established. 30c each; \$3.00 per doz.
- Hedera Helix (English Ivy). Dark, glossy, evergreen leaves. Grows best in partial shade, with protection first winter. 35c; \$3.50 per doz. Larger specimens, \$1.00 to \$5.00 each.
- Humulus Lupulus (Hop-Vine). July and August. Rapid grower. 25c each; \$2.50 per doz.
- Lonicera Halleana (Hall's Evergreen Honeysuckle). Grows rapidly and blooms freely. Useful for covering embankments or fences. 30c each; \$3.00 per doz.; \$18.00 per 100.
- L. Sempervirens (Scarlet Trumpet Honeysuckle). Tubular flowers, handsome foliage and fruit. 3 yr., 35c each; \$3.50 per doz.
- Tecoma (Bignonia) radicans (Trumpet Vine). Orange and scarlet flowers. 35c; \$3.50 per doz.
- Wistaria Chinensis (Chinese Wistaria). Pendulous blue flower, clusters in May. 75c; extra large, \$1.00 each. W. var. alba. White flowered variety. 75c each.
 - W. Multijuga. Extra long purple flower-racemes. 75c each.

EVERGREENS

Abbreviations.—Size: L, large; M, medium; S, small; D, dwarf; VD, very dwarf. Rapidity of growth: r, rapid; m, medium; s, slow; v, vigorous.

- Abies balsamea (Balsam Fir). L. Of rapid, slender pyramidal growth, with very dark foliage. Grows in cold, wet ground as well as in better soil. 3 to 4 ft., \$1.50 each.
 - A. concolor; syn., lasiocarpa. Lm. It is from Colorado, and grows to a height of 50 feet and more. The foliage varies exceedingly in color from a glaucous-blue to a very light green. It is graceful and feathery, and as it grows older retains its lower limbs. 3 to 4 ft., \$5.00 each; 4 to 5 ft., \$7.00 each.
- Juniperus communis (Common Juniper). Usually a shrub with spreading, sometimes prostrate, branches which curve upwards near the ends; widely distributed throughout the eolder regions and mountains of the Northern Hemisphere. Foliage grayish green, very dense. A beautiful shrub valuable in rockeries or as a ground cover. 18 in., \$1.50 each; 2 ft., \$2.50 each.
 - J. var. Hibernica (Irish Juniper). Mm. Of dense pillar-like growth. Glaueous green foliage. 2 to 3 ft., \$1.50 each; 4 ft., \$2.00 each.
 - J. Sabina (Savin Juniper). VDs. Prostrate, spreading branches, with somber green foliage. Hardy and well adapted for hillsides, etc. 18 to 24 in., \$1.50 each; 2 to 3 ft., \$2.00 each.
 - J. Virginiana (Red Cedar). Mm. Tapering form, bright, rich green foliage. Useful for ornamental planting. 2 ft., \$1.00 each; 3 ft., \$1.75 each; 4 ft., \$2.50 each.
- Picea alba (White Spruce). Lm. Light, silvery green foliage and dense pyramidal growth. Hardy in all locations. 2 to 3 ft., \$1.00 each; 3 to 4 ft., \$1.50 each.
 - P. excelsa (Norway Spruee). Lr. The most generally used of evergreen trees. Useful for screens and windbreaks on account of its rapid growth. It makes a tall tree, and, as an individual tree, with room to develop, is of pyramidal, symmetrical growth, its lower branches sweeping the ground. 2 to 3 ft., 75c each; 3 to 4 ft., \$1.25 each; 4 to 5 ft., \$2.25 each; 5 to 6 ft., \$3.50 each.

- P. pungens glauca Kosterii (Koster's Blue Spruce). Lr. Stiff, pungent foliage and elusters of cones. The most highly-colored variety. No evergreen tree can excel it as it has the advantage of growing vigorously where many evergreens fail; withstands the eoldest seasons. 2 to 2½ ft., \$3.00; 2½ to 3 ft., \$4.50; 3 to 4 ft., \$6.00 each. (Prices quoted on larger specimens.)
- Pinus Austriaca; syn., nigricans (Austrian, or Black pine). Lr. A robust-growing variety, with long, dark green stiff needles. Does well on all soils, and is one of the best evergreens for seashore planting. 2 to 3 ft., \$1.75 each.
 - P. mughus (Dwarf Mugho Pine). Ds. Of the highest value where a low, dense, spreading growth is desired. Very dark foliage and extremely hardy. 12 to 15 in. spread, \$1.50; 18 to 24 in., \$2.50.
 - P. strobus (White Pine). Lr. The most valuable of all native evergreens for timber purposes. A well-grown individual tree, with its light, silvery foliage; is always highly ornamental. In age this Pine is most impressive. Useful for hedges, as it can be clipped like a shrub. 2 to 3 ft., \$1.00; 3 to 4 ft., \$1.50; 4 to 5 ft., \$2.00; 5 to 6 ft., \$2.50 each.
- Retinospora var. plumosa (Plume-like Japan Cypress). Lr. One of the hardiest and best. Delicate glaucous foliage. 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00; 4 to 5 ft., \$5.00.
 - R. var. plumosa aurea. Lm. A striking, fine form of the above, and very hardy. Brilliantly golden throughout the season. One of the most desirable. 2 to 3 ft., \$2.00, 3 to 4 ft., \$3.00; 4 to 5 ft., \$5.00.
- Thuya occidentalis (American Arborvitae). Mr. Of eonical form and rapid growth. Used largely for hedges. 3 ft., \$1.50 each; 4 ft., \$2.00 each; 5 ft., \$3.00 each.
 - T. var. pyramidalis (Pyramidal Arborvitae). Of upright, columnar growth. 3 ft., \$1.75; 4 ft., \$2.50; 5 ft., \$3.50 each.
- Tsuga Canadensis (Hemloek Spruce). Lr. A graceful tree, with loose, open growth, and yew-like foliage. It can be kept in dense form if pruned. Prefers moist soil. 2 to 3 ft., \$1.50; 3 to 4 ft., \$2.00.

HARDY EVERGREEN SHRUBS

Daphne Cneorum (Garland Flower). A dwarf evergreen plant with shiny leaves. Bears a profusion of bright pink, fragrant blossoms in May. 6 to 8 in., 50e; 8 to 10 in., 75c.

Kalmia latifolia (Mountain Laurel). A native evergreen shrub. Glossy foliage, beautiful pink and white flowers in June. 18 to 24 in., \$1.50; \$15.00 doz.; carloads, \$150 to \$200; specimens, \$2 to \$5 each.

Leucothoe Catesbaei. Small with thick foliage. Showy spikes of white flowers in May. 15 to 18 in., 60e and \$1.00 each.

Mahonia or Berberis aquifolia (Ashberry). Large spiny leaves, turning searlet in fall. Bright yellow flowers in May. 12 to 18 in., 30e; 18 to 24 in., 50c.

Pachysandra terminalis (Japanese Spurge). An evergreen plant forming a mat of glossy foliage. 15e each; \$1.50 doz.

For more complete list see General Nursery Catalogue.

RHODODENDRONS

It is our purpose to list only such varieties of this popular evergreen as have proved hardy in this latitude. Proper exposure (half-shade, protected from winds and hot sun) has much to do with their successful growth, as well as thorough preparation of the soil with leafmold or peat. Pick off seed-pods after blossoms have dropped. Mulch heavily with leaves or litter.

Named Hybrids

Well budded	Each	Per doz.
18 to 24 in	\$2.00	\$20.00
24 to 30 in	2.50	25.00
30 to 36 in	5.00	50.00

Abraham Lincoln. Rosy crimson.

Album elegans. Blush, changing to white.

Atrosanguineum. Intense blood-red.

Boule de Neige. Pure white; very hardy.

Caractacus. Rich purplish crimson.

Charles Bagley. Cerise pink.

Charles Dickens. Dark scarlet.

E. S. Rand. Scarlet, large cluster.

Everestianum. Rosy lilac, spotted red.

F. D. Godman. Crimson, fine blotch.

General Grant. Crimson-pink.

Gloriosum. White; bold flowers and good foliage.

H. H. Hunnewell. Dark crimson.

Kettledrum. Rich erimson.

Lady Armstrong. Pale rose, beautiful spotted.

Lady Clermont. Red, shaded crimson.

Mrs. Milner. Rich crimson.

Parson's Gloriosum. Pale lavender.

Parson's Grandiflorum. Bright carmine.

Roseum elegans. Vivid rose; beautiful.

Rhododendron Arbutifolium. This is one of the best of the dwarf sorts. It has bright foliage, is compact in hahit, and is covered with pale pink flowers in June. \$1.00 and \$1.50 each.

R. Catawbiense. This is a native, compact but tall-growing form with handsome foliage and large trusses of deep rose flowers. A splendid variety to group with high-colored forms as its foliage effect can be depended upon. 18 to 24 in., \$1.50; 2 to 2½ ft., \$3.00; 3 ft., \$5.00.

BOXWOOD

Pyramidal Form. Fine specimens, closely sheared; highly desirable for placing in tubs or planting in formal positions in the garden. Tubs extra, according to style and size required.

Prices (subject to receipt of importations).

				Each
$2\frac{1}{2}$	to	3	ft	\$3.00
3	to	$3\frac{1}{2}$	ft	4.00
31/2	to	4	ft	5.00
4	to	$4\frac{1}{2}$	ft	6.00

10 to 12 in. high	\$0.50	\$5.00
12 to 15 in. high	.75	7.50
15 to 18 in. high	1.00	10.00
Box Edging. P	er doz.	Per 100
3 to 4 in	\$1.00	\$7.00
4 to 5 in	1.50	10.00
5 to 6 in	2.00	15.00

HEDGE PLANTS

While a wide range of choice is possible, hedging material should be selected with a view to the ultimate height desired. Plants should be spaced from one foot apart (Barberry and Privet) to three feet apart (Willows, Lilacs, Evergreens) according to size and habits of growth. Advice as to selections and quantities is gladly given. The following are a few of the better-known hedge plants, most of which will bear close shearing.

Not less than 25 of one variety at the 100 rate.

Berberis Thunbergii (Japanese Barberry). 12 to 15 in., \$10.00; 15 to 18 in., \$12.00; 18 to 24 in., \$15.00 per 100.

Crataegus Oxyacanthus (English Hawthorn). 2 to 3 ft., \$20.00 per 100.

Ligustrum Amurense (Amur River Privet). 18 to 24 in., \$8.00; 2 to 3 ft., \$12.00; 3 to 4 ft., \$18.00 per 100.

Ligustrum Ibota (Japanese Privet). 18 to 24 in., \$8.00; 2 to 3 ft., \$12.00; 3 to 4 ft., \$18.00 per 100.

Ligustrum ovalifolium (California Privet). 18 to 24 in., \$6.00; 2 to 3 ft., \$10.00; 3 to 4 ft., \$15.00 per 100.

Rhamnus Catharticus (Buckthorn). 2 to 3 ft., \$10.00; 3 to 4 ft., \$15.00 per 100.

Rosa rugosa (Japanese Rose). 18 to 24 in., \$15.00; 2 to 3 ft., \$20.00 per 100.

Salix pentandra (Laurel-leaved Willow). 3 to 4 ft., \$20.00; 4 to 5 ft., \$25.00 per 100.

Spiraea Van Houttei. 2 to 3 ft., \$20.00; 3 to 4 ft., \$25.00 per 100.

Syringa vulgaris (Common Lilac). 2 to 3 ft., \$25.00; 3 to 4 ft., \$30.00 per 100.

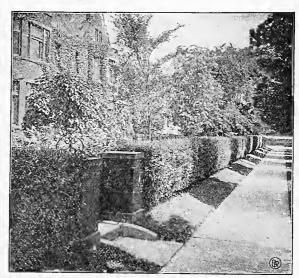

EVERGREENS FOR HEDGES

Picea alba (White Spruce). 18 to 24 in., \$30.00; 2 to 3 ft., \$45.00 per 100.

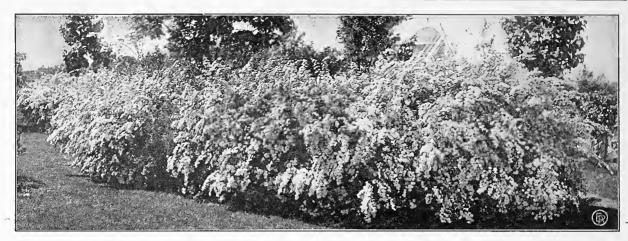

Picea excelsa (Norway Spruce). 18 to 24 in., \$25.00; 2 to 3 ft., \$40.00 per 100.

Thuya occidentalis (American Arborvitae). 18 to 24 in., \$40.00; 2 to 3 ft., \$60.00; 3 to 4 ft., \$90.00 per 100.

Tsuga Canadensis (Hemlock). 18 to 24 in., \$60.00; 2 to 3 ft., \$75.00 per 100.

Hedge of Japanese Privet

Spiraea Van Houttei

FLOWERING SHRUBS

Price, 50c each; \$5.00 per doz., except where noted. Special quotations on quantity lots.

Almond (Double-flowering Almond). Pink and white. 2 Hydrangea arborescens sterilis. to 3 ft., 75c each.

Althaea (Hibiscus, or Rose of Sharon). Double white, pink or red; also variegated-leaved. 2 to 3 ft.

Aralia pentaphylla (Five-leaved Aralia). Arching, spiny branches; valuable for foliage. 3 ft.

Azalea viscosa (Swamp Honeysuckle). White, fragrant flowers in June and July. 2 ft., 75c each.

A. mollis (Hardy Azalea). Dwarf in habit. Mixed colors in shades of red, white, yellow and orange. 18 in., \$1.00 each.

A. Pontica. Named varieties, single and double. 18 in., \$1.00 each.

Berberis Thunbergii (Japanese Barberry). Well known hedge plant. 12 to 15 in., 15c each; \$1.50 pcr doz. 18 to 24 in., 25c; \$2.50 per doz. (See also "Hedge Plants," page 113.)

Buddleia variabilis Veitchiana (Summer Lilac). Violet and yellow flowers in long spikes; August.

Calveanthus floridus (Sweet Shrub or Allspice). 2 ft.

Chionanthus virginica (White Fringe). For damp or partially shaded places. 3 to 4 ft., 75c.

Cornus Siberica (Red-barked Dogwood). Valuable for its bright-colored bark. 3 to 4 ft.

Cydonia Japonica (Japanese Quince). Dwarf-growing: scarlet flowers in May, followed by large fruit. 2 ft.

Deutzia Pride of Rochester (Pink Deutzia). Rose-tinted flowers in Junc. 3 ft.

D. gracilis (Dwarf or Slender Dcutzia). White flowers; May and June. 18 to 24 in.

D. Lemoinei. A free-flowering white variety, a little larger than D. Gracilis. 2 ft.

Diervilla candida (Weigelia). White flowers in June and later; for sheltered locations. 3 ft. D. rosea. Rose colored flowers. 2 to 3 ft.

D. Eva Rathke. Crimson; continuous bloomer. 2 to 3 ft.

Euonymus alatus (Winged Burning-bush). An odd and attractive shrub, valued for its gorgeous fall colors. 2 to 3 ft. Extra size, \$1.00 each.

E. Europaeus (Spindle Tree). Orange and red fruit in autumn. 4 ft.

Forsythia Fortunei. Well known yellow. Forsythia, blooming in April before the leaves show. 3 to 4 ft. F. suspensa. Drooping form. 3 to 4 ft.

Hamamelis virginica (Witch Hazel). Yellow flowers in November. 3 to 4 ft.

hardy Hydrangea blooming in July. 2 to 3 ft.

H. paniculata grandiflora. The common form, flowering in September. 2½ to 3 ft. Standard or tree form. 4 to 5 ft., \$1.00 each.

Kerria Japonica (Corchorus). Bright green bark; yellow

flowers all summer, low growing. 2 ft. K. var. foliis variegatis. Dwarf with silvery-green leaves. 12 to 18 in.

Lonicera Morrowi (Bush Honeysuckle). Yellow flowers in July, followed by red berries. 3 ft.

L. Tartarica (Tartarian Honeysuckle). Pink.

Philadelphis coronarius (Mock Orange). Orange-blossom scented flowers in June. The best of the Syringas. 3 to 4 ft.

P. Avalanche. A dwarf, white-flowering variety, a valuable shrub. 2 ft.

Prunus Pissardi (Purple-leaved Plum). Valuable for its foliage. 3 to 4 ft.

P. triloba (Double-flowering Plum). Rose-like pink flowers crowding the branches in May. 3 ft.

Rhodotypus kerrioides (White Kerria). White, Syringalike flowers throughout the summer, followed by black seeds. 3 to 4 ft.

Rhus cotinus (Smoke Bush or Purple Fringe). Purplish flowers in June. 3 ft.

R. typhina (Staghorn Sumac). A strong growing shrub for poor soils. 3 to 4 ft.

Sambucus aurea (Golden Elder). 3 ft.

S. racemosus (Red Fruited Elder). 2 to 3 ft.

Spiraea Anthony Waterer (Dwarf Spiraea). Flat heads of pink flowers in late summer. 18 in.

S. opulifolia aurea (Golden Spiraea). Yellow foliage. 3 to 4 ft.

S. prunifolia fl. pl. The old-fashioned Bridal Wreath. 2 to 3 ft.

S. Thunbergii (Fine-leaved Spiraea). 18 to 24 in.

S. Van Houttei. The best known Spiraea, and the most valuable. Arching sprays of white flowers in June. 3 to 4 ft.

Symphoricarpos racemosus (Snowberry). Showy white berries in fall. 3 ft.

Syringa vulgaris (Common Lilac). Purple flowers. 3 to 4 ft.

S. var. alba (White Lilac). 3 ft.

S. Named Varieties. Single and double. 75c each.

Viburnum opulus (Bush Cranberry). Showy crimson berries in fall. 3 ft.

V. plicatum (Japanese Snowball). Globe-shaped heads of white flowers in June. Grows best in sheltered locations. 3 to 4 ft., 75c each.

For more complete list see General Nursery Catalog.

SHADE AND ORNAMENTAL TREES

Acer dasycarpum (Silver Maple). Rapid growing; leaves silvery on under side. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50.

A. var. Wieri laciniatum (Weir's Cutleaved Maple). A graceful tree with pendulous branches; silvery leaves. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

A. platanoides (Norway Maple). Hardy and vigorous; spreading habits. 6 to 8 ft., 75c.; 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50 and \$2.00.

A. saccharum (Sugar or Rock Maple). A well known native tree. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50 and

A. polymorphum atropurpureum (Blood-leaved Japanese Maple). Dwarf growing, valued for its foliage. 2 to 2½ ft., \$1.50; 3 ft., \$2.00.

Aesculus hippocastanum (Horsc-chestnut). White-flowering. 6 ft., \$1.00; 8 ft., \$1.50.

Betula alba (European White Birch). Rapid growing; symmetrical. 7 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

B. pendula laciniata (Cutleaved Weeping Birch). tall, slender growth; white bar, finely cut foliage. 6 to 8 ft., \$1.50; 8 to 10 ft., \$2.00.

Catalpa Bungei. A fine globe headed tree; of large glossy leaves. 3-year, \$2.00 each.

C. Speciosa (Indian Bean). A large tree covered with showy flowers in July. 6 to 7 ft., 75c; 8 to 10 ft.,

Cercis Canadensis (Judas Tree or Red Bud). A mass of purplish-red flowers in spring. Heart-shaped leaves. 3 to 4 ft., 50c; 4 to 5 ft., 75c.

Cornus Florida (White-flowering Dogwood). Small trce with handsome white blossoms early in spring. 3 to 4 ft., \$1.00; 4 to 5 ft., \$1.50.

C. var Rubra (Red-flowering Dogwood). Same as above except that blossoms are a lovely tint of reddish pink. 3 to 4 ft., \$1.50.

Crataegus Oxyacantha, alba plena (Double white-flowering Thorn). Flowers in May. 4 to 5 ft., \$1.00.

C. Coccinea flore pleno Paulii (Paul's Double Scarlct Thorn). A small tree with brilliant carmine flowers. 4 to 5 ft., \$1.50.

Fagus Sylvatica. The well known European Beech. A superb tree. 3 to 4 ft., \$1.00 each; 4 to 5 ft., \$2.00.
F. var. purpurea Riversii (River's Purple Beech). Like

the European Beech, but with dark purple foliage. 4 to 5 ft., \$1.50; 6 to 7 ft., \$3.00.

Fraxinus Americana (American White Ash). The native ash. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50.

Ginkgo biloba (Salisburia or Maiden-Hair Tree). One of the best small trees; fan shaped leaves. 6 to 8 ft., \$1.50; 8 to 10 ft., \$2.00.

Laburnum vulgare (Golden Chain). Long racemes of

showy yellow flowers in July. 5 to 6 ft., \$1.50. Larix Europea (European Larch). Tall compact tree with light green needle-like foliage. 3 to 4 ft., 50c; 4 to 5 ft., 75c.

Liriodendron Tulipifera (Tulip Trcc or Whitewood). A large native tree. Bears tulip-like blossoms in Junc. 6 to 8 ft., \$1.50; 8 to 10 ft., \$2.00.

Magnolia Soulangeana. The best known Magnolia. Grows vigorously; large pink and white blooms. 3 to 4 ft.,

\$2.50; 4 to 5 ft., \$3.00. M. Speciosa. Similar to Magnolia Soulangeana, but later-flowering. 3 to 4 ft., \$2.50; 4 to 5 ft., \$3.00.

M. Halleana Stellata (Hall's Magnolia). The earliest and most charming of the magnolias. Bears an abundance of star-shaped fragrant blossoms. 21/2 to 3 ft., \$2.50.

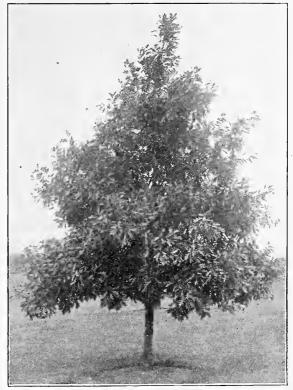

Morus Alba pendula (Weeping Mulberry). Drooping foliage; edible fruit. 5 to 6 ft., 2-year heads, \$2.00. M. var. Tatarica (Russian Mulberry). Very hardy; red-

dish fruit. 6 to 8 ft., \$1.00.

Populus Bolleana (Bolleana Poplar). Habits of growth like the Lombardy, but longer-lived. Silver leaves.

8 to 10 ft., \$1.50; 10 to 12 ft., \$2.00.

P. monilifera (Carolina Poplar). A large and spreading tree, thriving in sandy soil. 8 to 10 ft., 75c; 10 to 12 ft., \$1.00.

Pin Oak (Quercus palustris)

P. nigra fastigiata (Lombardy Poplar). The well known poplar of tall narrow growth. 8 to 10 ft., 75c; 10 to 12 ft., \$1.00; 12 to 14 ft., \$1.50.

Prunus triloba (Flowering Plum). Large double pink, flowers in spring. 3 to 4 ft., \$1.00.

Pyrus Malus Parkmani (Flowering Apple). Bears pink buds, which later open into pendulous semi-double flowers. 3 to 4 ft., \$1.50.

P. Ioensis Bechteli (Bechtel's Doublc-flowering Crab). A shrub or small tree bearing delicate pink blossoms. 3 to 4 ft., \$1.00.

Pyrus Sorbus Aucuparia (European Mountain Ash). Medium size. Bunches of scarlet berries in winter. 6 to 7 ft., \$1.00; 8 to 10 ft., \$1.50.

P. S. quercifolia (Oak-leaved Mountain Ash). Pyramidal growth. Oak-like leaves. 6 to 7 ft., \$1.00.

Quercus palustris (Pin Oak). One of the best oaks for street or lawn. 6 to 8 ft., \$1.50; 8 to 10 ft., \$2.00.

Q. rubra (Red Oak). Large and rapid grower; valuable for general planting. 6 to 8 ft., \$1.50 each.

Salix alba (Common White Willow). Grows to large size in wet ground. 6 to 8 ft., 50c.

S. vitellina aurea (Golden-barked Willow). Yellow bark in winter. 6 to 7 ft., 50c.

S. elegantissima (Thurlow's Willow). Drooping habi. 6 to 8 ft., \$1.00.

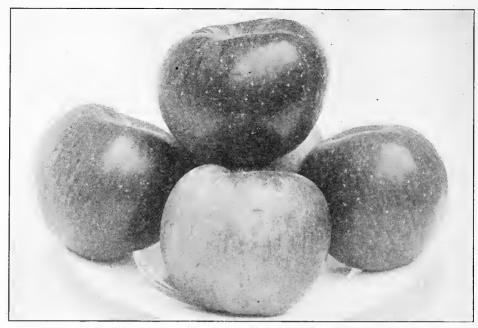

S. pentandra, or laurifolia (Laurel-leaved Willow). A bushy tree with dark green, glossy leaves. Good near seashore. 6 to 8 ft., 50c; 8 to 10 ft., \$1.00. (See "Hedge Plants.")

Syringa Japonica (Japan Tree Lilac). A distinct tree form. Very fine and hardy. 4 to 5 ft., \$1.00; 5 to 6 ft., \$1.50.

Tilia Americana (Linden or Basswood). A well known tree. Large and shapely. 8 to 10 ft., 1.50; 10 to 12 ft., \$2.00.

T. Europaea (European Linden or Lime). Leaves darker and smaller than those of the American. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50; 10 to 12 ft., \$2.00.

Ulmus Americana. Our native American Elm. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50; 12 to 14 ft., \$2.00.

FRUIT TREES

APPLES

The following list of Apples embraces varieties which have been tested, and can be recommended as the very best for general cultivation. All Apples are furnished in standard sizes unless dwarf trees are specified.

Prices: 2-year, 5 to 7 ft., 75c each, \$6.00 per doz.; extra size, 3 and 4-year trees, \$1.50 to \$3.00 each.

Dwarf Trees on Paradise stock, 2 to 3 ft., 75c each; \$6.00 per doz.; extra size, \$1.00 each. These are useful for small gardens, and usually bear the third year after planting. Offered in the following varieties: Baldwin, Gravenstein, McIntosh, Red Astrachan, Yellow Transparant

SUMMER

Early Harvest. Pale yellow, excellent, early. Golden Sweet. Large, pale yellow, sweet. Red Astrachan. Large, crimson, very early. Williams. Dark red, mild flavor.

AUTUMN

Fameuse (Snow Apple). Crimson, flesh white, excellent. Gravenstein. Large, yellow, striped red.
Maiden's Blush. Sept.; large, yellow and red; good.
Pippin. Fall, yellowish green, very fine.
Porter. Medium, bright yellow; good.
Pound Sweet. Nov.; very large, yellowish, sweet and rich.

WINTER

Baldwin. Large, dark red, productive, medium.
Golden Russet. Late yellow, good flavor.
Hubbardston. Large yellow, splashed red; early.
McIntosh Red. Vigorous growth; handsome, hardy.
Ripening November to February.
Northern Spy. Large, striped red, good keeper.
Rhode Island Greening. Large, yellowish green, medium.
Roxbury Russet. Extra quality. Largest of russets.
Tolman's Sweet. Medium, light yellow, excellent.
Wealthy. Dec. to Feb.; dark red, juicy, good, very hardy.

Crab-Apples

Price, 75c each; \$6.00 per doz.

Hyslop. October to January; deep crimson.
Martha. A new crab raised from seed of the Duchess of Oldenburg. Fruit glossy yellow, shaded with light red; fruit mild and tart.

Transcendent. September, October; useful alike for preserving, pies, sauces and cider.

PEACHES

Prices: 4 to 5 ft., 50c each; \$5.00 per doz.; 5 to 6 ft., 75c each; \$6.00 per doz.

Carman. New, hardy rot-proof. Pale yellow skin and red cheek; early.

red cheek; early.
Champion. Aug.; new, creamy white; large; superior.
Crawford's Early. September; large, yellow, freestone.
Crawford's Late. Very large, juicy, good, freestone.
Crosby (Ironclad). Sept.; medium, sweet, firm.
Elberta. August first; flesh yellow. Very juicy.
Fitzgerald. Sept.; large, Crawford type; hardy.
Foster. September; similar to Early Crawford; better.
Hale. September; large, deep yellow. Very hardy.
Mountain Rose. September; large, white and red, melting.
Old Mixon. Sept.; large, white and red, juicy and rich.

PLUMS

Price, 5 to 7 ft., 75c each; \$6.00 per doz.

EUROPEAN TYPE

Bradshaw. August; large, purple, sweet.

Damson. September; dark purple, very productive.

Reine Claude. Sept.; large, greenish yellow, very fine.

Lombard. September; medium, violet, rcd, juicy.

Yellow Egg. August; large, yellow.

JAPANESE TYPE

Abundance. Early; fruit amber turning to cherry, flesh yellow, juicy, tender and swect. Bears heavily.

Burbank. Sept.; bright red, flesh yellow and sweet.

Wickson. Late, large, carmine, delicious, small stone.

Satsuma. September; purplish-red, flesh dark red, juicy.

QUINCES

Apple, or Orange. Large, roundish, bright golden yellow; very productive.
Champion. Vigorous and productive; very late.

CHERRIES

Price, 6 to 7 ft., \$1.00 each; \$9.00 per doz.

Coe's Transparent. June; medium, pale amber and red.

Black Tartarian. June; large, purplish black; sweet.

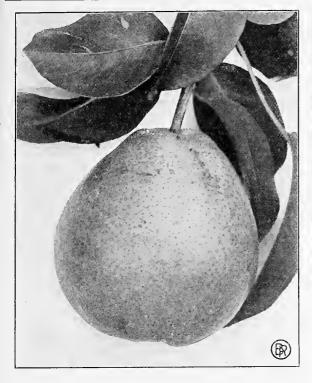

Montmorency. July; large, tender, rich; sour.

May Duke. June; large, dark red, tender; sour.

Windsor. July; large, dark red, nearly black, sweet.

Yellow Spanish. Late June; pale yellow, red cheek.

See Special Fruit Catalog for additional varieties.

PEARS

Standard Pears. 5 to 7 ft., \$1.00 each; \$9.00 pcr doz., except as noted.

Dwarf Pears. Budded on quince stocks, in the following varieties. 3 to 4 ft., 75c each; \$6.00 doz.

Bartlett, Beurre d'Anjou, Clapp's Favorite, Duchess d' Angouleme, Howell, Lawrence, Seckel, Wilder's Early.

Summer Pears

Bartlett. Vigorous growth; large; yellow and red; juicy. Ripening September.

Clapp's Favorite. Vigorous growth; very large and handsome; yellow and crimson. Ripening August.

Wilder. Ripens in August and is a liberal cropper. Skin, bright yellow; flesh rich creamy color and virtually coreless.

Autumn Pears

Buerre Bose. Moderate growth; large, russet; buttery, rich. Ripening September and October. \$1.50 each.

Flemish Beauty. Vigorous growth; large; yellow and russet; juicy melting, swcet; good; very hardy. Ripening September and October.

Louise Bonne of Jersey. Vigorous growth; large; yellow and red; melting, buttery, rich; Scpt. and October.

Seckel. Moderate growth; medium; brown; juicy, melting and buttery; of the highest flavor. Scpt. and Oct. Sheldon. Vigorous growth; large; russct and red; melt-

ing, rich, delicious, very good. Ripening October.

Vermont Beauty. Brilliant-colored skin. Matures a little later than the Seckel and is valuable as a shipping pear.

Winter Pears

Anjou. Vigorous growth; very large; greenish yellow; melting, buttery, juicy, sprightly, vinous; keeps into mid-winter. Ripens November and Dccember.

Lawrence. Moderate growth; medium to large; golden yellow; melting, aromatic, very good. Nov. and Dec. Downing. Whitish green.

HARDY NATIVE GRAPES

50c each; \$4.00 per doz.

Campbell's Early. Clusters large, compact and handsome; berries large, nearly round, black with light purple bloom. Vigorous grower.

Concord. Bunch and berries large, round, black; flesh moderately juicy, sweet pulp.

Moore's Early. Quality better than Concord; its size and earliness render it desirable.

Worden. Berries large, sweet. Ten days earlier than Concord and superior to it.

RED AND REDDISH PURPLE

Agawam (Roger's No. 15). Large, tender, juicy, vinous, vine vigorous.

Brighton. Large, handsome and of the best quality and ripens early.

Delaware. Medium or small, but delicious; highly esteemed everywhere.

Salem (Roger's No. 53). One of the best and most popular. Ripens with the Concord.

WHITE

Green Mountain (Winchell). Ripens early, good bearer, vigorous grower.

Moore's Diamond. Berry about the size of Concord; color, greenish white with yellow tinge; juicy.

Niagara. Berry large, slightly pulpy, tender, sweet, ripens with Concord.

HOT-HOUSE GRAPES

Black Hamburg. The best known and most rugged of the greenhouse grapes. Bears heavily. Early.

Museat of Alexandria. A white variety requiring somewhat higher temperature than Black Hamburg, but almost equally rugged. Ripens later and keeps longer.

Fruiting Canes, from pots, \$5.00 each.

RASPBERRIES

\$1.00 per doz.; \$5.00 per 100, except as noted.

Cuthbert. Red, firm and superior quality.

Columbian. Very large, purple.

Erskine Park. This new red raspberry originated on a private estate at Lee, Mass., and is described by the U. S. Dept. of Agriculture as surpassing all other latebearing sorts. The plants are very hardy; the fruit large and firm. \$1.50 per doz.; \$10.00 per 100.

Golden Queen. Productive and of superior quality. Golden yellow.

Cumberland. One of the finest black, large and productive.

Gregg. Good black, productive and hardy.

Marlboro. Large, red, very productive.

St. Regis. The everbearing red, good quality. \$1.50 per doz.; \$8.00 per 100.

GOOSEBERRIES

25c each; \$2.50 per doz.

Red Jacket. The best red, free from mildew. Pearl. The most prolific, free from mildew, green.

See Special Fruit Catalog for additional varieties.

Agawam Blackberries

BLACKBERRIES

\$1.00 per doz.; \$5.00 per 100.

Agawam. The earliest; flavor like the wild berry.

Rathbun. Extra large, productive, new.

Snyder. Best quality, very sweet, medium size.

Eldorado. Hardy, good size and quality, unusually productive.

Wachusett Thornless. Fruit medium, hardy and very productive, almost free from thorns.

Erie. Large and early; excellent quality.

CURRANTS

\$1.50 per doz.; \$9.00 per 100, except as noted.

Black Naples. Fine for wine and jelly.

Cherry. Large, red, juicy.

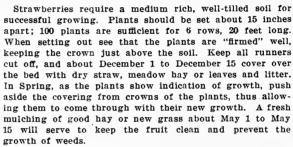

Fay's Prolific. The most popular red variety for bome use; bears heavily.

La Versailles. Very large, red.

Perfection. The largest red currant in existence; a prize winner. 25c each; \$2.50 per doz.

White Grape. Large yellowish white, sweet.

STRAWBERRIES

Varieties marked "P" are pistillate and must have a row of staminate, or perfect-flowered varieties (P. F.), planted every 10 feet among them.

PRICES

Layer Plants. For spring planting. Per doz., 30c; per 100 \$1.50; per 1000, \$10.00. Pot Grown Plants. For July, August and September

planting. (See 1919 Midsummer Catalogue for prices.)

Abington. Large fruit, solid, and excellent flavor. P. F.

Belmont. Late; crimson berry; very productive. P. F. Breck's Abundance. Large, excellent berry; very heavy cropper; flavor tart; medium early. Highly recommended. P. F.

Brandywine. Hardy, good quality. Medium. P. F.

Marshall

Campbell's Early. A new variety of great value. Very early, of good size and fine flavor. P. F.

Chesapeake. P. Mid-season to late; a fine large berry of good quality.

Commonwealth. Late; very large; deep crimson; excellent flavor. P. F.

Early Ozark. P. F. Extra early; large, dark red, deli-

Excelsior. The best of all early strawberries. Is medium small; crimson; tart, and the earliest of all. Splendid variety. P. F.

Gandy. Large berries; late and an excellent cropper. Splendid keeper. P. F.

Glen Mary. Large; crimson berry; good quality; very productive; late. P. F.

Heritage. P. F. Mid-season; a robust grower and a prodigious yielder. Flesh solid and of fine texture.

Marshall. Requires no recommendation; is medium late. The fruit is very large, deep crimson color, and extra quality. P. F.

Minute Man (P.) Medium early; vigorous grower, free from rust; berries light red and a great cropper.

Norwood. P. F. Early to mid-season; fruit very large, of the Marshall type. Excellent quality.

Parsons' Beauty. P. F. Mid-season; very heavy yielder,

marketing well.

Senator Dunlap. P. F. Early to mid-season. Dark red berries of medium size; flesh red throughout, juicy and good.

Fall or Everbearing Strawberries

Although several varieties of everbearing strawberries have been introduced, we have found only two which are prominently superior. They are valuable both for home use and for market.

Runner Plants, for spring planting, 50c per doz.; \$3.00 per 100.

Potted Plants, for mid-summer planting, \$1.00 per doz.; \$6.00 per 100.

Progressive. This variety makes a vigorous growth, and produces immense quantities of berries. Blossoms should be kept picked off until about the middle of July. If this is done, a beavy crop is insured from about the first of August until heavy frost. The berries are of medium size and excellent quality.

Superb. The berries of this excellent variety are a

little later than those of Progressive. The plants are about equal in vigor of growth, but do not produce so many berries per plant as Progressive. The quality, however, is excellent, and is always sure to bring the highest price on the market.

SPRAYING CALENDAR

This calendar, based upon the recommendations of the Agricultural Colleges and Experiment Stations of the country, is a brief guide for the general treatment of insect pests and plant diseases.

Timeliness is one of the greatest factors in the control of diseases and pests; in order to spray intelligently, that is, to strike at the proper time, one should know at least the main facts in the life-history of the insect or disease sprayed against. Moreover, it will pay to remember that, for nearly all fungous diseases and some insects, spraying is a preventive, and to be most effective must be done at the time when attacks may be expected, without waiting for the enemy to become apparent.

Spray only on clear, sunny days and finish the work early in the afternoon, so that the application will dry rapidly and before dew falls. Spray evenly and thoroughly, using ample pressure and a nozzle that throws a fine mist, but do not continue until the foliage drips. Never spray when the trees are in blossom.

In general terms:

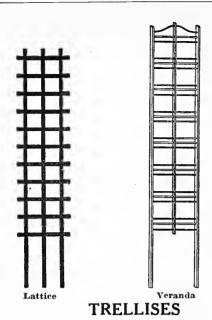

POISONS, such as Arsenate of Lead, are used to control leaf-eating insects. Examples—Canker Worm, Potato Beetle.

CONTACT INSECTICIDES, such as Tobacco Extracts, Soap Sprays, Kerosene Emulsion, etc., are used in fighting sucking insects. Examples—Plant Lice, Squash Stink-bug. Sucking insects will not be killed unless they are hit by the spray.

Bordeaux Mixture and Lime-Sulfur are for use against plant DISEASES.

Plant	Enemy	Spray	1st Application	2nd Application	3rd Application
Apple	Bud Moth Codling Moth Scab Curculio	Arsenate of Lead and Bordeaux. (Lime- Sulfur may be used instead of Bordeaux)	Just before blossoms open.	{Immediately after petals fall.	r { 10 days later.
	San Jose Scale	{ Lime-Sulfur or Miscible Oil.	Autumn after leaves o have fallen	r Early Spring before leaf buds swell.	{ If badly infested make both applications.
Cabbage Cauliflower	Green Worms	Arsenate of Lead if plants are not heading.	If heading, apply Hell	ebore.	
Carnation	Red Spider Rust	Clear water. Copper-Sulphate, 1 lb. to 20 gals. water.	Syringe off the plants In the greenhouse onc In the field once a wee	e in 2 weeks.	areful not to drench the beds.
Cucumber Melon Squash	Wilt Mildew Striped Beetle Borer.	Bordeaux. Bordeaux.	Middle of July.	-	tasteful to the beetles.
Currant Gooseberry	Currant Worm		As soon as worms appear. Before leaf buds open.	Use Hellebore after fr	
Grape	Flea-beetle Mildew	Arsenate of Lead.	Before blossoms open. Before blossoms open.	1	 2 weeks later.
Peach	San Jose Scale Peach Leaf-curl.	(See under Apple).	{Dormant season before buds swell.	[1
and Apricot	Curculio	Arsenate of Lead.	When shucks are shedding from the young fruit.	(petais fail.

SIMPLEX WEATHERPROOF PLANT LABELS

Neat, convenient, permanent. The writing is protected by the transparent cover, and will last indefinitely if done with lead pencil. Whatever water enters at the sides will not deface the markings as the graphite of the pencil is not soluble to any extent and requires friction to remove it. This friction is prevented by the transparent cover.

DIRECTIONS: Slide transparent cover to one side, mark with ordinary lead pencil, replace cover, pass wire through both holes and attach. Waterproof India Ink may also be used for marking with excellent results.

Prices, including Copper Wise for attaching Sizes Per Doz. Per 100 No. Sizes Per Doz. $3x\frac{1}{2}$ in. \$0.25 \$2.00 3 5x1 in. \$0.75 $4x\frac{3}{4}$ in. .50 4.00 Special: Special sizes to order.

LABELS. Improved Indestructible Tree. These labels are made of copper alloy, and so constructed that the wires cannot cut through the metal from constant flapping in the wind. If properly attached there is no danger of it becoming unfastened. By using a stylus or hard lead pencil the metal is in-

dented and the writing is permanent.

No. 1. 3¾ x ¾ in.

No. 2. 5 x 1½ in., suitable for two lines writing, 2.00

WIRE RODS or STAKES. To be used with Indestruc. tible or other hanging labe!, \$4.00 per 100.

"Adjusto" Plant Support

There have been many plant sup-porters offered and sold but they were all ungainly and unsatisfactory in a great many ways. We can offer the "Adjusto" under a positive guarantee that it will please you and give you entire satisfaction. The "Adjusto" is a very simple, unbreakable, practical and cheap support which will last a lifetime.

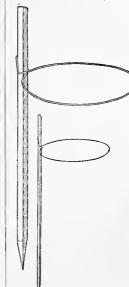

It is adjusted in a "jiffy" to any height, to conform to the plant's growth. It is in dispensable for Tomatoes, Roses, Hydrangeas and Dahlias. In fact everything on the lawn or in the garden that needs a support.

The stake is made of hardwood having a protecting coat of green paint, the heavy spring wire is also painted green and so will not rust.

The price is very moderate and is within the reach of all.

Price, 3 ft. 15c each \$1.75 per doz. 5 ft. 20c " 2.25 "

Sterlingworth Weed Killer

This preparation is the most powerful and effective weed-killing compound known. It is unexcelled for use on walks, drives, tennis courts and golf links, and is used largely in parks and cemeteries, or where the killing of all objectionable vegetation is desired. It is a dry powder to be dissolved in water. It permanently destroys all kinds of weeds, grass (including milk-weed and witch grass), poison ivy, briars, burdocks, dandelions, daisies, thistles. One application kills roots and foliage, preventing further growth until new seed is sown. Do not dig up your walks, drives and tennis courts to kill weeds. The cheaper, quicker and less laborious way is to use this killer. It is applied with an ordinary watering can. Full directions on every can. I-lb. pkg. (makes 10 gals.) 50 cts., 5-lb. pkg. (makes 50 gals.) \$2.00.

Glazing Points. The Peerless. The only durable and reliable points. Made of galvanized steel wire, no rights and lefts. No raising up when driving. Three sizes: Nos. 2, 2½ and 3. The Nos. 2 and

2½ are for general use; the No. 3 for extra heavy work. Per box of 1000, 75 cts. Pincers for driving same, 40 cts.

Caps, Hay, Breck s Improved. Brown, medicated, complete with ropes and pins, \$1.00 each; \$90.00 per 100.

Butter Color, Hansen's Danish. This color is famous the world over and is used wherever it is desired to impart the "golden tinge of June" to butter at all seasons of the year. Bottle, sufficient to color 500 lbs. of butter, 25 cts.; for 1200 lbs., 50 cts.; for 2500 lbs., \$1.00.

Tall

Tve's

The Hyacinth Glasses we offer are of American manufactur® They are of better shape and in more desirable colors than the imported Belgian glasses usually sold.

Ordinary Tall Shape. Green, blue and amber. Each 25 cts., doz. \$2.50.

Tye's Style. Green, blue and violet. Each 30 cts., doz., \$2.75.

Mastica

(For Greenhouse Glazing.)

We originally introduced Mastica to the horticulturists of New England. It is superior to any and all other preparations for the purpose, and when results and labor in setting or resetting glass are considered it is decidedly the cheapest article to use.

We are the Manufacturers' Distributing Agents for Boston

For glazing greenhouses, new or old. The use of Mastica avoids the necessity of frequent reglazing. It can be used to bed in or on the outside, with a machine; one gallon will cover about 290 running feet (one side). Gallon cans \$2.00, ½ gallon \$1.25.6% discount allowed on orders for 6 gallons; 10% discount allowed on orders for 10 gallons; 10% b. Boston.

Machines for applying Mastica, \$2.00 each. Net.

This grass, long used by gardeners for tying plants and bunching vegetables, has been adapted to new uses. While it is likely to hold its place as the best tying material yet produced, there will be a great demand for it for a few years for making baskets, mats, etc. Price quoted on application.

Gauntlet, 85 cts. per pr. Ladies' Gauntlet, 75 cts. per pr.

"Basket Making." The first book of the "How to Do It Series." Tells all about basket making. It contains over one hundred illustrations of working designs with full particulars of methods. By mail 25 cts.

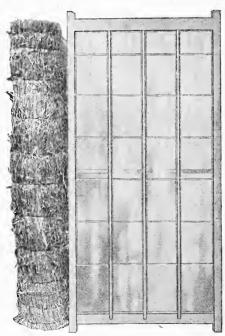

Silkaline. Used for growing smilax and asparagus on, also for tying in bouquet work; per reel, 25 cts.

Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprinkling bouquets, dampening clothes, etc.; three sizes, 75 cts., \$1.00 and \$1.25 each.

Scollay Sprinkler

Double Glass Hot Bed Sash

Straw Hot Bed Mat

Two sashes in one frame, doing away with the extra mat and board covering which must be used in this section during our severe winter, if one is to be sure of plants growing in Hot Bed or Cold Frame.

The couble layer of glass, 5% inch apart, provides dry air space, which is the best non-conductor known, and while acting as a protecting mat or blanket, lets in the sun with its heat rays. Our sash is all puttied into the frame, which is made of the very best material and well painted and the standard 3 x 6 size; lights of glass, 10 x 12.

Price: per single sash, \$7.50; 5-sash at \$7.35 each; 10-sash and over \$7.25 each; delivered to railway station or express, Boston. Crating extra.

Single Glass Sash for Hot Beds or Cold Frames

Crating Extra at Cost

Made from thoroughly seasoned lumber. Frame, well puttied and painted, 134-inch stock; glass, 8 x 10. The best sash offered today in Boston.

Price: Single sash, \$6.00 each; 5-sash or over, \$5.75 each.

Breck's Special Hot Bed Sash with Frame, Complete

The outside dimensions of Frame are three feet one inch long, and four feet eight inches wide, made of one inche Cypress; the back piece is nine inches wide and the front piece is six inches wide, grooved together, and held in place by eight strong hooks.

Being fastened together by the hooks enables one to take it apart at the end of the season and store away in a very compact form, which we consider an essential feature, as by so doing

the frame may be made to last for years,

The Sash is also made of Cypress of one and one-half inch stock, put together and glazed in the very best manner. On the under side of the **Sash** is fastened a cleat, one inch from the outer edge, all around, thus forming a rabbet which makes the frame very tight, preventing the cold air from entering or the heat escaping.

The construction of the frame is so simple that any one with

a hammer and screwdriver can put it together in a few minutes. In offering this **Special Hot-Bed** to our customers we feel that we have something that will give entire satisfaction and will supply a long felt want.

Our price for Frame and Sash complete is only \$6.50

delivered at the railroad in Boston.

Sieves, Wire. For preparing potting soil, sifting loam, gravel, etc.; 16, 18, 20 and 24 inches diameter; 75 cts., 90 cts., \$1.15, \$1.50 each respectively.

INSECTICIDES AND FUNGICIDES

In general terms: ARSENATE OF LEAD and PARIS GREEN are specifics for leaf-eating insects. KEROSENE I FISH OIL SOAP for sucking insects. BORDEAUX MIXTURE and LIME AND SULPHUR for fungus. KEROSENE EMULSION, TOBACCO.

Prices subject to change without notice. See spraying calendar on page 119

"CORONA DRY" Arsenate of Lead

A pure Arsenate of Lead containing 33% arsenic oxide, absolutely chemically combined with lead and the lowest percentage of "free" or water soluble arsenic. It is the ideal compound for spraying potatoes because it combines the quality of quick poisoning (superior suspension), giving even application; absolutely safe from "burning" and great adhesiveness. It gives an even application, covers more thoroughly and sticks to the foliage longer. It mixes easily and readily in water. No working up to prepare for the spray tank. No straining. It is only necessary to shake the proportional amount into the spray

tank. By using the same weight each time you spray, your mixture is always the same strength. No guesswork. Standardization is alone worth the price. No freight to pay on water; cannot freeze or dry out, cake, or lose its strength.

Prices: 1-2 lb. pkg. 30 cts. each, 1-lb. pkg. 55 cts., 5-lb. pkg. 50 cts. lb., 10-lb. pkg. 45 cts. lb., 25-lb, drums 44 cts. lb., 50-lb. drums 43 cts. lb., 100-lb. drums 42 cts. lb., 200-lb. drums 40 cts. lb.

Corona Dry Bordeaux Mixture. Bordeaux Mixture has been used in the past as a spraying compound and the standard remedy for fungus diseases and is generally recommended. The home-made freshly prepared Bordeaux compounded on one of the standard formulas has been the most efficacious product that could be used by commercial orchardists and potato growers. In the home garden it may be used dry as well as in liquid form and is needed for regular use the season through. Corona Dry Bordeaux Mixture is the result of extensive experiments to retain the values of the freshly prepared substance to the fullest extent. The intense greenish blue color of the freshly prepared mixture has been retained to a large degree and its practical use in the field has shown that we have been very successful towards preserving the fungicidal and stimulating values as well. But Dry Bordeaux can often be substituted with Dusting Sulphur especially in combating Mildew wherever found, as well as in the greenhouse. This substitution is recommended when possible, particularly on flowers and roses because the Dusting Sulphur does not stain the foliage. Uses of Dry Bordeaux are mentioned under the different headings. It is put up in standard sizes.

Prices: 1-2 lb. pkg. 25 cts., 1 lb. pkg. 40 cts., 5 lb. pkg. 35 cts. lb., 10 lb. pkg. 30 cts. lb. Special prices quoted on larger amounts.

Corona Tobacco Dust. For use in the garden, the Tobacco Dust should be in the form of a fine powder and this is the standard we have approached in Corona Tobacco Dust. When dusted over young plants it is very efficient in repelling many kinds of bugs and in keeping the foliage free from Aphids and Lice. Its specific uses have been indicated under the different plants and vegetables enumerated. There need be no fear of

Prices: 1-2 lb. pkg. 10 cts. each, 1 lb. pkg. 18 cts. 5 lb. pkg. 16 cts. lb., 10 lb. pkg. 15 cts. lb.

Corona Dusting Sulphur for Fungus Pests. Pure refined superfine flour sulphur. No other ingredients. This pure sulphur is especially prepared for dusting. It can be used for all purposes of commercially pure sulphur. There are many insects, and even more fungus diseases, that have no known remedies at the present time. The fungus diseases are the harder of the two to handle, but some of the most common ones can be controlled by use of an efficient sulphur product.

Prices: 1 lb. can 20 cts., 5 lb. cans 75 cts., 25 lb. drums 9 cts. lb., 100 lb. drums 7 cts. lb.

THE CORONA GARDEN GUIDE

10 cents per copy.

A Pocket Companion and Ready Reference book for every Garden Worker.

SCALECIDE

(With Fungicide)

A reliable, simple and economical spray for San Jose Scale, Brown Scale, Red Scale, Cottony Maple Scale, Pear Psylla, Rust Mite, White Fly, and many other scale and soft bodied sucking insects. Scalecide is not an emulsion, but a soluble miscible oil that mixes instantly with cold water and stays mixed. We believe it to be more effective than any other soap or oil emulsion, and if used as directed will not injure the trees. Spray thoroughly or not at all, using finest nozzle. Fogging is better than drenching. Full directions for use accompany each package. We have secured a large stock, placed it in our warehouse in Boston, enabling us to make immediate shipments to all local points and at very short notice.

Prices: Quart cans, 60c. each; 1 gallon cans, \$1.45 each; 5 gallon cans, \$5.30 each; 30 gallon cans, \$25.50 each; 50 gallon cans, \$39.25 each. All F. O. B. Boston. Prices subject to market changes.

Aphis Punk, Nikoteen. A special preparation of Nicotine for the extermination of Green and Black Fly, Thrip, etc.; contains no ammonia and does not injure delicate plants.

Per box of 1 doz. rolls (720 grains Nicotine), 75c.; case of 12 boxes \$7.50.

Aphine. Most effective against all plant sucking insects infesting flowers, foliage, fruits and vegetables. Can be used as a spray, wash or dip.

½ pt. cans 25 cts.; ½ pt. cans 40 cts.; 1 pt. cans 65 cts.;

qts. \$1.00; gals. \$2.56.

Creosote Mixture. This mixture is sure death to the eggs of the Gypsy Moth, Tussock Moth and similar insects. Made on the formula used for years, and recommended by the Massachusetts Gypsy Moth Committee.

Prices: 1 qt. 25c., 1 gal. 75c., 5-gal. cans 60c. gal., 50-gal. bbl. 24c. gal.

He-bo (Sterlingworth). A substitute for Hellebore which is satisfactory for use against Rose slugs, currant worms, cabbage worms and most other leaf eating insects, where a milder poison than paris green is desired. For many uses it is superior to Hellebore. Price: 1/2 lbs. 15c., 1 lb. 25c.

Breck's Victor Fly Driver

Safe to use, thoroughly effective and cheaper than any other first-class preparation for the purpose on the market. Put up in 1-gal. cans only.

Prices: 1-gal. can, \$1.00; case of 1 doz. cans, \$9.00.

Bordeaux Mixture, Liquid, Acme Brand. We consider this the best concentrated Bordeaux Mixture on the market. One gallon makes 50 gallons of Bordeaux by simply adding 49 gallons of water. It does not clog the nozzle and adheres to the leaves. Full directions on cans for use.

Prices: 1-qt. cans, 50c; 1-gal. cans, \$1.50; 5-gal. cans, \$5.50; 10-gal., \$9.50; 25-gal., \$21.00 each.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

INSECTICIDES AND FUNGICIDES-Contd.

Prices subject to Market Changes.

Bowker's Pyrox. The one best spray for all leaf-eating insects. Does all that Arsenate of Lead will do, besides protecting trees, shrubs, vegetables and plants against fungus diseases, one application answering both purposes saving labor and expense. "Sticks like paint" in spite of even heavy rains. Guaranteed under the National Insecticide Act. All ready to use by adding water. 1 lb. 35c., 5 lbs. \$1.40, 10 lbs. \$2.50, 25 lbs. \$5.75, 50 lbs. \$10.75, 100 lbs. \$20.00, 300 lbs. \$57.00. Large quantities, price on application.

Bowker's Concentrated

Bowker's Concentrated Lime Sulphur kills San Jose Scale, Oyster Shell bark lice, etc., and gives the tree a thorough "house-cleaning." It should be

applied any time after the leaves drop in autumn and before the buds start in spring. Needs only to be diluted with cold water and it is ready to apply. One gallon makes 10 gallons of spray. Guaranteed under the National Insecticide Act. 1 gal. 75 cts., 5 gal. can \$3.00,10 gal. can \$4.50, 50 gai. bbl. \$12.00. Write for special prices on larger quantities, stating quantity required.

Bowker's Arsenate of Lead (Disparene Brand). It is easy to apply and won't injure the most tender foliage. 1 lb. 32 cts., 5 lbs. \$1.20, 10 lbs. \$2.20, 25 lbs. \$5.25, 50 lbs.

\$10.00, 100 lbs. \$19.00. "Black Leaf 40." centrated solution of Nicotine sulphate. Active ingredient, Nicotine 40%. For spraying fruit trees to destroy soft-bodied sucking insects. Each sucking insect must be "hit" by spray to be affected. Against Green and Rosy apple, Aphis, Pear psylla, Hop louse, etc., one fluid ounce Black Leaf 40" to eight gallons water. Against Black Aphis, Wooly Aphis, one flu'd ounce Black Leaf 40" to 6 gallons water. Add soap as follows: One pound of good laundry or fish oil soap to each thirty gallons water, which lessens formation of drops and gives better penetration. Dissolve the soap in the water before adding "Black Leaf 40." Keep solution well stirred while spraying.

Bug Death. A patented non-poisonous powder, effective against potato, squash, and cucumber bugs, currant and tomato worms also other plant and vine eating pests. If used according to directions injury cannot result to the most tender plants and it has a tendency to assist growth. Bug Death may be applied dry in a shaker or mixed with water and sprayed. Prices 1 lb. boxes, 25 cts., 3 lb. boxes, 50 cts., 5 lb. boxes, 75 cts. 12½ lb. boxes, \$1.50, 100 lb. drums, \$8.50.

Reg. U. S. Pat. OFF. Pat. March 16 and Nov.

ROGERS DRY LIME SULPHUR

In Rogers Brand of Dry Lime Sulphur we find successfully combined lime and sulphur in a dry form and producing a compound which has all of the insecticidal and fungicidal qualities of the liquid material and all of its advantages with none of its disadvantages. Safe and effective not only as a dormant spray but also as a summer spray in combination with arsenate of lead. Rogers Dry Lime Sulphur has been tested by experiment stations and found to be infinitely superior to all of the present dry compounds on the market, not only in safety but in effectiveness.

From 10 to 12 pounds of Rogers Dry Powdered Lime Sulphur dissolved in 50 gallons of water should be used as a

dormant spray against scale, etc.

From 2 to 3 pounds to 50 gallons of water in combination with the usual preparation of Dry Powdered Arsenate of Lead or Paste Arsenate of Lead should be used for summer spraying on all seed fruits such as apples, pears, quinces, etc.

From 1 to 1½ pounds to 50 gallons of water in combination with the usual strength of Arsenate of Lead should be used for summer spraying of peaches, plums and all stone fruits. Prices: 1 lb. pkgs., 25 cts.; 5 lb. pkgs., 20 cts. per lb.; 10 lb. pkgs., 18 cts. per lb.; 25 lb. pkgs., 16 cts. per lb.; 100 lb. keg, 15 cts. per lb.; 225 lb. bbl. 14 cts. per lb.

RAT CORN

Is not an experiment. On the contrary, it is a thoroughly tried and proven destroyer of rats and mice. It is poison to rats and mice. When dead they leave no odor, as they are mummified. Keep away from fowl. It is sure death to rats and mice. Rat corn is guaranteed to do everything we claim, and this statement

can be used as our guarantee with each box you buy. Rat corn will kill rats and mice. It is safe, sane and sanitary; rats die in their nests. You find no dead ones around, no odor and no danger of being infected, as you do not have to handle dead rats to bury them when killed with rat corn. Start to use rat corn now before it is too late. Sold in 25c., 50c. and \$1.00 packages. Sent post paid on receipt of price.

For free delivery offers and general instructions regarding orders and shipments see third page of cover

INSECTICIDES AND FUNGICIDES—Contd.

All Prices on This Page Subject to Change Without Notice.

Lemon Oil. An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt. 60 cts., qt. \$1.00, gal. \$3.00.

"Nico-Fume" is especially effective against Aphids ("Green Fly" and "Black Fly") and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: 24 sheets 85 cts., 144 sheets \$4.00, 288 sheets \$7.50.

All Golf green keepers should have a supply on hand. 1 gal. kegs \$4.00; 5 gal. kegs, \$3.50 per gal.

Sterlingworth Cut Worm Killer is a powder for sprinkling near the vegetation to be protected, and is so alluring to Cut Worms that they are irresistibly attracted to it. Dead Cut Worms may be seen wherever there are Cut Worms and this Killer is used. It is non-poisonous, and birds, fowl and pets that eat the dead Cut
Worms are not killed. Do not use poison
for killing Cut Worms.
You may poison
insect-eating birds. One pound protects 175 plants in hills,
and 150 lineal feet when in rows 11th hard 25 of 175.

and 150 lineal feet when in rows. 1-lb. box 25 cts., 5-lb. tins \$1.00, 24-lb. drums \$4.00.

Slug Shot. Not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. 1 lb. boxes 20 cts., 5 lb. pkg. 45 cts., 10 lb. pkg. 85 cts., in bbls. of about 225 lbs., per lb. 71% cts.

Sterlingworth Anti-Crow Corn Oil is a non-poisonous oil for protecting newly planted corn from crows and blackbirds. Do not kill the crows. They eat bugs. Corn treated with this Oil will run through a seeder. Different and better than tar. 1-pt. can 25 cts., 1-qt. can 40 cts., 1-gal. can \$1.25.

Sterlingworth Plant Lice Killer. Is a combination of Nicotine soap and oil for use against all small sucking insects, lice, etc, infesting house plants. Use one part to 15 parts water and sprinkle or spray. Price 25 cts. pint, gal. \$1.50.

Sterlingworth Ant-i-cide. Is for sprinkling on ant hills or out of doors on the ground wherever ants appear. One pound covers about 200 square ft. 1 lb. box 25 cts., 5 lb. tins \$1.00, 25 lb. drums \$4.50 each.

Soap Spray, Imperial. . Contains no mineral poisons, but does contain vegetable poisons, harmless to plants, but peculiarly effective against Red Spider on fruit, etc., Rose Bug, White, Black and Green Fly, Mealy Bug, Thrip, Aphis, and other insect pests on fruits, flowers and foliage. It sticks but can easily be washed off fruit before marketing. It does not spot leaves. Harmless to animals eating orchard grass. Largely used for general tree and shrub spraying against elm-leaf beetle, etc. Qt. 65 cts., gal. \$2.20, 5-gal. can \$9.00, 10-gal. \$17.25. Prices subject to change.

Soap, Fish Oil. This is for the destruction of San Jose scale and all sucking insects. Lb. 25 cts., 5 lb. pkg., \$1.10, 10 lb. pkg. \$2.00, per 100 lb. \$15.00 Special prices on kegs

Soap, Sulpho-Tobacco (Patented). A superior insecticide and fertilizer. Non-injurious to the tenderest growth. Kills all insect life in the window-garden. Unsurpassed for rose bushes. For domestic purposes it is valuable as an exterminator of Moths, Cockroaches, Carpet Bugs, and is a superior wash for dogs and all animals. Every insect will succumb to this insecticide. 3 oz. cake 10 cts., 8 oz. cake 20 cts.

Sulphate of Copper (Blue Stone). Lb. 15 cts., subject to market changes.

Sulphur, Flowers of. Used to prevent and cure mildew on plants. Lb. 12 cts., 100 lbs., \$8.00.

Tree Tanglefoot. A perfect safeguard for trees, vines and shrubs against Gypsy, Brown-tail and Tussock Moth, Canker Worm, Cut Worm, Ants, and other creeping insects. Do not heat it but apply it directly from the can. 1 lb. can 50 cts., 3 lb. can \$1.35, 10 lb. can \$4.25, 20 lb. can \$8.00.

Tree Burlap. 10 inches wide, for girding trees. Prices quoted on application.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destructive work of the wire and cut worms. Per lb. 5 cts., \$1.00 per 30 lb. sack, per 100 lb. \$3.00.

Tobacco Dust. Fine ground. Can be used for dusting on plants, animal and poultry houses, to destroy lice, vermin and other insects. Can also be used to fumigate against insects, lice, etc. Readily lighted and consumes itself without making a flame, throwing off great quantities of smoke. Lb., 10 cts., 100 lbs. \$4.50.

Vaporite. A fine, dry powder, most effective for killing ants, beetles, wire worms, cut worm and similar insects in the garden soil. To destroy ants one should dust the Vaporite over the ground near the largest ant hills and runs, then wet the insecticide down thoroughly with hose or watering pot, that it may be driven as far into the soil as possible. To use it it may be driven as far into the soil as possible. most effectively against the cut worm, Vaporite should be thoroughly worked into the surface soil 5 or 6 days before planting time. 15 cts. lb., 5-lb. can 60 cts., 100 lbs. \$10.00.

Vermine. Destroys white grub, cut, eel and wire worms, slugs, maggots, root lice and ants. For greenhouses, gardens, lawns, tennis courts and golf-links. 1/4 pt. 25 cts. 1/4 pt. cans 40 cts., pt. cans 65 cts., qt. cans \$1.00, gal. cans \$3.00.

TOLMAN LAND LIME

LIME benefits the soil in the following ways:

LIME sweetens a sour soil.

LIME mellows heavy and clayey soils.

LIME makes available certain valuable potash compounds otherwise lost.

LIME increases the capacity of the lighter soils to retain moisture.

LIME makes phosphatic fertilizers more effective.

LIME makes organic matter decompose more rapidly and easily, thereby rendering the vital plant food contained more promptly available.

LIME in the soil combats organisms causing diseases among cabbages, cauliflower, turnips, beets and the like.

TOLMAN LAND LIME has been prepared with great care under the advice of experts and practical farmers to satisfactorily

meet the rapidly increasing demand for lime in agriculture. It comes from unusually pure calcium lime-rock testing approximately 96% straight CaCO3 with less than 2% MgCO3 present and is thoroughly kiln burned (not unburned lime-stone). On leaving the kiln it is carefully mixed with lime hydroxide in the proportion of one-third lime oxide to two-thirds lime hydroxide, yielding a mixture sufficiently caustic to do its work but amply tempered with the lime hydroxide to prevent soil and root burning as well as discomfort in handling. Our product is thus powerful, and safe even on light soils.

In order to make TOLMAN LAND LIME easier and pleasanter to use it comes in a uniformly sand grained size, coarse enough not to sift and blow about like pulverized lime and still sufficiently fine to promote ready absorption by the soil and work easily in spreaders.

We claim that our LIME accords with the latest recommendations of the various Agricultural Experiment Stations and that it is safe, powerful, economical, uniform and comfortable to handle. It comes packed in convenient, durable, cotton cloth sacks, one hundred pounds to the sack.

Price \$1.00 per 100 lbs., \$12.00 ton

FERTILIZERS

Breck's Extra Lawn and Garden Dressing

Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year, from April to November, as often as the grass seems to need nourishment. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower.

TOO LDS. SRECK'S ENTRA LAWN GARDEN DRESSING. WITHOUT POYAGE. GURAANTED ANALYSIS. ENTRA. Self to Agenotic. Self to Ageno

Bon Arbor Ant Destroyer

A most effective preparation for destroying and driving away ants infesting lawns, tennis courts and golf courses. Usually about 3 days is required to get rid of the ants and about three applications are necessary. Follow directions on package carefully. Price per lb. 50 cts. 5-lb. cans \$3.25; 10-lb. cans \$6.00; 25-lb. box \$12.50. Price subject to change.

Bon Arbor Plant Food

Diy chemicals, 30 gallons of water to one pound of Bon Arbor. A very powerful chemical fertilizer; follow directions carefully. Prices: $\frac{1}{2}$ -lb. can 35c; 1 lb. can 60c; 5-lb. can \$2.35.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

Breck's Ram's Head Brand Pulverized Sheep Manure—(Odorless)

A standard dressing for lawns and around private homes or cemeteries; on golf courses and wherever a strong, luxuriant growth of grass is needed. No time is lost waiting for Pulverized Sheep Manure to rot, as is the case with stable or Barnyard Manure, and no necessity for raking off refuse after an application of Breck's Ram's Head Brand, or danger of tracking into the house, or making the lawn unsightly or evil smelling.

Apply Ram's Head Brand two or three times during the season before rain or watering at the rate of one pound or over to 30 square feet or less. This will keep the

lawn or golf course in flourishing condition.

Ram's Head Brand is pure and unadulterated. We get it from Sheep Corrals where the animals have been kept under cover, hence it retains its full strength, and besides has been put through a mechanical drying and grinding process which destroys absolutely all weed seeds, rendering Ram's Head Brand very valuable for the florist to be used as a bench fertilizer.

We are selling increased quantities of our brand to the Florist for this purpose and we can highly recommend it. \$55.00 ton; 100-lb. bags, \$3.00; 50-lb. bags, \$1.75; 5-lb.

pkgs., 30c; 1-lb. pkgs., 10c; f. o. b. Boston.

Scotch Soot

This is much used by florists and gardeners, both as a fertilizer and fungicide. Mixed with Flowers of Sulphur (two-thirds soot, one-third sulphur) there is nothing better to prevent and cure mildew. Used as a fertilizer either in the dry state or in liquid, it quickly promotes growth. Per bag of about 2½ bu., \$4.00 per 100 lbs.

Breck's Extra Market Garden Manure [4-9-1]

A high-grade, properly balanced, complete fertilizer. Can be used either with or without barnyard manure, and for general use on all farm and garden crops. Especially recommended for market gardeners. \$2.00 for 50-lb. bag; \$3.75 per 100-lb. bag; \$72.00 per ton, all f. o. b. Boston.

Fine Ground Fertilizer Bone

We have a high grade of this valuable fertilizer prepared especially for us. It is useful for all crops, but especially for grass lands and Fruit Trees. Price per 50-lb. bag, \$2.20; 100-lb. bag, \$3.50; per ton, \$60.00.

Inch or Grape Bone

This is unmanipulated bone, broken into pieces that vary in size from one-quarter to an inch. It is unsurpassed as a lasting fertilizer for grape vines, fruit trees, shrubs and trees of all kinds. It should be used liberally in grape vine borders and when setting out vines and fruit trees. Mix with soil to a depth of one foot or more. Price, \$4.00 per 100 lbs.; \$65.00 per ton, f. o. b. Boston.

THE MAPES POTATO MANURE. 1916 Brand

Guaranteed Analysis. Minimum Percentages

Nitrogen, 3.71%; equivalent to Ammonia, 4.50%; total Phosphoric Acid, 8%; available Phosphoric Acid, 8%; Potash, soluble in distilled water, 1%

It is also well adapted for all vegetables at planting or any hoeing, particularly where starch and sugar formation is desired—superior quality of crop as well as large yield; also for sweet potatoes, asparagus, sweet corn, sugar beets, strawberries, and all small

superior quality of crop as well as large yield; also for sweet potatoes, asparagus, sweet corn, sugar deets, strawdelles, and an amount fruits—pears, grapes, etc.

The Phosphoric Acid and Organic Nitrogen are derived exclusively from animal bone, animal and organic matter. No Rock or Acid Phosphates used. The soluble Nitrogen and Ammonia are in form of high grade Salts of Ammonia and Nitrogen. The Potash is in form of high-grade Salts of Potash. No Muriate of Potash used.

Directions for Use.—May be used in hills or rows, mixing and covering with earth, provided it is scattered well. Scatter it down the rows; mix as thoroughly as possible in any manner which best commends itself—with plow, hoe, brush, sled, chain, etc. Use 800 pounds and upward per acre on ordinary land.

The quantity of this manure may be increased to one ton per acre, and this quantity is successfully used by many growers particularly when potato crop is followed by wheat, grass, corn, etc.

Nitrogen, 2.47%; equivalent to Ammonia, 3%; total Phosphoric Acid, 10%; available Phosphoric Acid, 8%; Potash, soluble in distilled water, 1%

Nitrogen, 2.4%; equivalent to Ammonia, 3%; total Phosphoric Acid, 10%; available Phosphoric Acid, 8%; Potash, soluble in distilled water, 1% For sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. The Phosphoric Acid and Organic Nitrogen are derived exclusively from animal bone, animal and organic matter. No Rock or Acid Phosphates used. The soluble Nitrogen are derived exclusively from animal bone, animal and organic matter. No Rock or Acid Phosphates used. The soluble Nitrogen are derived exclusively from animal bone, animal and organic matter. No Rock or Acid Phosphates used. The soluble Nitrogen are in form of high-grade Salts of Ammonia and Nitrogen. The Potash is in Directions for Use.—On heavy or average good land, particularly when stable manure is used broadcast, use 200 to 400 pounds per acre; convery light and plain lands, use broadcast 800 pounds per acre; on very light and plain lands, use broadcast 800 pounds per acre.

The best plan for securing good growth throughout the entire season and raising a large yield, is to broadcast the fertilizer evenly over the whole field after plowing, harrowing in. A portion of the fertilizer, say 200 to 400 pounds per acre, can be used in the hills, scattering well a small handful to each hill. Application at any hoeing or disturbance of the soil has always worked well.

Clay's Fertilizer

(Prices on English Fertilizers subject to change)

A safe and reliable preparation. In great favor with successful gardeners in England. Prices:

Thomson's Vine, Plant and Vegetable Manure

A safe and reliable food and stimulant for every fruit-bearing plant, also for foliage and flowering plants and vegetables of all descriptions. Prices: ½ cwt. (14 lbs.) \$2.25; ½ cwt. (28 lbs.) \$4.00; ½ cwt. (56 lbs.) \$7.00; I cwt. (112 lbs.) \$12.00.

Thomson's Special Chrysanthemum Manure

Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaping dessert-spoon full will be sufficient for a to-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season. Price, 14 lbs. \$2.50; 28 lbs. \$4.50; 56 lbs. \$7.50.

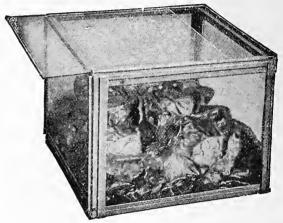

Bowker's Ammoniated Food for Flowers

A dressing made expressly for plants grown in the house, garden, or conservatory. Clean, odorless, and producing early and abundant blossoms of rich and brilliant color and healthy, luxuriant plants free from vermin. Price, small pkg. 20 cts.; large pkg. 30 cts.

Cocoanut Fibre

A chemically prepared cocoanut fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy vigorous plants. For potting bulbs use one-third fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Cocoanut Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs. 35 cts.; 15 lbs. 60 cts.; 25 lbs. 85 cts.; 50 lbs. \$1.60; 100 lbs. \$3.00, net.

The Barrie Forcing Frame

The Barrie Forcing Frame

Under these frames corn, cabbage, cauliflower, lettuce, cucumbers, tomatoes, melons, egg plant, etc., as well as all tender flowers, can be started and grown in the open ground and brought to maturity much earlier than usual.

The frames placed over rhubarb or other permanent plants, either vegetables or flowers, greatly hasten their maturity in the spring.

Lettuce, etc., can be grown under or protected by the frames through the late fall.

Excellent for the starting of tender flower and vegetable seeds for transplanting into the open ground.

The frames also protect their contents from the ravages of the cut worm.

Placed over bulbs in the spring time, in the small garden, blooms of greater perfection may be bad much earlier than usual.

The frames are constructed of Galvanized Iron unpainted, and can be instantly set up or taken apart without the use of tools.

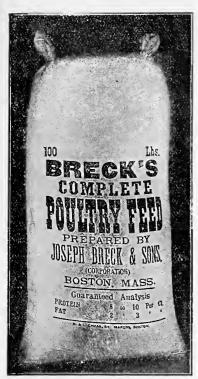

Any light of glass can be easily replaced, in case of breakage, without taking apart the frame, and the top glass slides open for ventilation.

The metal frame weighs two pounds without the glass and is absolutely strong and rigid. The glass consists of four panes so x 12 inches, and one pane 12 x 13 inches, standard sizes, easily obtainable anywhere.

To assemble, fit the corners of the top and bottom squares into the slits in the ends of the posts. Pass the stay rods, bent end up, through the holes in the squares, inside the posts. Attach nuts and tighten slightly. Slip in the glass and the frame is complete.

Carefully packed, knocked down, in heavy corrugated cartons, each containing six frames and glass complete.

Price, \$1.75 each; \$20.00 a dozen.

Breck's Hygienic Brand Chick Food

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhæa, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the boneforming properties that prevent leg weakness. It is high in protein, the flesh and muscle-forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$2.25. 100 lb. bag, \$4.00.

Breck's Complete Poultry Feed

We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in *Breck's Complete Poultry Feed* what we believe is the best food for poultry that is on the market today.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. Feed dry. 50 lb. bags, \$2.25; 100 lb bags, \$4.00.

Breck's Mash Egg Food

Is a properly balanced meat and cereal preparation, and is one of the best egg-producing foods we know of for poultry that do not have large runs; it is just what is wanted to keep them in good vigorous condition. Can be fed wet or dry. Price, 100 lb. bags, \$3.75.

Breck's Alfalfa Meal

Our brand of best pea green California Alfalfa, grown on irrigated land, rich in protein; one of the best green feeds during the winter for poultry.

DIRECTIONS FOR FEEDING: Pour on boiling hot water, cover, let steam an hour, then mix with the usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Shipped in 100 lb. bags only, \$3.00 per c.

Breck's Banner Brand Cut Clover

Made from the best New York grown Red Clover, ground medium fine, all from Red Clover hay.

DIRECTIONS FOR FEEDING: Pour on boiling water, cover, let steam an hour, then mix with the usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 50 lb. bag. Prices quoted on application.

Breck's Poultry and Swine Meal. A concentrated powder, a palatable animal meal for poultry and swine. Full directions for feeding with each package. Price per 100 lbs., \$4.00; 50 lbs., \$2.25; 25 lbs. (month's supply for 30 hens), \$1.50.

Breck's Hub Poultry
Fountain. This fountain is

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filled, and is equally serviceable for both chickens and adult fowls. Half gal., 65 cents each; 1 gal., 85 cents each; 2 gals., \$1.15 each. Special prices per dozen or 100 upon application.

Blatchford's Calf Meal. The perfect milk substitute. Will raise and veal calves at one-third to one-quarter the expense of feeding milk. Used and endorsed by Experiment Stations and farmers all over the world; has been on the market for 100 years. A valuable feed for pigs, colts, lambs and poultry. It is absolutely the only milk substitute that contains the elements necessary for bodily growth and correct preparations. Blatchford's Calf Meal is not a stock food; it contains no drugs, medicine or stimulants; it is purely and simply a baby food for young animals. A 100lb. bag makes 100 gallons of rich, nutritious gruel, thoroughly cooked and prepared for digestion. Price per 100 lbs. \$6.00, 50lbs. \$3.25, 25 lbs. \$1.75, f.o.b. Boston.

Pratt's Poultry Regulator

(Formerly called Pratt's Poultry Food)

This is the original Poultry Regulator, in use by the most successful poultry raisers everywhere. It is entirely different from Pratt's Animal Regulator. It is composed of valuable imported roots, herbs and barks so blended as to make a perfect regulator, tonic and stimulant, suited to the constitution of the poultry.

Pratt's Poultry Regulator overcomes the difficulties met by every poultryman by regulating the blood, bowels and digestive organs of all fowl. Thus it keeps the birds in robust health, produces good, rich blood, healthy fat, sturdy muscles, strong bones, red combs and wattles, brilliant feathers and fertile eggs. It stands unrivalled as an egg producer, and when regularly used, the hens lay throughout the year.

Pratt's Poultry Regulator costs but a few cents a week for a big flock, and it pays its costs many times over in the results it produces. Results are immediate and permanent. Trial pkg. 10 cts., 26-oz. pkg. 30c., 4-lb. pkg. 60c., 12-lb pails \$1.50, 25-lb. pails \$3.00, 50-lb. bag \$5.00, 100-lb, bag \$10.00.

Pratt's Baby Chick Food

This is one of the greatest money savers and greatest chick savers ever placed on the market. Every man, woman or child who raises little chicks, turkeys, ducks and geese, should try at least one package of Pratt's Baby Chick Food. It is a scientific food ration to be fed for the first three weeks. If you want real success with your hatches, if you want to save all the baby chicks, if you want to grow them fast, get Pratt's Baby

Chick Food on our recommendation for your first trial; after that you will never be without it. 3-lb. pkg. 30c.; 6½-lb. pkg. 60c.; 25-lb. pail \$2.50. Pratt's Poultry Book mailed on request.

Pratt's Roup Cure is a scientific preparation compounded into a fine powder, and when mixed with water, is absorbed by the blood at once, purifying the system, allaying inflammation, and reducing the fever. It not only cures but prevents roup, colds, canker, catarrh and diphtheria, and should be given to all fowls frequently to keep diseases away. Extra large boxes 50 cts. and \$1.00, small size 25 cts.

Pratt's White Diarrhoea Remedy. This remedy will positively save many dollars worth of little chicks to poultry raisers. It has taken us nearly three years to find a remedy for White Diarrhoea and we are so sure that we have it in this article that we authorize our dealers throughout the world to refund the purchase price in case it fails. Small pkg, 25 cts.,

Pratt's Roup Pills. Quick, safe, sure; for roup, canker, and diphtheria. 1 1-2-oz: pkg. 25 cts., 3 1-2-oz. pkg. 50 cts. Postpaid.

Pratt's Animal Regulator. The original stock regulator of America. Keeps horses well, improves their wind and makes their coats glossy. Cows give more and richer milk, butter fat being increased, and calves are strong and healthy. Steers fatten in half the time; hogs and sheep fatten quickly, free from disease. In 30 cts., 60 cts. and \$1.00 pkgs. 25 lbs. \$3.75.

Pratt's Poultry Disinfectant. Will protect your birds from nearly all the serious germ diseases. It gets rid of lice and mites, prevents roup, cholera, gapes, scaly leg and a host of other trouble makers.

Wonderfully effective in ridding cattle, horses, hogs, sheep and dogs of parasites and disease bacteria. 1 qt. 50c.; $\frac{1}{2}$ gal., 90c.; 1 gal. \$1.50.

Sanitary Poultry Fountains. Made of glazed stoneware, in two pieces, a saucer and an inverted cup, finished off on top top revent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one-quart size is specially suitable for pigeons. 1 qt. 38 cts., 2 qts. 48 cts., 1 gal. 68 cts., 2 gals. \$1.05. Net. Packing charges free.

Ground Oyster Shells. 100-lb. bag \$1.25; 500-lb. lots, \$1.20 per 100 lbs.

Mica Crystal Grit. 50-lb. bag 75 cts., 100 lbs. \$1.25.

Bone Meal for Poultry and Cattle. 50-lb. bag, \$2.00, 100-lb. bag \$3.50.

Cracked Poultry Bone. Coarse cracked bone for fuil grown fowl. \$3.50 per 100 lbs.

Poultry Charcoal

This Charcoal is especially prepared for poultry. It is carefully and uniformly graded in just the right sizes, is free from ammonia or other dangerous poisons, contains no useless dust or dirt and is the best charcoal sold for poultry. It is manufactured in four grades: X (Fine Powdered) for mash foods and ducks; XX (Fine Granulated) for brooder chicks and dry chick food mixtures; XXX (Medium Granulated) for halfgrown fowls and pigeons; XXXX (Coarse Granulated) for full-grown fowls, geese and turkeys. Per lb. 10 cts., 5 lbs. 30 cts., bag of 50 lbs. \$2.00.

Spratt's Food. The celebrated English preparation; nothing equals it for young chicks. 50-lb. bag \$3.75, 100 lbs. \$7.00.

Barley (Feeding). \$2.25 per bushel. Net.

Buckwheat (Feeding). \$2.50 per bushel. Net.

Peas Small white Canada, \$5.00 per bushel. Net.

Sunflower. Large Russian, 15 cts. per lb.

Millet. Good feeding quality, 8 cts. per lb. Net.

Kaffir Corn, or White Sorghum. 100-lb. bag \$4.50. Net.

Wheat. \$7.00 per 100 lbs. Net.

Ground Beef Scraps. Always freshly ground from the best kettle rendered cake scrap. 50-lb. bag \$2.75, 100-lb. bag \$5.00, ton \$98.00.

Fish Scraps. Dry, fine ground, 100-lb. bags; \$5.00 per 100 lb. bag.

Darling's Meat Crisps. Made from meat trimmings taken from the markets of Chicago and cooked the same night. After being cooked in a most careful and thorough manner the feed is pressed in tremendous presses to take out every possible bit of grease and moisture. Guaranteed to contain 75 per cent protein. A concentrated feed for laying hens. Small package 40 cts., large package 80 cts., 25-lb. pails, \$3.00 each. Net.

Death to Lice. 5 oz. box, 10 cts., if by mail 15 cts.; 15 oz. box 25 cts., if by mail 40 cts.; 3 lb. pkg. 50 cts., by mail \$1.00; 100 oz. pkg. \$1.00.

Liquid Lice Killer, Acme Brand. It is applied with an ordinary sprayer. It is of such strength that the gas given off by it destroys the pests; is perfectly safe to handle and is not injurious to fowls, animals or operator when used as directed. Price, 1 qt. cans 35 cts., 2 qt. 60 cts., 4 qt. \$1.00.

COW'S RELIEF

Is guaranteed to cure Caked Bag caused by garget, injury, overfeeding or calving; sore or injured Teats, Spider in the Teat, Stricture, Hard Milkers, Cow Pox and is especially valuable for heifers with the first calf, to remove the soreness and swelling that is too frequently a cause of kickers and hard milkers. Your money back if it does not satisfy you. Small pkg. 75 cts., large \$1.50.

Garget Remedy. This remedy has stood test of twenty years and is a complete success. It will not injure the butter or lessen flow of milk. Per can 55 cts.

Nest Eggs, China. Per doz., 25 cts. \$2.50 gross.

Breck's Water Glass. Silicate soda, for the preservation of fresh eggs. Of the various methods devised for preserving fresh eggs only two have proved successful, viz.: Cold Storage with temperature at 34° or the Water Glass Method, the latter being the only practical one for family use. Water Glass is recommended by the U. S. Dept. of Agriculture as being the best preservative having no chemical action whatever. It simply seals the pores of the shell, keeping the contents of the egg in same condition as when put into the solution. If directions are followed, fresh eggs will keep perfectly for a year or longer. Full directions on every can. Price per gallon \$1.00. Price subject to change.

Kow-Kure. It is a medicine for cows only. It prevents abortion, cures barrenness, removes retained afterbirth, prevents tuberculosis, stops scours, cures milk fever, caked udder, swelling in the bag, bloating, red water, increases the flow of milk, cures cows "off their feed," improves the quality of the milk. Large size, \$1.20; small size, 60 cts.

Sulpho-Naphthol. This preparation, originated by the late Doctor Cabot- is recommended for a great many purposes. It cleans and heals all sorts of cuts, bruises and sores. It is sure death to all kinds of bacteria and insects, and is unsurpassed as a disinfectant. For domestic animals, poultry and poultry houses it is the thing. Trial size 10 cts. 25c. bottle makes 5 gals.; 50c. bottle makes 10 gals.; \$1.00 bottle, 50 gals. solution; 1 gal. can, \$3.00.

Spiral Celluloid Leg Bands. Best and cheapest to use. Last a lifetime. Put on and take off easily. Slip on just like a key ring. Will not come off. Birds cannot lose or remove them.

Colors: Black, Blue, Green, Pink, Red, White, Yellow. Per doz., 15 cts.; per 100, 75 cts. Special price on large quantity.

Leg Bands, Aluminum, for Poultry. Double Clinch. No. 1 for Bantams, No. 2 for Mediterraneans, No. 3 for American females; No. 4 for American males, Asiatic females, small turkeys; No. 5 for Asiatic males and turkeys. We number them to order. Per doz., 15 cts.; per 100, 65 cts. Postpaid. Numbering, extra 10 cts. per 100.

Double Clinch, Aluminum

Leader Adjustable

Leader Adjustable Leg Bands. Latest and best adjustable leg band out. Has neat, compact and smooth fastening with no catching points; easily attached and are absolutely secure. Made in two sizes: No. 1 for Bantams or Mediter-

raneans, No. 2 for Americans. Per doz., 15 cts.; per 100, 65 cts. Postpaid. Numbering, extra 10 cts. per 100.

Nests, Wire. Strong and clean. Each, 20 cts.; doz., \$2.00.

Guns, Insect Powder. 2-oz. size, 15 cts. each.

Carbonol. Combines all the good properties of Carbolic Acid and yet has none of its bad features. Such a substitute has long been sought. Carbonol is a preparation of coal tar product adapted to a wide range of uses. It is a disinfectant, antiseptic and insecticide. Follow directions that accompany each package. 4-oz. bottles, 25 cts.; pints, 50 cts.; quarts, 75 cts.; gallon cans, \$1.75.

Creonoid. Lice destroyer and cow spray. Creonoid is prepared especially for this purpose. An up-to-date antiseptic preparation made from coal tar. Creonoid stands for animal comfort. Follow directions on can carefully Stock tormented with flies cannot make flesh or milk. Keeping the flies off may mean the difference between profit and loss. Cows sprayed with Creonoid just before milking are quiet and give better yields of milk, because the flies are kept away. Try it, and see the results for yourself. Prices: \$1.25 per gal. 5 or 10 gal. cans, \$1.00 gal.; ½ barrels, 85 cts. gal.; barrels, 75 cts. gal., f. o. b. Boston.

Milkol. An antiseptic, a disinfectant, cleanser, a curative agent. Keeps your live-stock clean and healthy, cleanses and purifies their quarters. Absolutely safe to use, non-poisonous and non-corrosive. One gallon makes from 60 to 256 gallons. Directions on every can. ½ gal. can, 85 cts.; I gal. can, \$1.50; 5 gal. can, \$1.25 per gal.

Clark Heaters. The use of Clark Heaters and coal is steadily on the increase. Write for special catalogue giving all sizes. Popular sizes are:—

No. 5 B. Light and handy.

12 inches long. Weight 4 lbs.
Covered with carpet . . . \$1.50

No. 7 D. 14 inches long. Weight 9 lbs.
Flat slanting top.
Covered with carpet . . . 2.25

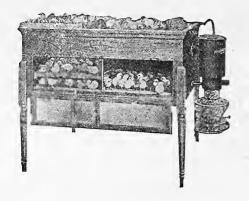

Clark Coal, 1 doz. bricks in box, weight 7½ lbs. 6.00

The Disinfectant that paints. Use it instead of whitewash. Put on with a brush or sprayer. A snow white cold water paint that will not blister, flake or peel off, combined with a germicide 20 times stronger than carbolic acid but neither caustic nor poisonous. Particularly good for use in stables, cow barns, chicken coops, dairies, hog pens, creameries, cellars, factories and outbuildings.

The necessity of absolute cleanliness and complete sanitation in barns, pens and stables where poultry and livestock are kept, if they are to thrive and produce as profitably as they should, has been pointed out by the Department of Agriculture, by Experiment Stations and by farm and poultry papers too often to be repeated here. Failure to keep their living quarters clean and sanitary is the surest means of introducing into flocks and herds the lice and other vermin that sap their vitality, and so reduce their production, as well as the contagious diseases that prove so costly if they once gain a foothold. Carbola can be applied to wood, brick, stone, cement or sand finished walls; to plaster board, tar paper or over whitewash or old oil paint that is hard and firm, but not glossy. It will not blister, flake or peel off, no matter how many coats are put on, and as the mineral pigment used has a greater fire resistance than asbestos it is apparent that several coatings of Carbola will act as an efficient fire retardant.

Trial package 25c. Delivered by parcel post for 35c. (Paints and disinfectants 250 sq. ft.). 10 lbs. (10 gals.) for \$1.00, 50 lbs. (50 gals.) for \$4.00, 300 lb. bbl. \$21.00. All F. O. E. Boston.

Prairie State Incubators

To those who desire to rear as well as to hatch chicks and ducks, the selection of an incubator is of vital importance. The high death rate experienced with chicks the first ten days is more frequently due to imperfect incubation than to any other cause. Too many incuhators of today are constructed with reference solely to hatching the desired numbers without considering the manner in which they are brought into existence.

Weak, anæmic chicks, lacking in strength and vitality, are of no value, if you hatch thousands; hence the importance of carefully considering the merits of an incubator in this direction before making a selection.

The Prairie State Sand Tray Incubators have proven themselves by thousands of tests, both in the hands of the novice, as well as in comparative results obtained by the large poultry plants using different makes of incu-

No. 0.	100 Eggs		\$27.00
No. 1.	150 Eggs		35.00
No. 2.	240 Eggs		50.00
No. 3.	390 Eggs		65.00
		60 Eggs	
No. 1.	Keystone,	100 Eggs	18.50

For the above incubators with Underwriters' Insurable Heaters add to prices given: Prairie State, Nos. 0 and 1, \$4.00 each net; Nos. 2 and 3, \$5.00 each net; Keystone, Nos. 0 and 1, \$2.50 each net.

Southboro, Mass.

Prairie State Incubator Co., Homer City, Pa.:
Dear Sir:—Yours received and noted. Am pleased to state that our experience with the Prairie State Incubator, that I purchased of you and used this season, is such that I can thoroughly recommend it. I have used the machines for 10 or 12 years and thought they were doing pretty good work but they do not bring out

the chicks so uniformly good as the "Prairie State" has. When they commence to hatch, they come out like Popcorn and clean up in a few hours; no dragging along a day or two.

W. R. GRAVES, Ex-Pres. American Poultry Ass'n.

Prairie State Stove Brooder

The Prairie State Stove Brooder is of solid cast iron construction and will, therefore, last indefinitely. Its fire bowl is of ample capacity, which will positively carry a fire overnight and last an extra margin of from five to eight hours. No sheet iron enters into the construction of the stove. There is no coal magazine, consequently no bridging of ashes or coal, no belching of smoke into the brooder room. The chicks are comfortably warm over their backs hy the deflection of heat over the canopy, which is the only correct way in brooding. The canopy is hinged and easily lifted, giving ready access to the stove and regulator and reduces to the lowest terms the labor involved in charging the fire box. The canopy is of flat construction, permitting deflection of heat and, at the same time, preventing rapid radiation above the top. The regulator is at once automatic, sensitive and simple,

giving triple control with one motion of the lever and assuring positive action at all times. The lower door is not a part of the regulating system and needs never be opened except for the removal of ashes. The Prairie State Brooder is not a makeshift, hastily placed upon the market to meet competition, but is an equipment of splendid design, characteristic of Prairie State methods and has been brought out only after most careful thought and experimenting on the part of our Company.

No. 0 Prairie State Stove Brooder 18.00

Holliston, Mass., June 26th, 1914.

Joseph Breck & Sons, Boston, Mass.:

Dear Sirs:-We have your inquiry of June 24th regarding the Prairie State Stove Brooders we have installed. The first installation of one brooder decided us to put in twenty, and after operating the twenty, we put in another twenty. We have now forty brooders in operation on our Holliston, Mass., plant, and about twenty more at our other branches. We brood 500 chicks to a brooder, making a total of about 30,000 chicks now being brooded under your brooders.

We do not think further comment is necessary.
PITTSFIELD POULTRY FARMS CO., Per Howard Gilmore.

Pairie State Brooders and Hovers

The Prairie State Brooders and Hovers are made in the most thorough manner. The No. 1 Brooder is, in fact, a colony house, as the hover can be removed and attached to another house. The No. 2 and No. 3 are constructed on the same general plans as the No. 1, only they are smaller in size.

The Universal Hover has stood the test of a number of years and has proved to be one of the most successful of brooders. It is easy to attach to any colony house or box. The lamp box is placed on the outside of the colony house, thus making it very easy for the attendant to look

after the lamp.

The Portable Hover is just what its name indicates, a hover that can be moved from one house to another at any time. This hover is constructed entirely of galvanized sheet steel. No wood or other inflammable materials are used. It is insulated thoroughly with asbestos and mineral wool. Every inch of the inside of this house is available for brooding purposes and is uniformly heated throughout, there being no hot or cold spots.

MOTOR LAWN MOWERS

The Motor Mowers shown on this page have stood—the tests of Durability, Efficiency and Ease of Operation. As "Labor Savers" they will do the work of six to eight—men using hand mowers, or two to three horse-drawn mowers. 'Cost of operation (gasoline and oil) is very light. We have no besitancy in recommending them for either small or large places as stated.

For Private Estates, Institutions, Small Parks, etc., the "Ideal" is all that its name implies. Simple, Powerful, Efficient and Durable, anyone can operate it successfully. Can be used as a Lawn Roller only, by removing cutting unit and substituting castor wheel. Width of cut, 30 inches. Speed per hour, 2½ miles. Actual weight, 550 lbs. Will cut ¾ acre per hour.

Descriptive Circulars, Testimonials and Price upon Application.

GENUINE "PHILADELPHIA" MOTOR MOWERS

Riding type "Eagle" Motor Mower-40 inch

These mowers are intended for the heaviest kinds of work on Golf Courses, Public Parks, Cemeteries and all large areas where a mower must be in constant use. Operates under all conditions, both good and bad. The makers guarantee them against all imperfections in materials and workmanship with a full knowledge that they are as perfect as modern ingenuity and highest grade materials can make them.

The 30-inch Walking machine weighs 900 lbs. Travels from 2½ to 3½ miles per hour. At normal speed (3 miles) it will cut ¾ acre per hour and consume about 4 gallons gasoline in an eight-hour day's work.

The 40-inch Riding machine weighs approximately 1,300 lbs. Travels from 2% to 3½ miles per hour. At normal speed (3½ miles) it will cut 1½ acres per hour, consuming 8 gallons gasoline in an eight-hour day's work.

Descriptive Circulars, Testimonials and Prices on Application.

DAZEY CHURNS

The Dazey cannot be compared with any other churn, because there is such an immense difference. It is not an imitation; it is an entirely new departure in churn making. It is better. Any churn will agitate and make butter, but the Dazey is the only one that produces butter in its natural condition.

Iwan's Post Hole Auger

This is the only auger that has met with universal satisfaction under all conditions of soil. It is effective in operation, and unexcelled for easy and quick work; no suction when removed from the hole.

An operator can do three times as much work as with any other auger or digger now in use. The condition of the ground makes no difference. Whether wet or dry it simply gets there every time.

Total length of 12 and 14 inch sizes, 6 feet. All other sizes 4 feet.

ACME Pulverizing Clod Crusher Harrow and Leveler

No. 17. 61/2 Foot, Cut Rigid Frame, 2 Horse, Standard Type

A general purpose Harrow for the farm, the truck farm or the orchard. The man who owns an "Acme" is completely equipped for the preparation of perfect seed-beds after plowing regardless of the character of soil he has to work. Everything that a Harrow ought to do, the "Acme" does.

It cuts, crushes, turns, smoothes and levels, all in one operation. The shape of the coulters permits trash and sod turned under by the plow to remain beneath the surface, adding a valuable fertilizer to the soil. Other Harrows tear this up and permit it to waste on the surface.

It is made entirely of steel and iron, is practically indestructible, and such repairs as may be necessary after long use, as new coulters, may be had at a minimum cost.

Size G H	Width 3 ft. 0 in. 4 " 4 "	Description 1 Horse 1 "	Standard \$19.00 26.40	XL \$19.65 27.00

PLANET JR. FARM GARDEN TOOLS

Drill Seeder, Wheel Hoe, Cultivator and Plow Price, Complete, \$19.50 No. 4 D (as a seeder only) \$15.50 Soon pays for itself in the family garden as well as in the larger

acreage. Sows all garden seeds (in drills or in hills), plows, opens furrows and covers them, hoes and cultivates quickly and easily.

No. 25 Planet Jr. Combined Hill and Drill Seeder, Double Wheel Hoe, Cultivator and Plow Price, \$23.00 A splendid combination for the family garden, onion grower, or large gardener. It is a perfect seeder, and combined double and single wheel hoe No. 31 Planet Jr. Combined Drill

Seeder and Single Wheel Hoe Price, complete, \$13.00 Packed weight, 30 lbs. This new tool is of great value to gardeners who have never felt able to own either a seed drill or a wheel

a small packet of garden seed with great precision. Quickly changed to a splendid wheel hoe. A special machine for the small gardener. No. 11 Planet Jr. Double Wheel Hoe, Cultivator, Plow and Rake Price, \$16.00 A single and double wheel hoe in one. Straddles crops till

20 inches high, then works between. Has steel frames and 14-inch steel wheels. The greatest

hand cultivating tool in the world.

No. 12 Planet Jr. Double and Single Wheel Hoe

Price, \$12.50

Same as No. 11, but without the Rakes and one pair of Hoes.

No. 13 Double and Single Wheel Hoe

Price, \$9.00 This tool is the No. 12, with 6-inch hoes only, these being the tools that are most used. Any of the attachments shown with No. 11 may be added at any time.

No. 33 Planet Jr. Single Wheel Hoe (The No. 31 without Seeder). Price, \$6.50 This combination will delight the suburbanite, the growing boy, women, younger or older, who will find it a light running wheel hoe that will save them hard work and help much to supply the table with fine vegetables.

Planet Jr. Star Pulverizer, Leveler and Weeder

hoe.

It will

sow even

This new tool is especially adapted for preparing the seed bed, and will be found of great value in smoothing and fining the soil surface. The rear blade is 131/2 inches wide. After the crops are started, it may be used between rows as

a weeder or as a crust breaker.

Price, \$6.50

Planet Jr. Farm and Garden Tools

Old-time farming no longer pays—these scientific tools do the work of 3 to 6 men, give bigger yield, and save their cost in a single season. Invented and made by a practical farmer and manufacturer, with half a century's experience. Planet Jrs. are strong and lasting. Every tool fully guaranteed.

Come and let us convince you of their economy.

The highest type of Single Wheel Hoe made. Light but strong, and can be used by man, woman or boy. Will do all the cultivation in your garden in the easiest, quickest, and best way.

No. 17½ Planet Jr. Single Wheel Hoe

This tool is identical with No. 16, except in equipment. The pair of 6-inch hoes, three cultivator teeth and leaf lifter which go with it, are all the finest of their kind.

No. 18 Single Wheel Hoe

Price, \$6.25

This has one pair of 6-inch hoes only—the tools that are most constantly useful throughout the season. Other attachments can be added as needed.

No. 60 Planet Jr. Double Wheel Onion Hoe

> Price, \$7.50 ew tool is a de

This new tool is a departure from all previous Wheel Hoes. It is adjustable for the complete culture of onions, or general hoeing. We offer a special Onion Harvester for this tool.

No. 90 Planet Jr. 12-Tooth Harrow, Cultivator

and Pulverizer
Complete, \$20.00
No. 90B without Pulverizer, \$16.75
An invaluable tool in the market garden, truck and strawberry patches.

Has new steel wheel which prevents clogging. Its 12 chisel-shaped teeth cut out all weeds, stir and mellow the soil and leave the ground in the finest condition without throwing direction plants.

Non-clogging steel wheel. Depth regulator and extra long frame make it run steady.

No. 9 Planet Jr. Combined Horse Hoe and Cultivator

Price, with Steel Wheel, \$17.25

Is identical with No. 8, except that it has no depth regulator, and has a plain wheel instead of a lever wheel.

Cultivates 2 rows of corn, potatoes, beans, etc., at one passage, even if rows are crooked or irregular width. In check rows and listed corn it also beats any other tool. Can be equipped with spring-trip standards, discs, sweeps, hoe steels, and furrowing shovels. Specially hardened cultivating steels add 50 per cent to wear.

Breck's Improved Swing Stanchion

This Stanchion gives as perfect freedom to cattle as it is possible to have and have them fastened at all. The cattle when standing can lap themselves as when loose, and when lying down they can rest the head upon the body as when in pasture.

Thousands are in use. Every dairyman who has used them approves them and adopts them exclusively.

Our net price, each, \$2.00

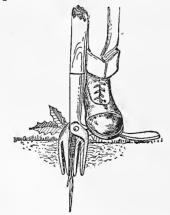

Buckley's Patent Watering Device

The above illustration shows the general application of this system, but a brief description will be necessary to demonstrate its importance, usefulness and simplicity. On application we will mail descriptive catalog with testimonials. etc.

No. 2 Stanchion Basin, with Valve (18 lbs.)
Our net price, each, \$3.00

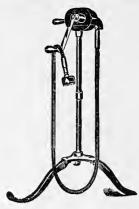

Simplex Automatic Weed Puller

You will find it a pleasure to weed your lawn with the Simplex Automatic Weed Puller. "It pulls em out by the roots, they can't come back." It's guaranteed. (4 lbs.)

Our net price, each, \$1.00

Clipping and Shearing Machines

If properly stabled, well fed, carefully groomed, and clipped in season, a horse will continue in good health and appearance. His value will not impair and he will do good work. Whether you own but 5 sheep or 5000, you cannot afford to overlook the merits of the sheep shearing machines. Machine shorn wool brings the highest price because the machine gets the wool that is next to the skin and that is the best wool of the whole fleece. Hand shears always leave this wool on.

Superior Sanitary Churn

The Superior Sanitary Churn is made with the idea of furnishing the butter maker with a churn that will not absorb any moisture whatever, making it absolutely sanitary. It is very easy to wash and dry, there being no reason for placing it out in the sun to dry, or in the basement to keep it from leaking. It costs more than the ordinary churn and is worth more. The difference in price is nothing when you consider the difference in quality. The labor saved each year, the satisfaction of knowing there is nothing about your churn that will taint the butter, and that your churn will be just as sweet after use as when new. Power attachments can be furnished for the sanitary churns. Circular and prices mailed on application.

The "Pull Easy" Garden Cultivator

This Garden Cultivator is absolutely new. What is more, it is "the handiest little Garden Tool that ever sunk its teeth into Mother Earth." If you are among the army of early risers who faithfully tend a little patch of green things in the back yard—if you own a small farm, or till the soil in a few outlying acres of "truck" you will find this Adjustable Cultivator a valuable aid in doing your work swiftly and thoroughly.

Porter Sanitary Barn Equipment

The cleanliness, convenience, and comfort of Porter Equipment will swell your dairy dividends. The better care you give your cows, the better they will pay you. Stable them in light, clean, comfortable, sanitary quarters and they'll require less feed, keep freer from disease, produce more milk, with a higher percentage of butter fat, and your milk and butter will bring top notch prices. These are facts proved over and over again in the experience of successful dairymen who are using Porter Litter Carriers, Feed Carriers, Stalls and Stanchions. Porter Equipment in your barn will mean a big boost for extra profits, for it's built with practical common-sense understanding of the eare the Dairy Cow needs for best results. It keeps the stalls elean, prevents waste of feed and manure-gives your cows the best chance to show what they ean earn for you.

I. X. L. Galvanized Steel Chain Pump

There has never been a better device for raising water from the well than the old-fashioned chain pump with rubber buckets. The galvanized tubing does not make the water taste, it cannot rust, and will not rot or accumulate filth. This pump is anti-freezing and can be used in wells that are fifty feet deep or under successfully, giving sixteen gallons of water per minute.

Water or Sand Ballast Rollers

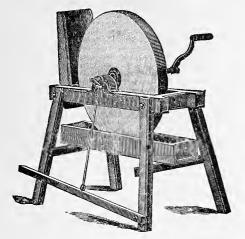

The "Water Ballast Lawn and Garden Roller" idea is a brand new one and by the introduction of this type of tool, the old style, clumsy, iron and steel weighted machines are relegated to oblivion. The "Anyweight" system is one particularly pleasing to the user, as but a moment's time is required to obtain any weight from 115 pounds to one-half ton, suitable to condition of ground or strength of operator. To weight the machine, turn on end, remove pipe plug by unscrewing, insert garden hose, or, if necessary, use pail and funnel, fill the drum to any desired weight, screw in the threaded plug and your machine is ready for business.

Furnished complete with wrought iron handles and counterweights.

Thompson Grass Seeder

This seeder is arranged to sow all chaffy seeds such as red top, orchard grass and blue grass, and all seeds like timothy, hungarian and clover, in any quantity from 6 to 40 quarts to the acre, mixed or separate. The hopper being carried close to the ground, the sowing is not affected by the wind. No. 5 Seeder, complete, with 14-ft. hopper. Our net

price, each . \$9.00 No. 4 Grain Hopper only, to use instead of regular Hopper. Our net price, each 5.00

The Cahoon Broadcast Seed Sower

For sowing Grass Seed and all kinds on Grain from 4 to 8 acres per hour. At common walking gait will throw wheat 40 feet.

The acknowledged superiority of these machines has placed them in the front rank of labor-saving agricultural implements. saving of four-fifths of

the labor and one-third of the seed is effected by their use, and a person entirely unused to sowing by hand can use this machine with perfect success. They are warranted to give perfect satisfaction and to save their cost in less time than any other farm implement, and with ordinary care will last many years.

Our net price, each (8 lbs.)

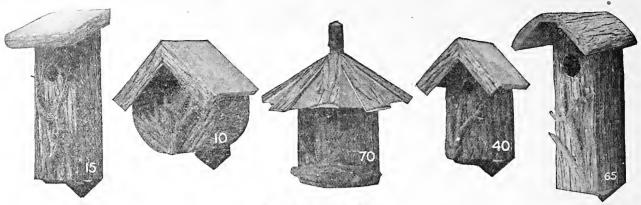

Masters Rapid Plant Setter

Here it is. The tool that truck growers have wanted for years. The MASTERS RAPID PLANT SETTER is the ideal tool for transplant ing Cabbage, Tobacco, Sweet Potato, Cauliflower, Tomato, Strawberry, and all similar plants.

Each plant is put into the ground just the right depth, set, watered and cov-

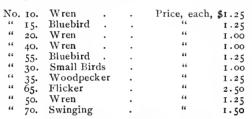

ered in one operation. NO STOOPING AND NO LAME BACKS. Saves labor, does perfect work and more than three times as fast as can be done by hand. Will set plants in dryest weather and get a perfect stand. Thousands in use. No up to date Grower can afford to be without one. Satisfaction guaranteed or your money back. Net Price, Each, \$5.50

DORSETT'S

RUSTIC BIRD HOUSES

Dorsett's bird houses are a quality product, both in workmanship and selection of material. They are made from New Jersey swamp cedar, and are the proper size to meet the requirements of the birds mentioned, as these houses have all been tried out, and the manufacturer has had many years experience with birds that inhabit houses.

BERLEPSCH BIRD HOUSES

The Berlepsch houses are made of such woods as Hemlock, Oak, Ash, Bass Wood, Black Cherry, White Birch, and Yellow Birch, each with the natural bark adhering. Each house has attached to it at the back a hardwood batten, by which it may be fastened to the trunk of a tree, post, or side of a building. No pains are spared to make each individual bird home a perfect specimen of the type; the cavity in the log is practically a facsimile of the natural burrow of a bird, widening out as it descends and curving in again to a rounded point at the bottom.

United States Poultry Fence

The United States Poultry Fence is galvanized after weaving and will not rust as Fencing galvanized before weaving.

The United States Poultry Fence has proven best by test. It has long since established its superiority over other makes, and is in a class by itself. It is built to withstand use and abuse and is guaranteed to give satisfaction.

The United States Poultry Fence is strictly a "No-Sag" poultry fence, as the combination of line and mesh wires, closely woven, prevents any lengthening or narrowing between posts. These features place it a long stride beyond the Hex Mesh Netting, which never fails to narrow and lengthen if you attempt to stretch it to a tension required to prevent sagging.

Cyclone Sanitary Yard Fencing

Style "F" Fabric is without question the neatest, strongest and most pleasing design yet conceived for ornamental fencing. It will not rot nor burn and being heavily galvanized requires no paint. Note also the sharp corrugation at the bottom of each picket—this effectually prevents the lower cable from being displaced. At the top, pickets of No. 9 wire are spaced 2% inches apart, and woven into a double cable, giving extra strength where the greatest wear comes; an extra picket of the same size interwoven in the lower half, gives a spacing of but 13% inches at the bottom, making it perfectly chicken proof.

Breck's Water Glass

Fresh Eggs in Winter at Summer Prices.

Of the various methods devised for preserving fresh eggs, only two have proved successful, viz.: Cold storage with a temperature of 34, or the Water Glass Method, the latter being the only practical one for family use.

Water Glass is recommended by the U. S. Department of Agriculture as being one of the best preservatives, having no chemical action whatever. It simply seals the pores of the shells, keeping the contents of the egg in the same condition as when put into the solution.

If directions are followed, fresh eggs will keep perfectly for a year or longer. Use only Fresh Eggs.

DIRECTIONS.— Use only clean, watertight glass or earthen receptacles, stone earthenware being preferable. To one quart Water Glass, add enough water to make ten quarts of solution Stir or mix thoroughly. Dip each egg in this solution and pack in receptacle, small ends down. Cover eggs with solution to the depth of about two inches. Cover and set away in a cool cellar, out of the sunlight. Discard any eggs that float. If evaporation takes place, add water, but do not disturb or stir the fluid. A five-gallon stone jar with cover would hold fifteen dozen eggs, requiring one-half a gallon diluted, as above, to cover same. Do not use metal receptacles.

Our Net Price Subject to change . . Per gallon, \$1.00

Catalogue on application

OUR CATALOGUE OF AGRICULTURAL HARDWARE, IMPLEMENTS, MACHINES, DAIRY SUPPLIES, WOODENWARE, ETC., Is one of the most complete and best illustrated published in the United States. It is the result of our experience in this business overing a period of nearly a century. Heavy farm machinery and other lines not shown in this annual seed catalogue are fully described and priced.

A copy will be mailed on application

Free Delivery and General Instructions for Orders and Shipments

HERE orders are accompanied by Cash, we Deliver Free to any Post Office, Railroad, Express Office or Freight Station at our Expense, except where otherwise noted.

Vegetable and Flower Seeds at the package, ounce, 1/4-pound, 1/2-pound and 1-pound prices. Excepting Peas, Beans, Corn and other items noted below.

Bulbs at the single and dozen rates.

Books and other publications.

Seeds in bulk, plants, nursery stock, fertilizers, insecticides, horticultural sundries and agricultural hardware forwarded by Parcel Post, express or freight, as purchaser may direct; or in the event of there being given no shipping instructions, we will use our judgment and endeavor to ship in a way that will best protect our customer's interests.

After taking receipt for goods in good order from transportation company, our responsibility ceases.

We would impress on our friends the importance of sending us their orders early. Please do not wait until Spring, when we are so rushed that there is sometimes an unavoidable delay in filling orders. Use the order sheet which we send you with this catalog and give us, written plainly, your name, post office address and shipping instructions.

We recommend that all plants and nursery stock be shipped by express; all such orders will be forwarded direct from our Nursery, the Breck-Robinson Nursery Co., Munroe Station, Lexington, Mass., and at our customer's expense, unless special arrangements are made regarding delivery at time order is placed.

PACKING.-We make no charge for boxes or packing on orders at catalog prices. We charge for cotton bags as follows: 2 bushels, 65c. each; 1 bushel, 25c. each; ½ bushel, 20c. each; ¼ bushel, 12c. each; ¼ bushel, 10c. each. On flower pots and other fragile articles, packages will be charged extra at cost.

PRICES.—Our prices are as low as those of any reliable dealer on the same quality of goods. For large orders, or on orders for export, we will be pleased to quote special prices.

SHIPMENTS BY PARCEL POST.—Seeds in packages and in bulk, bulbs and the majority of the articles shown in the Horticultural, Sundry, Insecticide and Hardware Sections of our catalog, can be delivered at your door or post office by Parcel Post. To enable our customers to estimate the amount which they should remit to cover Parcel Post charges, we give herewith a table of Parcel Post rates and condensed instructions in regard to Parcel Post shipments.

TABLE OF PARCEL POST RATES

Rates of postage on Fourth Class or Parcel Post matterto be fully prepaid—unsealed—are as follows:

(a). Parcels weighing four ounces or less, except books, seeds, plants, etc., one cent for each ounce or fraction thereof, any distance.

(b). Parcels weighing eight ounces or less, containing books, seeds, cuttings, bulbs, roots, scions and plants, one cent for each two ounces or fraction thereof, regardless of

(c). Parcels weighing more than eight ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than four pounds, and all other parcels of fourth-class matter weighing more than four ounces are chargeable according to distance zone, at the pound rates shown in the accompanying table, a fraction of a pound being considered a full pound.

Limit of Size. — Parcel Post matter may not exceed 72 inches in length and girth combined. In measuring a parcel the greatest distance in a straight line between the ends (but not around the parcel) is taken as its length, while the distance around the parcel at its thickest part is taken as its girth. For example, a parcel 35 inches long, 10 inches wide, and 5 inches high measures 65 inches in length and girth combined. combined.
